CATALOG

of export-oriented products from the Republic of Uzbekistan

Tashkent - 2024

At this new stage in our country's development, every year presents an opportunity to implement large-scale programs and projects. With the support of courageous and entrepreneurial businesspeople who have overcome life's challenges, we are confident that we will achieve our objectives.

**Shavkat Mirziyoyev,
President of the Republic of Uzbekistan**

VOLUME OF COMMODITY EXPORTS OF THE REPUBLIC OF UZBEKISTAN
FOR 2016–2023

Categories	2016	2023	Change	
			+/-	in %
Number of exporters	2 400	6 700	4 300	2,8 times
Number of product items	1 900	4 200	2 300	2,2 times
Export volume <i>(millions of dollars)</i>	6,1	10,9	4,8	1,8 times
Export geography <i>(number of countries)</i>	85	116	31	136 %

From 2016 to 2023, the Republic saw a significant increase in the value of its commodity exports, rising from **6.1 billion to 10.9 billion** dollars, representing an **180%** growth. During the period under review, there was a **threefold increase** in the number of domestic exporters (from 2.4 thousand to 6.7 thousand enterprises) and a twofold increase in the range of exports (from 1.9 thousand to 4.2 thousand product items), as well as **the geography of exports expanded from 85 to 116 countries (+31)**.

STRUCTURE OF COMMODITY EXPORTS OF THE REPUBLIC OF UZBEKISTAN FOR 2016-2023

(in millions of dollars)

Industry	Export in 2016	Export in 2023	Change	
			+/-	in %
Light industry	511	3 158	2 647	6,2 times
Food industry	608	1 879	1 271	3,1 times
Electrical industry	437	1 533	1 096	3,5 times
Mining industry	381	667	285	175 %
Construction materials industry	372	652	279	175 %
Automotive industry	39	635	595	16 times
Chemical industry	200	510	309	2,5 times
Oil and gas industry	340	442	102	130 %
Pharmaceutical industry	48	139	91	2,9 times

During the period 2016-2023, due to the measures implemented, there have been qualitative changes in the **structure of the commodity exports of the country**, in particular: the volume of light industry exports increased from **511 million** to **3.2 billion** US dollars (6.2 times);

food industry - from **608 million** to **1.9 billion** US dollars (3.1 times);

electrical industry - from **437 million** to **1.5 billion** US dollars (3.5 times);

construction materials industry - from **372 million** to **652 million** US dollars (1.8 times);

automotive industry - from **39 million** to **635 million** US dollars (16 times);

chemical industry - from **200 million** to **510 million** US dollars (2.5 times);

pharmaceutical industry – from **48 million** to **139 million** US dollars (2.9 times).

The catalog was prepared and published in accordance with the Resolution of the President of the Republic of Uzbekistan No PP-200 dated 30.05.2024 «On measures to organize an open dialogue between the President of the Republic of Uzbekistan and entrepreneurs» by the Chamber of Commerce and Industry of the Republic of Uzbekistan jointly with Uzbekekspertiza JSC. The information and data presented in this publication are provided by the authors.

THE REPUBLIC OF UZBEKISTAN

Location: Central part of the Central Asia in the interfluvium of the Amu Darya and Syr Darya.

Surrounded by land. Coordinates: 41-00 north, 64-00 east. *debt*.

Area: total — 448,900 km²; land — 425,400 km²; water — 22,000 km². The length of the republic's territory from west to east is 1,425 km, from north to south — 930 km.

Borders: total length — 6221 km. The length of the borders with Kazakhstan is 2203 km, Turkmenistan — 1621 km, Tajikistan — 1161 km, Kyrgyzstan — 1099 km, Afghanistan — 137 km.

Climate. The climate of Uzbekistan is sharply continental. The average temperature in January drops to –6 °C, and in July rises to +32 °C. The average annual rainfall on the plain is 120-200 mm, in mountainous areas — 1000 mm. The amount of precipitation is insignificant, so agriculture is more dependent on irrigation. The largest rivers are the Amu Darya and Syr Darya. The total length of the Amu Darya is 1,437 km, the Syr Darya is 2,137 km. There are several large artificial lakes in Uzbekistan, such as the Chardarya reservoir.

Natural resources. According to its natural and geographical conditions, Uzbekistan is one of the most promising regions in Central Asia. The country has a vast production and mineral resource potential, as well as unique agricultural raw materials and significant volumes of semi-finished products obtained during processing. Additionally, it has a well-developed infrastructure.

The current level of mineral exploration in Uzbekistan is associated with the exploration of rich deposits of precious metals, non-ferrous metals, rare metals, and all types of organic fuels, such as oil, natural gas, gas condensate, coal, oil shale, and uranium. Many types of raw materials for construction materials have also been identified. A wide range of minerals, including about 100 different types of mineral resources, have been identified, 60 of which are already being used in the country's economy.

In terms of proven reserves of minerals such as gold, uranium, copper, natural gas, tungsten, potassium salts, phosphorites, kaolins, Uzbekistan occupies leading places in the world, including the fourth place in the world in terms of gold reserves and the seventh place in terms of its production, tenth — eleventh place in terms of copper reserves; seventh – eighth place, and eleventh — twelfth place in terms of its production.

Investment climate. Uzbekistan has created a favourable investment climate, a broad system of legal guarantees and privileges for foreign investors, and has developed a comprehensive system of measures to stimulate the activities of enterprises with foreign investment.

Among the advantages that modern Uzbekistan offers to foreign companies are political and economic stability, favourable natural and climatic conditions, a favourable geographical location in the centre of the largest regional markets, a transport and logistics system integrated into the network of land and air communications of international importance, a diversified industrial base and scientific-intellectual and human resources potential.

Mining industry

Almalyk MMC JSC

Almalyk MMC JSC is one of the largest mining and metallurgical enterprises in the Republic of Uzbekistan. The production capacities of the plant are based on reserves of a group of copper porphyry, lead-zinc and gold-silver deposits located in the areas of Tashkent, Jizzak, Namangan and Surkhandarya regions of the Republic of Uzbekistan.

Copper wire rod

Quality parameters of products	KMO grade, 8 mm diameter
Production volume	more than 10 thousand tonnes
Certificate of Quality	O'z DST 2809^2013
Packaging	palletised coils
Application	for the manufacture of wire, contact wires, modern cable-conductor products

Copper pipes

Quality parameters of products	KMO grade, 8 mm diameter
Production volume	more than 10 thousand tonnes
Certificate of Quality	O'z DST 2809^2013
Packaging	palletised coils
Application	for the manufacture of wire, contact wires, modern cable-conductor products

The mechanical properties of the pipes shall comply with the following requirements:

Nominal outside diameter, mm	Form of delivery	Material condition	Temporal resistance σ_v , MPa (kgf/mm ²), not less than	Relative elongation δ_5 , %, not less than
3.0 to 19.0 incl.	in coils	flexible	210 (21)	36
3,0 to 44,0 incl.	in sections	seni-solid	240 (25)	11
3,0 to 44,0 incl.	in sections	solid	280 (29)	3

Copper wire

Quality parameters of products	MM grade, 1-4 mm diameter
Production volume	more than 2 thousand tonnes annually
Certificate of Quality	TSH 05755737-008: 2013
Packaging	cardboard packaging on pallets. Weight of a wire section is not less than 40 kg
Application	for the manufacture of cable and wire products, as well as for other electrotechnical purposes

Zinc oxide

Quality parameters of products	BC-1 grade
Production volume	more than 2 thousand tonnes annually
Certificate of Quality	GOST 202-84
Packaging	packaging of 25 kg in polypropylene bags with polyethylene liner
Application	for production of paint and varnish materials, asbestos products, artificial leather and sole rubbers

Zinc whitewash must meet the following requirements:

The name of the indicator	The standard
1. The mass fraction of zinc compounds (Zn), in terms of zinc oxide (ZnO) %, not less	99,5
2. The mass fraction of zinc compounds (Pb), in terms of zinc oxide (PbO) %, not less	0,010
3. Mass fraction of substances insoluble in hydrochloric acid, %, max	0,015
4. Mass fraction of water-soluble substances, %, no more	0,15
5. Mass loss during calcination, %, no more	0,3
6. Residue on the sieve with mesh No. 0063, %, no more	0,1
7. Coverage, g/m2, %, no more	130
8. Whiteness, conventional units, at least	95

State Enterprise

Navoi Mining and Metallurgical Combine

The production and economic activities of the State Enterprise Navoi Mining and Metallurgical Combine (NMMC) are aimed at ensuring sustainable growth of the economic potential and social stability of the Republic of Uzbekistan by further improving the efficiency of the use of mineral resources, increasing the volume of highly liquid products and intensive development of new types of production.

Being a multidisciplinary mining processing enterprise, the plant produces several dozen products.

The plant's export-oriented products include uranium, ammonium perrenate, gold jewelry, and machine tool products. Also, the plant is developing deposits of phosphorites, quartz sand, limestone, etc.

Production of ammonium perrenate

NMMC produces ammonium perrenate (NH_4ReO_4) of the AR-0 brand, corresponding to GOST 31411-2009. Ammonium perrenate is used for the manufacture of electronic devices, in aviation and space technology, as well as in oil cracking.

Technical characteristics of ammonium perrenate produced by NMMC:

Rhenium concentration in ammonium perrenate, min. 69.1%

Impurity	Standard concentration of impurities, not more:
Phosphorus (P), %	$1 \cdot 10^{-3}$
Sulphur (S), %	$2 \cdot 10^{-3}$
Iron (Fe), %	$5 \cdot 10^{-4}$
Silicon (Si), %	$1 \cdot 10^{-3}$
Manganese (Mn), %	$1 \cdot 10^{-4}$
Magnesium (Mg), %	$2 \cdot 10^{-4}$
Nickel (Ni), %	$2 \cdot 10^{-4}$
Aluminium (A), %	$5 \cdot 10^{-4}$
Molybdenum (Mo), %	$5 \cdot 10^{-4}$
Calcium (Ca), %	$1 \cdot 10^{-3}$
Copper (C), %	$1 \cdot 10^{-4}$
Potassium (K), %	$5 \cdot 10^{-3}$
Sodium (Na), %	$1 \cdot 10^{-3}$
Mass fraction of moisture	Not subject to standard

Production of jewellery

NMMC has the ability to supply jewelry made of 585 and 750 gold samples. All products of the NMMC jewelry factory are manufactured using imported equipment from Italy, Canada, England and Switzerland. The organization of the jewelry factory meets the requirements of the international standard «ISO 9001: 2000», which is confirmed by the certificate of the Quality Management System.

The main types of products are chains, bracelets and wedding rings.

Production Association
Navoi Machine-Building Plant

PA NMBP is a structural subdivision of NMMC with more than 3,000 employees. The plant repairs and manufactures various spare parts for mining, crushing and milling equipment, non-standard equipment, and also produces metalworking machines.

Turning and Screw-Cutting Machines Of The «1M63H-163H» Models

The machines of the 1M63N and 163N models are designed to perform a variety of turning operations, as well as threading (metric, inch, modular and pitch), have modern technical characteristics that ensure the processing of parts with progressive cutting modes, as well as sufficient rigidity and vibration resistance, are highly mechanized, easy to operate. The machines use a three-support spindle assembly with double row roller bearings, which ensures high precision of the machines. The mechanical feeding of the upper caliper allows for productive processing of both short cones and long ones by the method of differential addition of feeds. The lunettes provide machining of parts in a wide range of diameters and are additionally equipped with interchangeable rollers. Modifications of the machine with a distance between centers (RMC) of 1500 mm, 3000 mm are available.

Main Technical Characteristics Of 1M63N (163N)

The largest diameter of the installed product above the bed, mm	680 (840)
The largest diameter of the workpiece above the bed, mm	630
The largest diameter of the workpiece above the carriage, mm	350
The largest length of the workpiece in the centers, mm (with a center-to-center distance of 1500 mm; 3000 mm)	1500; 3000
Spindle end according to GOST 12593-93	8
Center in the spindle with a Morse taper	6
Center in the quill with a Morse taper	6
Diameter of the cylindrical hole in the spindle, mm	70
Spindle speed range, rpm	10...1250
Number of spindle speed steps, forward (reverse) rotation	22 (11)
The largest mass of the workpiece in the centers, kg	2200
Limits of working feeds, mm/rev longitudinal, Z-axis transverse, X-axis	0,064...1,025 0,026...0,378
Speed of rapid movements of the carriage, mm/min, (longitudinal, Z-axis; transverse, X-axis)	4500; 1600
Main drive power, kW	15
Machine width and height, mm	1780/1550 (1860/1625)
Machine length, mm with RMC 1500 mm: 163N-1.5; 1M63N-1.5.	3740 ; 5240
Machine weight, kg, no more with RMC 1500 mm; with RMC 3000 mm	4840 (4800); 5750 (5700)

Double-sided Stripping and grinding Machine Model «3H340»

The double-sided stripping and grinding machine is designed for sharpening cutters up to 100 mm high, sharpening drills with diameters from 6 to 60 mm, sharpening locksmith tools and performing locksmith work (deburring, chamfering, etc.).

Main Technical Characteristics

Grinding wheels, mm	PP400x40x203 (PP400x40x127)
Number of grinding wheels, pcs	2
Height of grinding wheel centres from the floor, mm, at least	900
Distance between grinding wheels, mm	710
Circular speed, m/s	30
AC supply network parameters: - voltage, V/frequency, Hz	80/50
Electric motor: - power, kW / rotational speed, rpm - - power, kW / rotational speed, rpm	3/1500
Overall dimensions of the machine, mm	930x640x1300
Machine weight, not more, kg	350

Special Desktop Drilling Machine Model «21H16»

The special desktop drilling machine is designed for drilling holes up to 16 mm in the conditions of repair production and mechanization of drilling operations during the manufacture and repair of various equipment in factory conditions and at mobile repair stations.

Main Technical Characteristics

The largest drilling diameter in steel is 45 GOST 1050, mm	16
Maximum spindle stroke, mm	100
Distance from the lower end of the spindle to the plate, mm (largest/smallest)	410/110
Spindle cone according to GOST 25557-82 -Morse	2
The greatest feeding force (with a force on the handle of 80N), N	700
Spindle speed, rpm	500, 900, 1500, 2700, 4000
Supply voltage, V	380
Electric motor power, kW	1,1 (0,75)
The speed of the electric motor, vol/ mines	1420 (1365)
Dimensions of the working surface of the table, mm	320x360
Overall dimensions of the machine, mm (length/ width/height, with the headstock lowered)	800 x 465 x 860
(730 x 360 x 748)	
Machine weight, not more than, kg	160 (100)

Universal Turning Machine with CNC System Model «HT-250M»

The universal turning machine with an electronic control system is designed for turning parts such as bodies of rotation with a stepped, conical and spherical profile. Advanced functions of the universal machine.

The presence of a mode for maintaining a constant cutting speed during end turning. Automatic processing cycle of up to 99 programmable frames.

Main Technical Characteristics

The largest diameter of the product to be installed above the bed, mm	500
The largest diameter of the processed product above the caliper, mm	210
The maximum length of the product to be installed in the centers, mm	1000
The maximum length of the product processing in the centers, mm	905
The center in the spindle with a Morse cone according to GOST 13214-79	6
Pinoli center with a Morse cone according to GOST 13214-79	5
Spindle speed range, rpm	2...2500
The range of reverse feed and thread pitch (stepless adjustment), mm/rev	0...300
The discreteness of setting the displacements, mm (longitudinal, Z-axis; transverse, X-axis)	0,001; 0,001
High speed, mm/min, not less	4500; 4500
The power of the electric motor of the main movement, kW, not less	7,0
Overall dimensions of the machine, mm (length/width/height)	3320x1500x1620
Machine weight, kg, no more	3100

Vertical Milling and Boring Machine Model NF630M-03

The vertical milling and boring machine with numerical control (CNC) is designed for complex processing by milling, drilling, boring and threading of parts, including body and base ones, made of ferrous, non-ferrous metals and some types of plastics.

Main Technical Characteristics

Dimensions of the working surface of the table, mm (length / width)	800/500
The largest dimensions of the processed product, mm	800x500x500
The largest mass of the processed product, kg	500
The smallest distance from the end of the spindle to the table mirror, mm	180
The largest movement of the table along the X axis, mm	630
The largest movement of the carriage with the processed product with the table along the Y axis, mm	400
The largest movement of the spindle headstock with the tool along the Z axis, mm	500
Feed range, mm/min (in coordinates - X; - Y; - Z)	1-4000
Positioning accuracy, mm	0,01
Positioning stability, mm	0,01
Main engine power, kW, not less	7,5
The highest torque on the spindle, N·m	350
Spindle speed range with stepless control, rpm	80-3550
Total power, kW	40
Overall dimensions of the machine, mm (length/width/ height)	2900 x 3150 x 3500
Machine weight, not more than, kg	6700
Spindle conade with cone according to GOST 24644	50

Uzbek Metallurgical Combine JSC

Uzmetkombinat JSC is the firstborn of ferrous metallurgy in Central Asia, its history begins in 1944.

The plant is the oldest enterprise in the Republic of Uzbekistan for the production of long products for the construction industry, grinding balls for mining enterprises, strips of copper and its alloys for the automotive and electrical industries, steel enameled tableware for consumer goods, basalt-based thermal insulation materials for the construction industry of the Republic.

The Uzbek Metallurgical Plant, through the merger of the Shirinsky Machine-Building Plant and the Self-financing Management of the Vtorchermet enterprises, was transformed into the Uzbek Metallurgical Combine Joint-Stock Company.

Structure of Uzmetkombinat JSC

Uzmetkombinat has the following structure:

Steelmaking production, consisting of a Copper and Electric steelmaking workshops

Rolling production, consisting of two long-range rolling workshops and one Steel-wire workshop, providing the production of long-range rolled metal, general-purpose steel wire and grinding balls

Production of non-ferrous metals, providing the production of brass and copper strips, with a design capacity of 3 thousand tons per year

Production of consumer goods, producing enameled steel tableware in the amount of 2 thousand tons, welding electrodes and metal products in the amount of 1.2 thousand tons per year

Production of thermal insulation materials, providing the production of basalt-based thermal insulation materials (mineral wool, mats, plates) in the amount of 10.0 thousand tons per year

Structural divisions of the services of the chief mechanic and chief power engineer, ensuring the functioning of the plant's infrastructure, the production of argon, nitrogen, oxygen and spare parts

Automobile industry and motor vehicle construction

UzAuto

Uzavtosanoat Joint Stock Company

Uzavtosanoat JSC (UzAuto), established on the initiative and under the leadership of the first President of the Republic of Uzbekistan Islam Karimov, over the years of independence has become a symbol of creative potential of our economy. The strategy of moving forward, based on the establishment of equal and mutually beneficial relations with reputable companies, is aimed at producing competitive products at the level of world standards.

ISUZU

UZAVTOSANOAT JSC

Address: 13, Amir Temur str., Tashkent, Republic of Uzbekistan, 100047

Phone: +99871 140-76-50, +99871 140-76-66

Fax: +99871 232-34-34

SamAvto LLC

Samarkand Automobile Plant started its activity in 1999. In 2007, the Japanese company ISUZU Motors joined the founders of the plant. The plant specialises in the production of commercial vehicles (buses and trucks). Modern engineering developments combined with the use of high quality durable steels of the latest generation, main units from leading world brands, high quality component parts and high quality of assembly allow SamAvto LLC products to occupy a worthy place in the market of Uzbekistan and CIS countries.

Founders:

58% - «Uzavtosanoat» JSC (Uzbekistan); 26% - «Asaka» SJSCB (Uzbekistan),
8% - Itochu Corporation (Japan);
8% - «Isuzu Motors» (Japan).

Plant:

Production capacity of 4,000 units per year.

Address:

140160, Republic of Uzbekistan, Samarkand, S.Buhoriy str. 5.

Products:

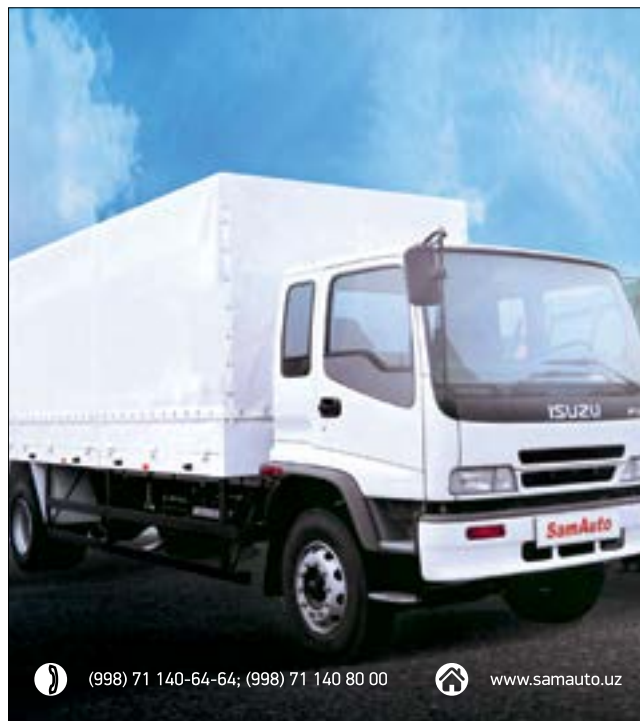

Urban and suburban buses of category M3, lorries of category N2 and N3, special vehicles of category N2 and N3

Staff:

More than 980 employees.

International certificates:

ISO 9001: 2015; ISO 14001: 2015;
OHSAS 18001: 2007

Low-floor city bus SAZ LE 60

Technical characteristics

Vehicle category	M3
Overall dimensions of the bus, mm	8065x2470x2750
Permissible mass, kg	10200
Body type	Monococque
Permissible load on the front axle	3700
Permissible load on the rear axle	6500
Wheel arrangement/drive wheels	4x2 / rear
Passenger capacity, pers	56
Number of passenger/crew seating places	25/1
Bus base, mm	4540
Front wheel track, mm	2089
Rear wheel track, mm	1648/2162
Engine	ISUZU 4HK1-TCC
Number and arrangement of cylinders	4 in a row
Working volume, cm	5193
Maximum power, kW/hp	140/190 (2600)
Maximum torque, Nm	510 (1600)
Variable gearbox	Allison 2100
Number of gears / type	5/ automatic
Service brake system	Disk with vacuum amplification
Availability of ABS	EBS
Fuel type / tank fuel capacity, litres	Diesel/140
Fuel consumption, litres per 100 km.	25 ± 2

Intercity bus SAZ HD 50

Technical characteristics

Vehicle category	M3
Overall dimensions of the bus, mm	7995x2320x2820
Permissible mass, kg	9500
Body type	Frame
Permissible load on the front axle	3100
Permissible load on the rear axle	6400
Wheel arrangement/drive wheels	4x2 / rear
Passenger capacity, pers	45
Number of passenger/crew seating places	29/2
Bus base, mm	4475
Front wheel track, mm	1869
Rear wheel track, mm	1650/2260
Engine	ISUZU 4HK1-TCN
Number and arrangement of cylinders	4 in a row
Working volume, cm	5193
Maximum power, kW/hp	114/155 (2600)
Maximum torque, Nm	419 (1800)
Variable gearbox	MY6S
Number of gears / type	6 / Automatic
Service brake system	A drum with a vacuum amplifier.
Availability of ABS	EBS
Fuel type / tank fuel capacity, litres	Diesel 150 + 10
Fuel consumption, litres per 100 km.	21 ± 2

Class I bus SAZ HC 40

Technical characteristics

Vehicle category	M3
Wheel arrangement/driving wheels	Rear
Passenger capacity, pers	38
Overall dimensions of the bus, mm	6920x2240x2880
Wheelbase, mm	3815
Curb weight of the bus, kg	4250
Gross weight, kg	7000
Engine location	Front, spacer
Engine	ISUZU 4HF1 four-stroke diesel engine
Number and arrangement of cylinders	4 in a row
Compression ratio	19: 1
Working volume, cc	4334
Maximum power, kW/hp	78/104 (3200)
Maximum torque, Nm	268 (1800)
Fuel type/tank fuel capacity, litres	Diesel/100
Maximum speed of bus	90
Maximum torque, Nm	510 (1600)
Variable gearbox	Allison 2100
Number of gears / type	5 / automatic
Service brake system	Disc with vacuum booster.
Availability of ABS	EBS
Fuel type / tank fuel capacity, litres	Diesel/140
Fuel consumption, litres per 100 km.	25 ± 2

Class II bus SAZ NP 26

Technical characteristics

Vehicle category	M3
Wheel arrangement/driving wheels	Rear
Passenger capacity, persons	26
Number of seats	
- passengers	24
- crew	2
Overall dimensions of the bus (L/W/H), mm	6920/2250/2880
Wheelbase, mm	3815
Curb weight of the bus, kg	U 350
Gross weight, kg	6 500
Engine location	front, longitudinal
Engine	'ISUZU 4HF1' four-stroke diesel engine.
- number and arrangement of cylinders	4 in a row
- compression ratio	19: 1
- displacement, cc	A 334
- maximum power, kW/hp.	78/1 OD (3200 rpm)
- maximum torque, Nm	268(1800 rpm)
Fuel type	diesel
Fuel tank capacity, litres	100
Maximum speed of the bus, not less than, km/h	90
Availability of ABS	EBS
Fuel type / tank fuel capacity, litres	Diesel/150+10
Fuel consumption, litres per 100 km.	21 ± 2

Flatbed with frame-tent platform on the basis of 'ISUZU' chassis NQR71PL

Technical characteristics

Overall dimensions of the vehicle (L/W/B), mm	6730x2300x3098
Internal dimensions of the body, mm	4860x2160x1950
Carrying capacity of the vehicle, kg	4 400
Vehicle category	N2
Engine	ISUZU 4HG1* four-stroke turbocharged diesel engine
- number and arrangement of cylinders	4 in row
- compression ratio	19: 1
- displacement, cc	4 554
- maximum power, kW/hp.	89/121 (3200 rpm)
- maximum torque, Nm	304(1800 rpm)
Wheel configuration/driving wheels	4x2 rear
Wheelbase, mm	3815
Front/rear wheel track, mm	1670/1390/1900
Suspension	leaf semi-elliptic leaf springs, shock absorbers (double-acting hydraulic telescopic)
Stabilisers	front and rear axle stabilisers
Clutch	'ISUZU' dry, single disc
GEARBOX	MY5T
Steering	power-assisted
Braking system	drum, with hydraulic 2-circuit drive with independent axle separation with hydraulic booster
Availability of anti-lock braking system	available
Fuel	diesel
Fuel tank capacity, litres	100

Closed metal van on the basis of 'ISUZU' NQR71PL

Technical characteristics

The following modifications are possible: 1) isothermal; 2) refrigerator (from +5 to -5° C; from +5 to -18° C)	
Overall dimensions of the vehicle (L/W/B), mm	6730x2210x3098
Internal dimensions of the body, mm	4860x2160x1950
Carrying capacity of the vehicle, kg	4 150
Vehicle category	N2
Engine	ISUZU 4HG1* four-stroke turbocharged diesel engine
- number and arrangement of cylinders	4 in row
- compression ratio	19: 1
- displacement, cc	4 554
- maximum power, kW/hp.	89/121 (3200 rpm)
- maximum torque, Nm	304(1800 rpm)
Wheel configuration/driving wheels	4x2 / rear
Wheelbase, mm	3815
Front/rear wheel track, mm	1670/1390/1900
Suspension	leaf semi-elliptic leaf springs, shock absorbers (double-acting hydraulic telescopic)
Stabilisers	front and rear axle stabilisers
Clutch	'ISUZU' dry, single disc
GEARBOX	MY5T
Steering	power-assisted
Braking system	drum, with hydraulic 2-circuit drive with independent axle separation with hydraulic booster
Availability of anti-lock braking system	available
Fuel	diesel
Fuel tank capacity, litres	100

Dump truck on the base of 'ISUZU' NQR71PL

Technical characteristics

Overall dimensions of the vehicle (L/W/B), mm	6214x2150x2454
Internal dimensions of the body, mm	3820x1870x470
Carrying capacity of the vehicle, kg	4 000
Vehicle body volume, m³	3
Vehicle category	N2
Engine	ISUZU 4HG1* four-stroke turbocharged diesel engine
- number and arrangement of cylinders	4 in row
- compression ratio	19: 1
- displacement, cc	4 554
- maximum power, kW/hp.	89/121 (3200 rpm)
- maximum torque, Nm	304(1800 rpm)
Wheel configuration/driving wheels	4x2 / rear
Wheelbase, mm	3815
Front/rear wheel track, mm	1670/1390/1900
Suspension	leaf semi-elliptic leaf springs, shock absorbers (double-acting hydraulic telescopic shock absorbers)
Stabilisers	front and rear axle stabilisers
Clutch	'ISUZU' dry, single disc
GEARBOX	MY5T
Steering	power-assisted
Braking system	drum, with hydraulic 2-circuit drive with independent axle separation with hydraulic booster
Availability of anti-lock braking system	available
Fuel	diesel
Fuel tank capacity, litres	100

Rubbish truck on the base of 'ISUZU' NQR71PL

Technical characteristics

Overall dimensions of the vehicle (L/W/B), mm	7130x2240x2700
Gross weight, kg	8000
Carrying capacity of the vehicle, kg	2020
Vehicle body volume, m³	7
Vehicle category	N2
Engine	ISUZU 4HG1* four-stroke turbocharged diesel engine
- number and arrangement of cylinders	4 in row
- compression ratio	19: 1
- displacement, cc	4 554
- maximum power, kW/hp.	89/121 (3200 rpm)
- maximum torque, Nm	304(1800 rpm)
Wheel configuration/driving wheels	4x2 / rear
Wheelbase, mm	3815
Front/rear wheel track, mm	1670/1390/1900
Suspension	leaf semi-elliptic leaf springs, shock absorbers (double-acting hydraulic telescopic shock absorbers)
Stabilisers	front and rear axle stabilisers
Clutch	'ISUZU' dry, single disc
GEARBOX	MY5T
Steering	With hydraulic 2-circuit drive with independent axle separation with hydraulic booster
Braking system	Drum, with vacuum booster
Fuel type/tank fuel capacity, litres	Diesel/75
Braking system	Drum, with vacuum booster
Fuel type/tank fuel capacity, litres	Diesel/75

Water carrier on the basis of 'ISUZU' chassis NQR71PL

Technical characteristics

Overall dimensions of the vehicle (L/W/B), mm	6730x2180x2560
Gross weight, kg	4170
Tank volume, m³	4
Vehicle category	N2
Engine	ISUZU 4HG1* four-stroke turbocharged diesel engine
- number and arrangement of cylinders	4 in row
- compression ratio	19: 1
- displacement, cc	4 554
- maximum power, kW/hp.	89/121 (3200 rpm)
- maximum torque, Nm	304(1800 rpm)
Wheel configuration/driving wheels	4x2 / rear
Wheelbase, mm	3815
Front/rear wheel track, mm	1670/1390/1900
Suspension	leaf semi-elliptic leaf springs, shock absorbers (double-acting hydraulic telescopic shock absorbers)
Stabilisers	front and rear axle stabilisers
Clutch	'ISUZU' dry, single disc
GEARBOX	MYYST
Steering	power-assisted
Braking system	drum, with hydraulic 2-circuit drive with independent axle separation with hydraulic booster
Availability of anti-lock braking system	available
Fuel	diesel
Fuel tank capacity, litres	100

Truck with slurry tanker 'ISUZU' NQR71PL

Technical characteristics

Overall dimensions of the vehicle (L/W/B), mm	6220x2180x2560
Gross weight, kg	8000
Tank capacity, at least, litres	4000
Depth of the pit to be cleaned, at least, m	5
Vehicle category	N2
Engine	ISUZU 4HG1* four-stroke turbocharged diesel engine
- number and arrangement of cylinders	4 in row
- compression ratio	19: 1
- displacement, cc	4 554
- maximum power, kW/hp.	89/121 (3200 rpm)
- maximum torque, Nm	304(1800 rpm)
Wheel configuration/driving wheels	4x2 / rear
Wheelbase, mm	3815
Front/rear wheel track, mm	1670/1390/1900
Suspension	leaf semi-elliptic leaf springs, shock absorbers (double-acting hydraulic telescopic shock absorbers)
Stabilisers	front and rear axle stabilisers
Clutch	'ISUZU' dry, single disc
GEARBOX	MYYST
Steering	power-assisted
Braking system	drum, with hydraulic 2-circuit drive with independent axle separation with hydraulic booster
Availability of anti-lock braking system	available
Fuel	diesel
Fuel tank capacity, litres	100

Watering machine on the basis of 'ISUZU' chassis NQR71PL

Technical characteristics

Overall dimensions of the vehicle (L/W/B), mm	6214x2150x2454
Gross weight, kg	8000
Tank capacity, at least, litres	4000
Cleaning strip, m	18
Vehicle category	N2
Engine	ISUZU 4HG1* four-stroke turbocharged diesel engine
- number and arrangement of cylinders	4 in row
- compression ratio	19: 1
- displacement, cc	4 554
- maximum power, kW/hp.	89/121 (3200 rpm)
- maximum torque, Nm	304(1800 rpm)
Wheel configuration/driving wheels	4x2 / rear
Wheelbase, mm	3815
Front/rear wheel track, mm	1670/1390/1900
Suspension	leaf semi-elliptic leaf springs, shock absorbers (double-acting hydraulic telescopic shock absorbers)
Stabilisers	front and rear axle stabilisers
Clutch	'ISUZU' dry, single disc
GEARBOX	MY5T
Steering	power-assisted
Braking system	drum, with hydraulic 2-circuit drive with independent axle separation with hydraulic booster
Availability of anti-lock braking system	available
Fuel	diesel
Fuel tank capacity, litres	100

First aid fire truck on the basis of 'ISUZU' chassis NQR71PL

Technical characteristics

Overall dimensions of the vehicle (L/W/B), mm	6870x2150x2750
Water tank capacity, l	1700
Capacity of the tank for foaming agent, litres	150
Fire pump model	Zeigler FPH 40-250-3L
Vehicle category	N2
Engine	ISUZU 4HG1* four-stroke turbocharged diesel engine
- number and arrangement of cylinders	4 in row
- compression ratio	19: 1
- displacement, cc	4 554
- maximum power, kW/hp.	89/121 (3200 rpm)
- maximum torque, Nm	304(1800 rpm)
Wheel configuration/driving wheels	4x2 / rear
Wheelbase, mm	3815
Front/rear wheel track, mm	1670/1390/1900
Suspension	leaf semi-elliptic leaf springs, shock absorbers (double-acting hydraulic telescopic shock absorbers)
Stabilisers	front and rear axle stabilisers
Clutch	'ISUZU' dry, single disc
GEARBOX	MY5T
Steering	power-assisted
Braking system	Drum, with vacuum booster
Fuel type/tank fuel capacity, litres	Diesel/75
Braking system	Drum, with vacuum booster
Fuel type/tank fuel capacity, litres	Diesel/75

Telescopic tower 'ISUZU' NQR71PL

Technical characteristics

Overall dimensions of the vehicle (L/W/B), mm	7580x2400x3430
Gross vehicle weight, kg	8000
Cradle load capacity, kg	180
Lifting height, m	18
Vehicle category	N2
Engine	ISUZU 4HG1* four-stroke turbocharged diesel engine
- number and arrangement of cylinders	4 in row
- compression ratio	19: 1
- displacement, cc	4 554
- maximum power, kW/hp.	89/121 (3200 rpm)
- maximum torque, Nm	304(1800 rpm)
Wheel configuration/driving wheels	4x2 / rear
Wheelbase, mm	3815
Front/rear wheel track, mm	1670/1390/1900
Suspension	leaf semi-elliptic leaf springs, shock absorbers (double-acting hydraulic telescopic shock absorbers)
Stabilisers	front and rear axle stabilisers
Clutch	'ISUZU' dry, single disc
GEARBOX	MYY5T
Steering	power-assisted
Braking system	Drum, with vacuum booster
Availability of anti-lock braking system	available
Fuel	diesel
Fuel tank capacity, litres	100

Flatbed with frame-tent platform 'ISUZU' FVR33P

Technical characteristics

Overall dimensions (L/W/H), mm	9330x2500x3470
Cargo capacity of the vehicle, kg	7500
Internal dimensions of the body, mm	6900x2415x2000
Vehicle category	N3
Wheelbase, mm	5550
Permissible load on front/rear axle, kg	6300/10500
Front/rear wheel track, mm	1990/1525/2195
Engine	ISUZU 6H1-S' four-stroke diesel engine
- displacement, cc	8226
- maximum power, kW/hp.	147/200 (2850 rpm)
- maximum torque, Nm	500 (1700 rpm)
Wheel configuration/driving wheels	4x2 / rear
Suspension	leaf semi-elliptic leaf springs, shock absorbers (double-acting hydraulic telescopic shock absorbers)
Clutch	'ISUZU' dry, single disc
GEARBOX	MLD6A
Steering	power-assisted
Braking system	pneumatic, 2-circuit, drum brakes on all wheels
Availability of anti-lock braking system	not available
Fuel	diesel
Fuel tank capacity, litres	100

Truck with van body 'ISUZU' FVR33P

Technical characteristics

Overall dimensions (L/W/H), mm	9360x2500x3420
Cargo capacity of the vehicle, kg	7 560
Internal dimensions of the body, mm	6900x2415x2000
Vehicle category	N3
Wheelbase, mm	5 550
Permissible load on front/rear axle, kg	6 300/10 500
Front/rear wheel track, mm	1 970/1 530/2 195
Engine	ISUZU 6H1-S' four-stroke diesel engine
- displacement, cc	8226
- maximum power, kW/hp.	147/200 (2850 rpm)
- maximum torque, Nm	500 (1700 rpm)
Wheel configuration/driving wheels	4x2 / rear
Suspension	leaf semi-elliptic leaf springs, shock absorbers (double-acting hydraulic telescopic shock absorbers)
Clutch	'ISUZU' dry, single disc
GEARBOX	MLD6A
Steering	power-assisted
Braking system	pneumatic, 2-circuit, drum brakes on all wheels
Availability of anti-lock braking system	not available
Fuel	diesel
Fuel tank capacity, litres	200

Dump truck on the basis of 'ISUZU' chassis FVR33G

Technical characteristics

Overall dimensions (L/W/H), mm	6500x2490x2950
Cargo capacity of the vehicle, kg	8 000
Internal dimensions of the body, mm	4192x2204x670
Vehicle category	N3
Wheelbase, mm	5 550
Permissible load on front/rear axle, kg	6 300/10 500
Front/rear wheel track, mm	1 990/1 525/2 180
Engine	ISUZU 6H1-S' four-stroke diesel engine
- displacement, cc	8226
- maximum power, kW/hp.	147/200 (2850 rpm)
- maximum torque, Nm	500 (1700 rpm)
Wheel configuration/driving wheels	4x2 / rear
Suspension	leaf semi-elliptic leaf springs, shock absorbers (double-acting hydraulic telescopic shock absorbers)
Clutch	'ISUZU' dry, single disc
GEARBOX	MLD6A
Steering	power-assisted
Braking system	pneumatic, 2-circuit, drum brakes on all wheels
Availability of anti-lock braking system	not available
Fuel	diesel
Fuel tank capacity, litres	200

First aid fire fighting vehicle «ISUZU» FVR33H and «ISUZU» FVR23K

Technical characteristics

Overall dimensions (L/W/H), mm	7780x2500x3050	8400x2500x3160
Water tank capacity, l	4000	5300
Foam tank capacity, litres	400	340
Vehicle category	N3	N3
Fire pump model	Zeigler FPH 40-250-3L	Zeigler FPH 10-3000-2H
Permissible load on front/rear axle, kg	4000/11500	6300/13000
Wheelbase, mm	4250	4650
Engine	ISUZU 6H1-S' four-stroke diesel engine	ISUZU 6SD1' four-stroke diesel engine
- displacement, cc	8226	9839
- maximum power, kW/hp.	147/200 (2850 rpm)	177/240 (2500)
Wheel configuration/driving wheels	4x2 / rear	
Suspension	leaf semi-elliptic leaf springs, shock absorbers (double-acting hydraulic telescopic shock absorbers)	
Clutch	'ISUZU' dry, single disc	
GEARBOX	MLD6A	MLD6S
Steering	power-assisted	
Braking system	pneumatic, 2-circuit, drum brakes on all wheels	
Availability of anti-lock braking system	not available	
Fuel	diesel	
Fuel tank capacity, litres	200	

Truck «ISUZU» FVR33G for urban municipal services

Technical characteristics

Overall dimensions (L/W/H), mm	8025x2900x2960
Tank capacity, m³	7,4
Width of the processed strip, m	до 8/до 18
Vehicle category	N3
Wheelbase, mm	5 550
Permissible load on front/rear axle, kg	6 300/10 500
Front/rear wheel track, mm	1 990/1 525/2 180
Engine	ISUZU 6H1-S' four-stroke diesel engine
- displacement, cc	8226
- maximum power, kW/hp.	147/200 (2850 rpm)
- maximum torque, Nm	500(1700 rpm)
Wheel arrangement/driving wheels	4x2 / rear
Suspension	leaf semi-elliptic leaf springs, shock absorbers (double-acting hydraulic telescopic shock absorbers)
Clutch	'ISUZU' dry, single disc
GEARBOX	MLD6A
Steering	power-assisted
Brake system	pneumatic, 2-circuit, drum brakes on all wheels
Availability of anti-lock braking system	not available
Fuel	diesel
Fuel tank capacity, litres	200

Specialised vehicle 'ISUZU' FVR33P with a body of a rubbish truck

Technical characteristics

Overall dimensions (L/W/H), mm	8100x2450x3250
Body volume, m ³	10
Carrying capacity of the vehicle, kg	6250
Vehicle category	N3
Wheelbase, mm	5 550
Permissible load on front/rear axle, kg	6300/10500
Front/rear wheel track, mm	1990/1855
Engine	ISUZU 6H1-S' four-stroke diesel engine
- displacement, cc	8226
- maximum power, kW/hp.	147/200 (2850 rpm)
- maximum torque, Nm	500(1700 rpm)
Wheel arrangement/driving wheels	4x2 / rear
Suspension	leaf semi-elliptic leaf springs, shock absorbers (double-acting hydraulic telescopic shock absorbers)
Clutch	'ISUZU' dry, single disc
GEARBOX	MLD6A
Steering	power-assisted
Brake system	pneumatic, 2-circuit, drum brakes on all wheels
Availability of anti-lock braking system	not available
Fuel	diesel
Fuel tank capacity, litres	200

Specialised vehicle 'ISUZU' NPR82 (CNG) rubbish truck

Technical characteristics

Overall dimensions (L/W/H), mm	7300/2240/2840
Gross weight, kg	7 500
Cargo capacity, kg	1 140
Body volume, m ³	7
Vehicle category	N2
Engine	'ISUZU 4HVT' four-stroke with spark ignition.
- compression ratio	10: 1
- displacement, cc	4 570
- maximum power, kW/hp.	96/130 (3200 rpm)
Wheel configuration/driving wheels	4x2 rear
Wheelbase, mm	3 845
Front/rear (inside/outside) wheel track, mm	1665/1395/1910
Suspension	leaf semi-elliptic leaf springs, shock absorbers (double-acting hydraulic telescopic shock absorbers)
Clutch	'ISUZU' dry, single disc with hydraulic control
GEARBOX	MY6S
Steering	power-assisted
Braking system	drum, with hydraulic 2-circuit drive with independent axle separation with hydraulic booster
Anti-lock braking system system	available
Fuel	compressed natural gas - methane
Number of cylinders, pcs	2
Capacity of one cylinder, litres	150
Total capacity, m ³	60

Flatbed with frame-tent platform on the basis of chassis 'ISUZU' NPR82

Technical characteristics

Overall dimensions (L/W/H), mm	6795/2300/3000
Gross weight, kg	7 500
Cargo capacity, kg	3 550
Body volume, m³	7
Vehicle category	N2
Engine	'ISUZU 4HVT' four-stroke with spark ignition.
- compression ratio	10: 1
- displacement, cc	4 570
- maximum power, kW/hp.	96/130 (3200 rpm)
Wheel configuration/driving wheels	4x2 rear
Wheelbase, mm	3 845
Front/rear (inside/outside) wheel track, mm	1665/1395/1910
Suspension	leaf semi-elliptic leaf springs, shock absorbers (double-acting hydraulic telescopic shock absorbers)
Clutch	'ISUZU' dry, single disc with hydraulic control
GEARBOX	MY6S
Steering	power-assisted
Braking system	drum, with hydraulic 2-circuit drive with independent axle separation with hydraulic booster
Anti-lock braking system system	available
Fuel	compressed natural gas - methane
Number of cylinders, pcs	2
Capacity of one cylinder, litres	150
Total capacity, m³	60

Truck with van body 'ISUZU' NPR82 (CNG)

Technical characteristics

Overall dimensions (L/W/H), mm	6775/2235/3000
Gross weight, kg	7 500
Cargo capacity, kg	3 550
Vehicle category	N2
Engine	'ISUZU 4HVT' four-stroke with spark ignition.
- compression ratio	10: 1
- displacement, cc	4 570
- maximum power, kW/hp.	96/130 (3200 rpm)
Wheel configuration/driving wheels	4x2 rear
Wheelbase, mm	3 845
Front/rear (inside/outside) wheel track, mm	1665/1395/1910
Suspension	leaf semi-elliptic leaf springs, shock absorbers (double-acting hydraulic telescopic shock absorbers)
Clutch	'ISUZU' dry, single disc with hydraulic control
GEARBOX	MY6S
Steering	power-assisted
Braking system	drum, with hydraulic 2-circuit drive with independent axle separation with hydraulic booster
Anti-lock braking system system	available
Fuel	compressed natural gas - methane
Number of cylinders, pcs	2
Capacity of one cylinder, litres	150
Total capacity, m³	60

JV MAN Auto-Uzbekistan LLC

JV MAN Auto-Uzbekistan LLC is a successful joint venture established in 2009 and is one of the top priorities in the automotive industry of Uzbekistan. The company's main focus is on the production, sale, export, and after-sales services of MAN commercial trucks.

Founders:

51% - Uzavtosanoat JSC (Uzbekistan);
49% - MAN Truck & Bus AG (Germany)

Factory:

The production capacity is 4,000 units per year.

Address:

140400, Republic of Uzbekistan, Samarkand,
Dzhambay district, Tashkent str., 2.
Head office: 100007, Republic of Uzbekistan,
Tashkent, Mirzo-Ulugbek str., 30.

Products:

Trucks and chassis with a gross weight of more than
16 tons, truck tractors, dump trucks, semi-trailers,
cranes and special equipment.

Staff:

More than 300 people.

Quality certificates:

ISO 9001: 2008
ISO 9001: 2015

(998) 71 148-80-80

www.man.uz

Truck tractor MAN TGS 33.480 6x4 BBS Maxiton ITM

Technical characteristics

Engine	D2676LF02, 4-stroke diesel engine
Power	480 hp / 353 kW at 1700 ÷ 1900 rpm
Torque	2300 N m at 1000 ÷ 1400 rpm
Number of cylinders	6-cylinder in-line
Working volume	10,5 l
Environmental class level	Euro 3
Fuel tank capacity	590 litres on the right and 250 litres on the left
Curb weight of the vehicle	10150 kg
Permissible gross vehicle weight	33,000 kg
Permissible front axle load	8 000 kg
Permissible rear axle load	13 000 kg/13 000 kg
Permissible gross vehicle weight	90,000 kg
Overall length	7 095 mm
Overall width	2 500 mm
Overall height with fairing	3 365 mm
Clutch	Friction, dry single disc
GEARBOX	ZF 12 AS 2331 OD, automated 12-stage transmission

Front suspension	Parabolic springs with shock absorber and transverse stabiliser
Rear suspension	Balanced rear wagon, parabolic springs, shock absorbers and stabilisers on both axles
Steering	With hydraulic booster, ZF 8098
Braking system	Pneumatic, double-circuit with division into contours on axles, brakes - front disc brakes, rear drum brakes with ABS.
Fifth wheel coupling	Fifth wheel JOST JSK 38 C with integrated lubrication kingpin diameter 88.9 mm (3.5"), height 190 mm. Base plate 40 mm JOST. ROCKINGER SK5 towbar

Truck tractor MAN TGS 26.400 6x4 BLS ADR

Technical characteristics

Engine	D2066LF49, 4-stroke diesel engine
Power	400 hp / 294 kW at 1600 ÷ 1900 rpm
Torque	1900 N m at 1000 ÷ 1400 rpm
Number of cylinders	6-cylinder in-line
Working volume	10,5 l
Environmental class level	Euro 3
Fuel tank capacity	400 l
Curb weight of the vehicle	8 850 kg
Permissible gross vehicle weight	26,000 kg
Permissible front axle load	7 100 kg
Permissible rear axle load	9 500 kg/9 500 kg
Permissible gross vehicle weight	65,000 kg
Overall length	6 995 mm
Overall width	2 500 mm
Overall height with fairing	3 225 mm
Clutch	Frictional, dry single disc
GEARBOX	ZF 16 S 233 DD, 16-speed, manual, synchronised

Front suspension	Parabolic leaf springs with shock absorber and transverse stability stabiliser
Rear suspension	Rear air suspensions, shock absorbers and stabilisers on both axles
Steering	With hydraulic booster, ZF 8098
Braking system	Pneumatic, double-circuit with division into contours on axles, brakes - front disc brakes, rear drum brakes with ABS.
Fifth wheel coupling	Fifth wheel JOST JSK 37 C, for kingpin 50.8 mm (2"), height 150 mm. Base plate 40 mm, manufactured by JOST. Vertical load on the fifth-wheel coupling - 17,000kg

Truck tractor MAN TGS 26.400 6x4 BLS Medium

Technical characteristics

Engine	D2066LF49, 4-stroke diesel engine
Power	400 hp / 294 kW at 1600 ÷ 1900 rpm
Torque	1900 N m at 1000 ÷ 1400 rpm
Number of cylinders	6-cylinder in-line
Working volume	10,5 l
Environmental class level	Euro 3
Fuel tank capacity	590 l
Curb weight of the vehicle	9 000 kg
Permissible gross vehicle weight	26,000 kg
Permissible front axle load	7 100 kg
Permissible rear axle load	9 500 kg/9 500 kg
Permissible gross vehicle weight	65,000 kg
Overall length	6 995 mm
Overall width	2 500 mm
Overall height with fairing	3 620 mm
Clutch	Frictional, dry single disc
GEARBOX	ZF 16 S 233 DD, 16-speed, manual, synchronised

Front suspension	Parabolic leaf springs with shock absorber and transverse stability stabiliser
Rear suspension	Rear air suspensions, shock absorbers and stabilisers on both axles
Steering	With hydraulic booster, ZF 8098
Braking system	Pneumatic, double-circuit with division into contours on axles, brakes - front disc brakes, rear drum brakes with ABS.
Fifth wheel coupling	Fifth wheel JOST JSK 37 C, for kingpin 50.8 mm (2"), height 150 mm. Base plate 40 mm, manufactured by JOST. Vertical load on the fifth-wheel coupling - 17,000kg

Dumper MAN TGS 41.400 8x4 BB

Technical characteristics

Engine	D2066LF49, 4-stroke diesel engine
Power	400 hp / 294 kW at 1600 ÷ 1900 rpm
Torque	1900 N m at 1000 ÷ 1400 rpm
Number of cylinders	6-cylinder in-line
Working volume	10,5 l
Environmental class level	Euro 3
Fuel tank capacity	300 l
Curb weight of the vehicle	15 500 kg ± 2%
Cargo capacity	28,500 kg
Permissible gross vehicle weight	44 000 kg
Permissible front axle load	9 000 kg/9 000 kg
Permissible load on rear axles	13 000 kg/13 000 kg
Overall length	8 980 mm
Overall width	2 550 mm
Overall height with/without load	3 360 mm/ 3 450 mm
Clutch	Frictional, dry single disc
GEARBOX	ZF 16 S 253 OD, 16-speed, manual, synchronised

Front suspension	Parabolic leaf springs with shock absorber and transverse stability stabiliser
Rear suspension	Balanced rear bogie with longitudinal reaction rods, parabolic springs, shock absorbers and stabilisers on both axles
Steering	With hydraulic booster, ZF 8098
Braking system	Pneumatic, double-circuit with division into contours on axles, brakes - front disc brakes, rear drum brakes with ABS.

Dumper MAN TGS 40.400 6x4 BB

Technical characteristics

Engine	D2066LF06, 4-stroke diesel engine
Power	400 hp / 294 kW at 1600 ÷ 1900 rpm
Torque	1900 N m at 1000 ÷ 1400 rpm
Number of cylinders	6-cylinder in-line
Working volume	10,5 l
Environmental class level	Euro 2
Fuel tank capacity	300 l
Curb weight of the vehicle	15 000 kg ± 2%
Cargo capacity	25 000 kg
Permissible gross vehicle weight	40 000 kg
Permissible front axle load	9 000 kg
Permissible load on rear axles	16 000 kg/16 000 kg
Overall length	8 260 mm
Overall width	2 550 mm
Overall height with/without load	3 470 mm/ 3 530 mm
Clutch	Frictional, dry single disc
GEARBOX	ZF 16 S 253 OD, 16-speed, manual, synchronised

Front suspension	Parabolic leaf springs with shock absorber and transverse stability stabiliser
Rear suspension	Balanced rear bogie with longitudinal reaction rods, parabolic springs, shock absorbers and stabilisers on both axles
Steering	With hydraulic booster, ZF 8098
Braking system	Pneumatic, double-circuit with separation into axle circuits, air dryer with heating and automatic braking force regulation, front and rear wheel drum brakes with ABS

Dumper MAN TGS 33.360 6x4 BB

Technical characteristics

Engine	D2066LF48, 4-stroke diesel engine
Power	360 hp / 265 kW at 1400 ÷ 1900 rpm
Torque	1800 N m at 1000 ÷ 1400 rpm
Number of cylinders	6-cylinder in-line
Working volume	10,5 l
Environmental class level	Euro 3
Fuel tank capacity	300 l
Curb weight of the vehicle	13 000 kg ± 2%
Cargo capacity	20 000 kg
Permissible gross vehicle weight	33 000 kg
Permissible front axle load	7 500 kg
Permissible load on rear axles	13 000 kg/13 000 kg
Overall length	7 940 mm
Overall width	2 550 mm
Height to the top edge of the cab	3 270 mm
Clutch	Frictional, dry single disc
GEARBOX	ZF 16 S 253 OD, 16-speed, manual, synchronised

Front suspension	Parabolic leaf springs with shock absorber and transverse stability stabiliser
Rear suspension	Balanced rear bogie with longitudinal reaction rods, parabolic springs, shock absorbers and stabilisers on both axles
Steering	With hydraulic booster, ZF 8098
Braking system	Pneumatic, double-circuit with division into contours on axles, brakes - front disc brakes, rear drum brakes with ABS.

Curtainsider van MAN TGS 26.400 6x4 BL

Technical data

Engine	D2066LF49, 4-stroke diesel engine
Power	400 hp / 294 kW at 1600 ÷ 1900 rpm
Torque	1900 N m at 1000 ÷ 1400 rpm
Number of cylinders	6-cylinder in-line
Working volume	10,5 l
Environmental class level	Euro 3
Fuel tank capacity	600 l
Curb weight of the vehicle	11 500 kg ± 2%
Cargo capacity	16,000 kg
Permissible gross vehicle weight	28 000 kg
Permissible front axle load	7 500 kg
Permissible load on rear axles	10 500 kg/10 500 kg
Overall length	10 960 mm
Overall width	2 550 mm
Overall height with/without load	3 910 mm/3 960 mm
Clutch	Friction, dry single disc, exhaust type
GEARBOX	ZF 16 S 223 DD, 16-speed, mechanical, synchronised

Front suspension	Parabolic leaf springs with shock absorber and transverse stability stabiliser
Rear suspension	Rear air suspensions, shock absorbers and stabilisers on both axles
Steering	With hydraulic booster, ZF 8043
Braking system	Pneumatic, double-circuit, drum brakes, with ABS
Body length, inside / outside	8 450 mm / 8 550 mm
Body width, inside / outside	2 480 mm / 2 550 mm
Body height, inside / outside	2 600 mm
Number of loadable euro pallets	20 pcs.
Body volume	54 m ³

Mixer truck MAN TGS 41.400 8x4 BB

Technical characteristics

Engine	D2066LF06,, 4-stroke diesel engine
Power	400 hp / 294 kW at 1600 ÷ 1900 rpm
Torque	1900 N m at 1000 ÷ 1400 rpm
Number of cylinders	6-cylinder in-line
Working volume	10,5 l
Environmental class level	Euro 2
Fuel tank capacity	300 l
Curb weight of the vehicle	15 000 kg ± 2%
Maximum weight of concrete to be transported	25 000 kg
Permissible gross vehicle weight	41 000 kg
Permissible front axle load	7 500 kg/ 7 500 kg
Permissible rear axle load	13 000 kg/ 13 000 kg
Nominal mixer volume	10 m ³
Overall length	9 350 mm
Overall width	2 500 mm
Overall height	3 840 mm
Clutch	Frictional, dry single disc
GEARBOX	ZF 16 S 252 OD, 16-speed, manual

Front suspension	Parabolic leaf springs with shock absorber and transverse stability stabiliser
Rear suspension	Balanced rear bogie, parabolic springs, shock absorbers and stabilisers on both axles
Steering	With hydraulic booster, ZF 8098
Braking system	Pneumatic, double-circuit, with heated air dryer and automatic braking force regulation, drum brakes on all wheels, with ABS.

Flatbed truck with tent MAN TGS 13.280 4x4 BB

Technical characteristics

Engine	D0836LFL41, 4-stroke diesel engine
Power	280 hp / 206 kW at 1850 ÷ 2400 rpm
Torque	1100 N m at 1200 ÷ 1750 rpm
Number of cylinders	6-cylinder in-line
Working volume	6,9 l
Environmental class level	Euro 3
Fuel tank capacity	150 l
Curb weight of the vehicle	7 100 kg
Cargo capacity	6 450 kg
Permissible gross vehicle weight	13 500 kg
Permissible front axle load	6 300 kg
Permissible rear axle load	7 800 kg
Overall length	8120 mm
Overall width	2 500 mm
Height to the top edge of the cab	3 120 mm
Clutch	Friction, dry single disc, extraction type
GEARBOX	ZF 9S-1310 OD, 9-speed, mechanical, synchronised

Front suspension	Parabolic springs with shock absorber
Rear suspension	Parabolic springs
Steering	With hydraulic booster, ZF 8098
Braking system	Pneumatic, double-circuit, drum brakes on all wheels, with ABS
Body dimensions	8 450 mm / 8 550 mm
Body length, inside / outside	5 960 mm / 5 860 mm
Body width, inside / outside	2 490 mm / 2 400 mm
Body height, inside / outside	2 000 mm
Body height with load / without load	1,310 mm / 1,420 mm
Body volume	26 m ³

Mixer truck MAN TGS 33.360 6x4 BB

Technical characteristics

Engine	D2066LF48, 4-stroke diesel engine
Power	360 hp / 265 kW at 1400 ÷ 1900 rpm
Torque	1800 N m at 1000 ÷ 1400 rpm
Number of cylinders	6-cylinder in-line
Working volume	10,5 l
Environmental class level	Euro 3
Fuel tank capacity	300 l
Curb weight of the vehicle	13 300 kg ± 2%
Maximum weight of concrete to be transported	19 200 kg
Permissible gross vehicle weight	33 000 kg
Permissible front axle load	7 500 kg
Permissible rear axle load	13 000 kg/13 000 kg
Nominal mixer volume	8 m ³
Overall length	8 870 mm
Overall width	2 550 mm
Overall height	3 770 mm
Clutch	Friction, dry single disc
GEARBOX	ZF16 S252 OD, 16-speed, mechanical

Front suspension	Parabolic leaf springs with shock absorber and transverse stability stabiliser
Rear suspension	Balanced rear bogie with longitudinal reaction rods, parabolic leaf springs
Steering	With hydraulic booster, ZF 8098
Braking system	Pneumatic, double-circuit, with heated air dryer and automatic braking force regulation, drum brakes on all wheels, with ABS.

Concrete pump MAN TGS 41.400 8x4 BB

Technical characteristics

Engine	D2066LF68, turbocharged 4-stroke diesel engine with charge air intercooling
Power	360 hp / 265 kW at 1400 ÷ 19C0 rpm
Torque	1800 Nm at 1000 ÷ 1400 rpm
Number of cylinders	6-cylinder in-line
Working volume	10,5 l
Ecological class level	Euro 3
Fuel tank capacity	300 l
Curb weight of the vehicle	9170 kg
Cargo capacity	20,000 kg
Permissible gross vehicle weight	33 000 kg
Permissible front axle load	7 500 kg
Permissible rear axle load	13 000 kg/13 000 kg
Overall length	7 490 mm
Overall width	2 500 mm
Overall body height	3 225 mm
Clutch	Friction, dry single disc
GEARBOX	ZF 16 S 223 DD, 16-speed, manual, synchronised

Front suspension	Parabolic springs, with shock absorbers and transverse stability stabiliser
Rear suspension	Parabolic springs, balanced rear bogie, shock absorbers and stabilisers on both axles
Steering	With hydraulic booster, ZF 8098.
Braking system	Pneumatic, double-circuit with division into circuits by axles, air dryer with heating and automatic regulation of braking force, front and rear wheel drum brakes with ABS.

Waste collection truck MAN TGS 26.360 8x4 BL

Technical characteristics

Engine	D2066LF06 - 4-stroke diesel engine
Power	400 hp / 294 kW at 1600 ÷ 1800 rpm
Torque	1900 N m at 1000 ÷ 1400 rpm
Number of cylinders	6-cylinder in-line
Working volume	6,9 l
Environmental class level	Euro 2
Fuel tank capacity	400 l
Maximum working height of the boom lifting	52 m
Load capacity of the ladder when used as a crane	2 000 kg
Cradle / lift capacity	200 kg
Curb weight of the vehicle	24 500 kg±2 %
Permissible front axle load	7 500 kg
Permissible rear axle load	11 500 kg/11 500 kg
Overall length	12 000 mm
Overall width	2 550 mm
Overall height	3 900 mm
Clutch	Friction, dry single disc
GEARBOX	ZF 16 S 222 DD, 16-speed, manual, synchronised

Front suspension	Parabolic leaf springs
Rear suspension	Pneumatic suspension
Steering	With hydraulic booster, ZF 8098
Braking system	Pneumatic, double-circuit, heated air dryer with automatic brake force regulation, front and rear disc brakes;

Hooklift truck MAN TGS 41.360 8x4 BB

Technical characteristics

Engine	D2066LF48 - 4-stroke diesel engine
Power	360 hp / 265 kW at 1400 ÷ 1900 rpm
Torque	1800 Nm at 1000 ÷ 1400 rpm
Number of cylinders	6-cylinder inline
Working volume	10,5 l
Environmental class level	Euro 3
Fuel tank capacity	300 l
Length of hook system	5 800 mm
Hook height	1 570 mm
Length of loaded containers	5 950 ÷ 6 800 mm
Curb weight of the vehicle without container	14 100 kg ± 2 %
Load capacity of the hook system	24 000 kg
Permissible gross vehicle weight	41 000 kg
Permissible front axle load	7 500 kg/7 500 kg
Permissible rear axle load	13 000 kg/13 000 kg
Overall length	8 670 mm
Overall width	2 550 mm
Overall height	4 000 mm
Clutch	Frictional, dry single disc

GEARBOX	ZF 16 S 222 0D, 16-speed, manual, synchronised
Front suspension	Parabolic springs with shock absorbers and transverse stabilisers
Rear suspension	Balanced rear bogie with longitudinal reaction rods, parabolic leaf springs
Steering	With hydraulic booster, ZF 8098
Braking system	Pneumatic, double-circuit, with heated air dryer and automatic braking force regulation, drum brakes on all wheels, with ABS

Sweeping and cleaning truck MAN TGS 18.240 4x2 BL

Technical characteristics

Engine	D0836LFL40 - 4-stroke diesel engine
Power	240 hp / 176 kW at 1850 ÷ 2400 rpm
Torque	925 N-m at 1200 ÷ 1800 rpm
Number of cylinders	6-cylinder in-line
Working volume	6,9 l
Environmental class level	Euro 3
Fuel tank capacity	150 l
Water tank capacity	1 500 l
Hopper capacity	7 m ³
Curb weight of the chassis vehicle	11 065 kg
Load capacity / without water	6 935 kg / 8 435 kg
Permissible gross vehicle weight	18 000 kg
Permissible front axle load	7,100 kg
Permissible rear axle load	11 500 kg
Overall length	7 600 mm
Overall width	2 500 mm
Overall height	3 120 mm
Clutch	Frictional, dry single disc

GEARBOX	ZF 9S-1110 DD, 9-speed, mechanical, synchronised.
Front suspension	Parabolic springs with shock absorbers and transverse stabilisers
Rear suspension	Air suspension, with shock absorber and transverse stabiliser
Steering	With hydraulic booster, ZF 8098
Braking system	Pneumatic, double-circuit, with heated air dryer and automatic braking force regulation, disc brakes on all wheels, with ABS

Water tanker MAN TGS 13.240 4x4 BB

Technical characteristics

Engine	D0836LFU0 - 4-stroke diesel engine
Power	240 hp / 176 kW at 1850 ÷ 2400 rpm
Torque	925 N·m at 1200 ÷ 1800 rpm
Number of cylinders	6-cylinder in-line
Working volume	6,9 l
Environmental class level	Euro 3
Fuel tank capacity	150 l
Curb weight of the vehicle	7 500 kg ± 2 %
Load capacity	6 000 kg
Permissible gross vehicle weight	13 500 kg
Permissible front axle load	6 300 kg
Permissible rear axle load	7 800 kg
Overall length	6 990 mm
Overall width	2 500 mm
Overall height	3 160 mm
Clutch	Frictional, dry single disc
КПП	ZF-9S-1310 OD 9-ступенчатая, механиче- ская, синхронизированная

GEARBOX	ZF-9S-1310 OD 9-speed, manual, synchronised
Front suspension	Parabolic springs with shock absorber and transverse stability stabiliser
Rear suspension	Parabolic springs with shock absorber and transverse stability stabiliser
Steering	With hydraulic booster, ZF 8098
Braking system	Pneumatic, double-circuit, drum brakes on all wheels, with ABS
Specification of the tank and equipment	8 450 mm / 8 550 mm
Tank capacity	6 000 l
Pump capacity	550 l/min
Filling time, no more	25 min
Time of draining from the tank, through a pump / by gravity	12 min / 25 min

Emergency vehicle MAN TGS 13.240 4x4 BB

Technical characteristics

Engine	D0836LFL40, - 4-stroke diesel engine
Power	240 hp / 176 kW at 1850 ÷ 2400 rpm
Torque	925 N·m at 1200 ÷ 1800 rpm
Number of cylinders	6-cylinder in-line
Working volume	6,9 l
Environmental class level	Euro 3
Fuel tank capacity	150 l
Curb weight of the vehicle	10 700 kg ± 2 %
Load capacity	2 800 kg
Permissible gross vehicle weight	13 500 kg
Permissible front axle load	6 300 kg
Permissible rear axle load	7 800 kg
Overall length	7 750 mm
Overall width	2 500 mm
Overall height	3 750 mm
Clutch	Friction, dry single disc, extraction type
GEARBOX	ZF-9S-1310 OD 9-speed, mechanical, synchronised

Front suspension	Parabolic springs with shock absorber and transverse stability stabiliser
Rear suspension	Parabolic springs with shock absorber and transverse stability stabiliser
Steering	With hydraulic booster, ZF 8098
Braking system	Pneumatic, double-circuit, drum brakes on all wheels, with ABS
Body shell length	5 460 mm
Internal body height	2 110 mm
Landing height of the body	1 350 mm

Fuel tanker MAN TGS 13.240 4x4 BB

Technical characteristics

Engine	D0836LFL40,, - 4-stroke diesel engine
Power	240 hp / 176 kW at 1700 * 2300 rpm
Torque	925 N·m at 1200 * 1800 rpm
Number of cylinders	6-cylinder in-line
Working volume	6,9 l
Environmental class level	Euro 3
Fuel tank capacity	200 l
Tank volume	4 m³
Time to fill the tank with own pump	18 min.
Time of tanker draining with own pump	15 min.
Permissible gross vehicle weight	13 000 kg
Permissible front axle load	6 300 kg
Permissible rear axle load	7 800 kg
Overall length	7 500 mm
Overall width	2 500 mm

Overall height	3 170 mm
Clutch	Frictional, dry single disc
GEARBOX	ZF 9S-1110 DD, 9-speed, manual, synchronised
Front suspension	Parabolic springs with stabiliser
Rear suspension	Parabolic springs with stabiliser
Steering	With hydraulic booster, ZF 8098.
Braking system	Pneumatic, double-circuit, all wheels drum brakes, with ABS

Aerodrome refuelling truck MAN TGS 33.400 6x4 BB

Technical characteristics

Engine	D2066LF48, - 4-stroke diesel engine
Power	240 hp / 176 kW at 1850 h- 2400 rpm
Torque	925 N·m at 1200 + 1800 rpm
Number of cylinders	6-cylinder in-line
Working volume	10,5 l
Environmental class level	Euro 3
Fuel tank capacity	400 l
Tank volume	22 m³
Permissible gross vehicle weight	33,000 kg
Permissible front axle load	7 500 kg
Permissible rear axle load	13 000 kg/13 000 kg
Overall length	9 900 mm
Overall width	2 500 mm
Overall height	3 225 mm
Clutch	Frictional, dry single disc
GEARBOX	ZF 9S-1110 DD, 9-speed, manual, synchronised

Front suspension	Parabolic springs
Rear suspension	Balanced rear bogie, parabolic springs
Steering	Hydraulically assisted, ZF 8098
Braking system	Pneumatic, with shock absorber and transverse stabiliser

Windrower MAN TGS 33.360 6x4 BB

Technical characteristics

Engine	D2066LF48,4-stroke diesel engine with turbocharging and charge air intercooling
Power	360 hp / 265 kW at 1400 ÷ 1900 rpm
Torque	1800 N·m at 1000 ÷ 1400 rpm
Number of cylinders	6-cylinder in-line
Working volume	10,5 l
Environmental class level	Euro 3
Fuel tank capacity	300 l
Curb weight of the car	9 170 kg
Load capacity	20,000 kg
Permissible gross vehicle weight	33 000 kg
Permissible front axle load	7 500 kg
Permissible rear axle load	13 000 kg/13 000 kg
Overall length	7 490 mm
Overall width	2 500 mm
Overall height	3 225 mm
Clutch	Frictional, dry single disc
GEARBOX	ZF 16 S252 0D 16-speed, manual, synchronised

Front suspension	Parabolic springs, with shock absorber and transverse stability stabiliser
Rear suspension	Parabolic leaf springs, balanced rear bogie, shock absorbers and stabilisers on both axles
Steering	With hydraulic booster, ZF 8098.
Braking system	Pneumatic, double-circuit with separation into axle circuits, air dryer with heating and automatic braking force regulation, front and rear wheel drum brakes with ABS.

Turntable ladder MAN TGS 26.400 6x4 BL

Technical characteristics

Engine	D2066LF06 - 4-stroke diesel engine
Power	400 hp / 294 kW at 1600 ÷ 1800 rpm
Torque	1900 Nm at 1000 ÷ 1400 rpm
Number of cylinders	6-cylinder in-line
Working volume	6,9 l
Environmental class level	Euro 2
Fuel tank capacity	400 l
Maximum working height of the boom lifting	52 m
Load capacity of the ladder when used as a crane	2 000 kg
Cradle / lift load capacity	200 kg
Curb weight of the vehicle	24 500 kg ± 2 %
Permissible front axle load	7 500 kg
Permissible rear axle load	11 500 kg/ 11 500 kg
Overall length	12 000 mm
Overall width	2 550 mm
Overall height	3 900 mm
Clutch	Frictional, dry single disc

GEARBOX	ZF 16 S 222 DD, 16-speed, mechanical, synchronised
Front suspension	Parabolic springs
Rear suspension	Pneumatic suspension
Steering	With hydraulic booster, ZF 8098
Braking system	Pneumatic, double-circuit, heated air dryer with automatic brake force regulation, front and rear disc brakes;

Fire tanker MAN TGM 13.240 4x4 BB

Technical characteristics

Engine	D0836LFL40, 4-stroke diesel engine
Power	240 hp / 176 kW at 1950 ÷ 2400 rpm
Torque	925 N·m at 1200 ÷ 1800 rpm
Number of cylinders	6-cylinder in-line
Working volume	6,9 l
Environmental class level	Euro 3
Fuel tank capacity	150 l
Gross vehicle weight	13 500 kg
Permissible front axle load	6 300 kg
Permissible rear axle load	7 800 kg
Overall length	8 000 mm
Overall width	2 500 mm
Overall height	3 380 mm
Clutch	Friction, dry single disc, extraction type
GEARBOX	ZF-9S-1310 OD 9-speed, mechanical, synchronised.

Front suspension	Parabolic springs with shock absorber and transverse stability stabiliser
Rear suspension	Parabolic springs with shock absorber and transverse stability stabiliser
Steering	With hydraulic booster, ZF 8098
Braking system	Pneumatic, double-circuit, drum brakes on all wheels, with ABS.
Characteristics of the superstructure	Parabolic springs with stabiliser
Water tank capacity	4000 l
Foaming agent tank	400 l
Pump capacity	40 l/sec

Shift truck MAN TGM 13.240 4x4 BB

Technical characteristics

Engine	D0836LFL40, 4-stroke diesel engine
Power	240 hp / 176 kW at 1850 ÷ 2400 rpm
Torque	925 Nm at 1200 ÷ 1800 rpm
Number of cylinders	6-cylinder in-line
Working volume	6,9 l
Environmental class level	Euro 3
Fuel tank capacity	150 l
Curb vehicle weight	9 000 kg ± 2 %
Load capacity of the vehicle	4 000 kg
Permissible gross vehicle weight	13 500 kg
Permissible front axle load	6 300 kg
Permissible rear axle load	7 800 kg
Overall length	8 050 mm
Overall width	2 500 mm
Overall height	3 160 mm
Clutch	Frictional, dry single disc, extraction type

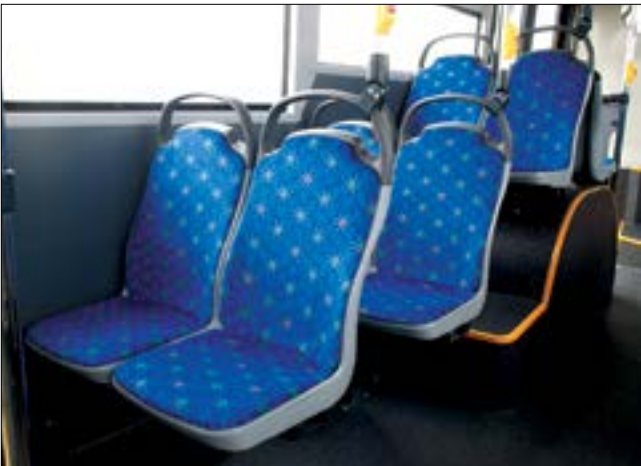

GEARBOX	ZF-9S-1310 OD 9-speed, manual, synchronised
Front suspension	Parabolic springs with shock absorber and transverse stabiliser
Rear suspension	Parabolic leaf springs with shock absorber and transverse stabiliser
Steering	With hydraulic booster, ZF 8098
Braking system	Pneumatic, double-circuit, drum brakes on all wheels, with ABS
Body shell length	5 500 mm
Internal body height	1 975 mm
Landing height of the body	1 350 mm

City bus MAN A22 CNG

Engine	E2876 LUH03 natural gas engine (EEV)
Power	310 hp / 228 kW at 2000 rpm
Torque	1250 Nm at 1000 ÷ 1700 rpm
Working volume	12 816 cm ³
Environmental class level	Euro 5
Power supply system	4 gas cylinders of 294 litres each with a total capacity of 1176 litres
Permissible gross weight	19,500 kg
Additional front axle load	7,245 kg
Additional rear axle load	11,500 kg
Overall length	12 000 mm
Overall width	2 550 mm
Overall height	3 410 mm
GEARBOX	ZF 6 AP 1 400 EcoLife automatic transmission with integrated retarder brake

Front suspension / Rear suspension	Electronic chassis smoothness control regulated by ECAS air suspension system with travel sensor: for front axle 1 and for rear axle 2	
Steering	Left-hand drive, with hydraulic power steering	
Braking system	Parking brake and emergency brake system	
Additional options	Pneumatic, dual-circuit, axle-separated, heated air dryer with automatic braking force regulation, front and rear drum brakes with ABS.	
Passenger capacity	90	
Number of seats	30	
Number of standing seats	60	

UZAUTO TRAILER

Founders:

100% - Uzavtosanoat JSC (Uzbekistan)

Factory:

The production capacity is 3,000 units per year.

Address:

110100, Republic of Uzbekistan,
Samarkand region, Jambai district, Tashkent str., No. 1

Products:

Trailed and mounted equipment

Staff:

580 employees.

Quality certificates:

UNI EN ISO 9001: 2008,
O'zDSt ISO 9001: 2009

AgroTechKlaster

Since March 21, 2021, Toshkent Traktor Zavodi LLC has been operating under the brand AgroTechKlaster. In accordance with the Decree of the President of Uzbekistan No. 7 of November 11, 2019, JSC «Tashkent Plant of Agricultural Machinery», JSC Aggregated Plant, JSC Technolog, LLC Technolog-Stan, and LLC Agrosanoatmashinvest formed a cluster of agriculture machinery in Chirchik by relocating part of their production facilities to the city.

JSC «Tashkent Plant of agricultural machinery»

JSC «Tashkent Plant of Agricultural Machinery» was established on May 15, 2014. Together with LS Mtron (Republic of Korea), the production of new agricultural tractors «PLUS 100» and «LS1004» with an engine capacity of up to 100 hp, «U62» with an engine capacity of 62 hp and «G38» with an engine capacity of 38 hp has been organized.

The design capacity of the enterprise is up to 5,000 tractors per year when operating in one shift. Currently, the production of cabins is being localized, which will be equipped with all tractors with a capacity of up to 100 hp.

JSC Chirchik Agricultural Machinery Plant

JSC Chirchik Agricultural Machinery Plant was established on May 15, 2014 in accordance with the decree of the President of the Republic of Uzbekistan. The company produces a Chisel cultivator «CHKU-4A», which is designed for pre-sowing layer-by-layer loosening of the soil with fertilization, weeding, harrowing or painting.

JSC Technologist

Joint Stock Company Technologist was established in 1959. Since 2014, the company has existed as a Joint-Stock Company «Technologist» as part of JSC «Uzagrotehmash».

JSC «Technologist» is a specialized enterprise for the development, design and production of technological equipment, automated production lines, non-standardized machines, as well as the production of import-substituting parts for enterprises of JSC «Uzagrotehmash», GAK «Uzbekenergo» and other organizations of the Republic of Uzbekistan.

JSC «Aggregate Plant»

JSC «Aggregate Plant» is a large industrial enterprise in Uzbekistan for the production of agricultural machinery. Having started its activity in 1956, until the 90s the company was specialized in the production of individual components and assemblies. Currently, the main products of the enterprise are various types of sprayers designed for chemical protection and pest control and diseases of field, vegetable, industrial crops and gardens.

JV LLC Uz CLAAS Agro

Since the beginning of the company's establishment, the production of combine harvesters «Dominator 130», tractors «Arion 630C», «Axion 850», «Axos 340C», and high-performance «Axos 340C», balers «Markant 55» has been mastered.

JV LLC «LEMKEN Chirchiq»

The company produces tillage and other types of agricultural machinery under the LEMKEN brand, including universal hinged rotary plows, rotary harrows, disc cultivators and soil compactors.

JV LLC «AGRIHIM»

JV «AGRIHIM» was established jointly with the Italian company «AGRIMONDO» in 1998 and is currently part of the structure of JSC «Uzagrotehmash».

The list of manufactured equipment includes manual knapsacks, motorized knapsacks, tractor fans, stationary and mobile sprayers, as well as pollinators.

«TTZ DF903H» Cotton-growing tractor (3 wheeled)

Technical characteristics

Type	Cotton-growing
Engine type	4-stroke, 4-cylinder, water-cooled
Capacity, l	5.13
Nominal power, kW, (hp), /rpm	66.2(90)/2300
Method of air supply to the cylinder	turbocharged
Transmission	mechanical
Number of gears, forward/reverse	12/4
Speed range, km/h	
- forward	1,14–25,12
- backward	2,8–10,25
Wheelbase, mm	2410
Rotation speed, rpm	
- speeds I/II/III	540 / 750/1000
Tractor track, mm	
- clearance	800
- by rear wheels	1800
Operating weight without ballast, kg	3950
Overall dimensions, mm	
- length	4025
- width (by minimum track)	2200
- height	3015

«TTZ DF903H» Cotton-growing tractor (3 wheeled)

Technical characteristics

Type	Cotton-growing
Engine type	4-stroke, 4-cylinder, water-cooled
Capacity, l	5,13
Nominal power, kW, (hp), /rpm	66.2(90)/2300
Method of air supply to the cylinder	turbocharged
Transmission	mechanical
Number of gears, forward/reverse	12/4
Speed range, km/h	
- forward	1.8–33
- backward	4,5–14.9
Wheelbase, mm	2352
Rotation speed, rpm	
- speeds I/II/III	540 / 750/1000
Tractor track, mm	
- clearance	800
- by rear wheels	1800
Operating weight without ballast, kg	3729
Overall dimensions, mm	
- length	4025
- width (by minimum track)	2245
- height	3040

«TTZ DF904» Universal-arable tractor

Technical characteristics

Type	Universal-arable
Engine type	4-stroke, 4-cylinder, water-cooled
Capacity, l	5.13
Nominal power, kW, (hp), /rpm	66.2(90)/2300
Method of air supply to the cylinder	turbocharged
Transmission	mechanical
Number of gears, forward/reverse	12/4
Speed range, km/h	
- forward	1.8–33
- backward	4.5–14.9
Wheelbase, mm	2414
Rotation speed, rpm	
- speeds I/II/III	540 / 750/1000
Tractor track, mm	
- clearance	440
- by rear wheels	1800
Operating weight without ballast, kg	3940
Overall dimensions, mm	
- length	4510
- width (by minimum track)	2140
- height	2700

«TTZ 812» Universal-arable tractor

Technical characteristics

Type	Universal-arable
Engine type	4-stroke, 4-cylinder, water-cooled
Capacity, l	4.5
Nominal power, kW, (hp), /rpm	59.6(81)/2300
Method of air supply to the cylinder	turbocharged
Transmission	mechanical
Number of gears, forward/reverse	18/4
Speed range, km/h	
- forward	1.4-19.8
- backward	2.5-6.4
Wheelbase, mm	2414
Rotation speed, rpm	
- speeds I/II/III	540 / 750/1000
Tractor track, mm	
- clearance	440
- by rear wheels	1800
Operating weight without ballast, kg	3940
Overall dimensions, mm	
- length	4040
- width (by minimum track)	2370
- height	2930

«Lovol 504» Garden Tractor

Technical Specifications

Type	Gardening
Engine type	4-stroke, 4-cylinder, water-cooled
Capacity, l	3.1
Nominal power, kW, (hp), /rpm	36.8(50)/2300
Method of air supply to the cylinder	turbocharged
Transmission	mechanical
Number of gears, forward/reverse	8/4
Speed range, km/h - forward - backward	1.75 - 32.21 2.30 - 11.92
Wheelbase, mm	2414
Rotation speed, rpm - speeds I/II/III	540 / 750/1000
Tractor track, mm - clearance - by rear wheels	440 1800
Operating weight without ballast, kg	3940
Overall dimensions, mm - length - width (by minimum track) - height	4136 1870 2400

«MX-1.8» Cotton picker

Technical specifications

Productivity per 1 shift, ha	5-6
Working width, m	1,8
Machine weight (without tractor), tons.	4,1
Overall dimensions (with tractor), mm	40
- length	8030
- width	3240
- height (with separator raised)	4000
Advancement speed, km/h:	
- on 1 collection	4,23
- on 2 collection	5,13
Required power, kW	до 32,0
Bunker capacity, kg	800-850

“Dominator 130” Grain harvester

Technical characteristics

Perkins engine	1006-E6
Nominal power kW/hp	112/152
Threshing drum width, mm	1060
Threshing drum diameter, mm.	450
Number of straw walker keys, pcs.	4
Straw walker area, m2.	4.13
Straw walker length, m.	3.9
Blower fan	radial
Total sieve area, m2.	3.0
Grain bin volume, l.	3200
Header width, m.	4.2
Forward speed, km/h.	1.9-20
Fuel tank capacity, l.	200
Fuel tank capacity, l	115
Operating weight without ballast, kg	3420

The efficient grain harvester is equipped with a CLAAS threshing unit, ensuring clean threshing, gentle grain handling and high separation performance.

Cotton-scraping machine «SKO-3.6»

Technical specifications

Productivity, ha/hour	1,5-2,0
Working width, m	3,6
Overall dimensions (without tractor), (length, width, height with raised separator)	4400x3750x3360
Travel speed, km/hour	4,13-5,36
Power consumption (from BOM), kW	14,7
Bunker volume, m³	5,8
Weight, kg	2400
Aggregated with tractors	TTZ-LS, MT3

The cotton-scraping machine with an enricher is designed for harvesting the remains of the cotton crop (closed and half-open kurak bolls)

«CHKU-4A» Chisel-cultivator

Technical characteristics

Working width, m	4
Operating speed, km/h	7-8,5
Track width, mm	2450
Weight of the implement with a full set of working parts, kg	1705
Bin capacity, l	375

«WOD» Disc harrow

Technical specifications

Number of discs, pcs	24	28
Overall width, mm	2680	3120
Overall length, mm	5150	5150
Overall height, mm	1300	1300
Height, mm	1130	1130
Working depth max.), mm	200–220	200–220
Working width, mm	2680	3120
Disc diameter, mm	560 x 4,5	560 x 4,5
Disc diameter, mm	610 x 5	610 x 5
Space between discs, mm	220	220
Number of bearings, mm	8	8
Frame size, mm	200 x 100	200 x 100
Required power, hp	90–95	105–110
Weight, kg	2000	2200

«PNYa-2-30» («PNYa-2-30») Mounted plow

Technical specifications

Weight, kg	230	240
Operational speed, m/sec	1,09	
Productivity, ha/hour	0,26–0,33	0,4–0,5
Working width, cm	60	90

“Master select 123” Reversible plow

Technical characteristics

Number of bodies, pcs	3+1
Capture width, cm	132–180
Ploughing depth, cm	up to 40
Weight, kg	1300
Aggregated with a tractor	from 140 hp
Productivity, ha/hour	1–1,5

«OVH-600» Sprayer

Technical characteristics

Type	assembled
Productivity, ha/h:	FPT
- cotton and field crops	18.9-22.2
- orchards	2.8-5.6
- vineyards	4.5-4.8
- defoliation	9.45-11.1
Working speed for main operations, km/h	6.3-7.4
Working width, m	30
Liquid consumption rate, l/ha:	2000
- cotton	100-150
- orchards and vineyards	100-500
Tank capacity, l	630 (2 tanks)

«RChM-4B» Device for chasing cotton

Technical characteristics

Productivity per 1 hour of basic time (ha/h)	1.2-2.4
Working speed, km/h	5-7
Working element, type	chasing knife
Width of processed row spacing (depending on the order), cm	60 or 90
Height of processed bush from root collar to cutting plane (depending on adjustment), cm	75-130
Specific fuel consumption, kg/ha	4-5.7
Total weight, kg	187
Length, mm	7000
Width, mm	2700
Height, mm	2850

«SCHH-4B» Cotton Seeder

Technical Specifications

Type	mounted, on a three-point hitch system of a tractor
Productivity, ha/hour	3-6
Working speed, km/hour	6-10
Transport speed, km/hour	no more than 15
Working width, m	3.6
Seed placement depth, cm	3-8
Weight, kg	650±50
Operating weight without ballast, kg	1405

«KHU-4V» Universal cotton cultivator-plant feeder

Technical specifications

Productivity, ha/hour	1,12-2,21
Tillage depth, cm	14-25
Number of processed rows	4
Working speed, km/hour	3-7
Weight, kg	1600

The cultivator is designed to perform during the growing season the main types of row-to-row processing (weeding, loosening the soil, cutting irrigation furrows, fertilizing in the middle of the aisles and on the side of the rows) of cotton, kenaf, corn and other high-stemmed row crops with row spacing of 60, 70, 90 cm, sown with four-row seeders.

«F 600» Sprayer boom, mounted

Technical characteristics

Capacity, l	600
Power consumption, hp/kW	60/44.1
Working width, m	12–16
Working speed, km\h	6.3–7.4
Air flow, m³ / s	54000
Weight, kg	235
PTO rpm	540/570
Length, mm	1500
Width, mm	1500
Height, mm	1600

«OSHU-200M» Wide-capture universal sprayer

Technical characteristics

Capacity, l	200
Power consumption, hp/kW	9,5/7
Loading weight, kg	160
Working speed, km/h	4-8
Cutting width, m	12
Productivity, ha/h	9
Length, mm	1450
Width, mm	1450
Height, mm	1300

«RMU-0.5» Mineral Fertilizer Spreader

Technical characteristics

Productivity, ha/h	1,0 - 1,4
Cutting width, m	12
Power consumption, hp/kW	54,38/40
PTO speed, rpm	600
Bunker capacity, kg	600
Weight, kg	145
Length, mm	1200
Width, mm	1200
Height, mm	1400

The mineral fertilizer spreader «RMU-0.5» is used for continuous surface application of mineral fertilizers in open fields and gardens.

«2PTS-4.5-793A-03A» Tractor dump trailer

Technical characteristics

Lifting force, kg	4000
Weight, kg	1890
Maximum speed, km/h	35
Platform volume, m3	12,7
Wheelbase, mm	2300
Turning radius, degrees	50

«VP-1» Universal fan sprayer

Technical characteristics

Productivity ha/hour	up to 25
Capture width:	14-25
-cotton, m	до 25
-orchards	1-2 rows
-vineyards	2-3 rows
-free-standing trees, m	up to 16
Liquid consumption rate, l/ha:	
-cotton, m	50-400
-orchards and vineyard	400-600
Power consumption	22
Drive:	
-pump	Tractor PTO
-working nozzle	Battery
Tanks:	
-for pesticides, l	600-800
-for system flushing, l	50
-for hand washing, l	12
Dusting devices (upon request):	
-productivity ha/hour	12-15
Machine weight, dry, kg	350

«KBN-0.35» Trench digger

Technical characteristics

Capture width:	4000
a) leveler	1.8 and 2.0 m
b) planer	2.4 m
Productivity when cutting and leveling channels per hour of net time	2.63-5.5 km/h
Working speed	3.20-5.5 km/h
Transport clearance	not less than 350 mm
Weight of the tool with a full set	589±18 kg

It is designed for cutting and leveling temporary intra-card irrigation systems, discharge channels and auxiliary furrows during irrigation during the growing season of cotton or other agricultural crops and for performing planning work in the pre-sowing period.

Construction Materials Industry

Uzpromstroymaterialy Association

Created in 2019 on the basis of a joint-stock company for the production of construction materials, the Association «Uzpromstroymaterialy» is a leading industry structure uniting over 120 enterprises.

The Association «Uzpromstroymaterialy» includes:

Enterprises for the production of cement,
binders and products made from them

Enterprises for the production of glass,
glass products and ceramic products

Enterprises for the production of wall materials,
mining and processing of natural stone

Enterprises for the production of other building and finishing materials

Currently, Uzstroyaterialy JSC's ceramic tiles, plumbing products, dry building mixes, burnt bricks, natural stone facing products, lime products, and polypropylene pipes and fittings are widely distributed in markets in Russia, Ukraine, Kazakhstan, Kyrgyzstan, Turkmenistan, Tajikistan, and Afghanistan. The company is taking measures to further expand its export potential and continues to work on expanding the range of products and expanding the geography of its exports.

- refractory brick brand SHUS-4, 200x150x65x75;
- refractory brick brand SHUS-7, 230x150x90x100;
- refractory brick brand SHUS-9, 300x150x65.

4) Products of the construction materials and structures plant:

- a wide range of reinforced concrete hollow-core floor slabs;
- ribbed reinforced concrete slabs;
- reinforced concrete overhead power line support posts;
- reinforced concrete fence panels;
- reinforced concrete glass-type foundations for fencing;
- reinforced concrete curb stones;
- KS 10-9 wall rings;
- PO-10 support slabs for wells;
- a wide range of concrete basement wall blocks;
- reinforced concrete edge trays;
- heavy concrete of various grades;
- concrete mixes of various grades;
- construction mortar.

Petrochemical industry

Uzbekneftegaz JSC

Uzbekneftegaz JSC is a vertically integrated three—tier company in the form of a joint-stock company, uniting more than 190 enterprises providing all activities of the oil and gas industry, with about 120 thousand employees.

Uzbekneftegaz JSC consists of 5 joint—stock companies - Uzburneftegaz JSC — carries out geological exploration, exploration and production drilling of oil and gas wells, Uzneftegazdobycha JSC — develops oil and gas fields, oil, gas and gas condensate production, natural gas processing, Uztransgaz JSC — carries out transportation and underground gas storage, JSC «Uznefteprodukt» — carries out the processing of oil and gas condensate, as well as sells petroleum products to sectors of the economy, JSC «Uzneftegazmash» — manufactures engineering products for enterprises and organizations of the oil and gas and gas chemical complexes.

Finished export-oriented products: lump and granulated sulfur, polyethylene (grades F-0120, F-0320, B-Y460, P-Y342, P-Y456, I-0760, I-1561), technical oils (industrial oil I-12A, I-20A, I-40A, I-50A, base oil SN-150, SN-100, motor oil M20A and petrolatum PS-55), etc.

Lump sulfur

Purpose and advantages of the product: Technical gas lump sulfur has the widest range of use in the chemical, agricultural, medical, food, paper, rubber industries, is used in the production of fertilizers, matches and gunpowder, dyes.

Specification

Mass fraction of sulfur not less than	99,90%
Mass fraction of ash	0,05%
Mass fraction of organic substances	0,06%
Mass fraction of acids in terms of sulfuric acid not more than	0,004%.
Mass fraction of water	0,20%

Packaging: in polypropylene bags of 1 and 1.5 tons.

Transportation: in bulk and packaged.

Quality standard: GOST 127.1-93

Granulated sulfur

Product purpose and advantages: Essential for the growth of many plants. About half of the sulfur produced is used in the production of sulfuric acid. Sulfur is also used for the vulcanization of rubber, as a fungicide in agriculture and as colloidal sulfur - a medicinal product. Also, sulfur in sulfur-bitumen compositions is used to produce sulfur asphalt, and as a substitute for Portland cement - to produce sulfur concrete. Sulfur is used to produce pyrotechnic compositions, was previously used in the production of gunpowder, and is used to produce matches.

Specification

Mass fraction of sulfur not less than	99,90%
Mass fraction of ash	0,05%
Mass fraction of organic substances	0,06%
Mass fraction of acids in terms of sulfuric acid not more than	0,004%.
Mass fraction of water	0,20%

Packaging: in polypropylene bags of 1 and 1.5 tons.

Transportation: in bulk and packaged.

Quality standard: GOST 127.1-93

Polyethylene

Product purpose and advantages: The production process of the main product - polyethylene - is carried out using liquid-phase polymerization technology SCLAIRTECH, under the license of the North American company NOVA Chemicals. Polyethylene produced by this technology can be used to manufacture any products that come into contact with food products and the human body without harm to health.

Specification

Grades	Specification
B-Y 460	Blow molding - Forming bottles for packaging and storing liquids
F-0120 и F-0320	Film grades - for general-purpose films and film products, thin film (the main layer of stretch films)
I-0760 и I-1561	Injection grades - for the manufacture of containers - baskets, boxes, large-sized and thin-walled products (containers, boxes)
P-Y 342 и P-Y 456	Pipe grades - pipe products (pressure), waste pipes (sewage, drainage).

Packaging: in polypropylene bags of 50 kg.

Transportation: packed.

Technical oils

Industrial oil

Technical characteristics

	I-12A grade	I-20A grade	I-40A grade	I-50A grade
Kinematic viscosity at 40C, mm2/sec, within	13–21	25–35	51–75	75–95
Acid number mg KON per lg of oil, no more than	0.02	0,03	0,05	0,05
Ash content, %, no more than	0.005	0.005	0.005	0.005
Mass fraction of sulfur, %, no more than	1.0	1.0	1,1	1,1
Content of mechanical impurities	No	No	No	No
Mass fraction of water, %, no more than	Millitraces	Millitraces	Millitraces	Millitraces
Density at 20C, kg/m3, no more than	880	890	900	910
Pour point, C, no higher than	Minus 15	Minus 15	Minus 15	Minus 15
Color on a CNT colorimeter, CNT units, no more than	2.5	3.0	4.5	5.5
Flash point, determined on an open crucible, C, no lower than	170	180	210	225
Content of solvents in selectively refined oils	no	no	no	no

Purpose: High-quality mineral base oil is a reliable basis for obtaining modern lubricants

Motor oil

Technical characteristics

	M20A grade
Kinematic viscosity at 100 C, mm2/sec, within	20
Viscosity index, not less than	85
Acid number mg KON per lg of oil, not more than	0.03
Flash point, determined on an open crucible, C, not lower	225
Pour point, C, not higher	Minus 15
Content of mechanical impurities	No
Mass fraction of sulfur, %, not more than	1.5
Density at 20 C, kg/m3, not more than	905
Mass fraction of water, %, not more than	Milli-traces
Coking ability, %, not more than	0.9
Content of solvents	No
Ash content, %, not more than	0.005
Color on a CNT colorimeter, CNT units, not more than	7.0

Purpose: Motor oil brand M-20A, used for lubrication of internal combustion engines of ground equipment.

Gatch-II fraction

Technical characteristics

Mass fraction of oil, %, not more than	15%
Melting point, C, not lower	47
Mass fraction of sulfur, %, not more than	0.7
Mass fraction of water, %, not more than	Milli-traces
Mass fraction of mechanical impurities, %, not more than	no
Flash point, determined on an open crucible, C, not lower	160

Purpose: Used for the production of paraffin. Appearance: crystalline mass from yellow to brown.

JSC Uzkimyosanoat

JSC Uzkimyosanoat is an integrated corporate structure that unites chemical enterprises of the Republic of Uzbekistan. In terms of volume and types of produced mineral nitrogen and phosphorus fertilizers, the enterprises of JSC Uzkimyosanoat occupy leading positions in Central Asia, being the largest producer of ammonia, urea, ammonium nitrate, ammonium sulfate, ammophos and nitrophos.

The company includes 13 enterprises producing mineral fertilizers, chemical plant protection products, cosmetic products, hygiene products, baby diapers, car tires, and plastic products. Large enterprises of JSC «MAHAM-CHIRCHIQ», JSC «Gizz Plastics», JSC «AmmophoSmaxam», JSC «Kukon superphosphate Zavody», UP «Dehkanabad plant of potash fertilizers», JSC «Samarqandkime», JV-AO «Electrochemzavod», UP «Kungrad Soda Plant», JSC «Ferganaazot», JSC Navoiazot, JV-Navoiy Hunan Pulp LLC, JV-Navoiy Beauty Cosmetics LLC.

Nitrogen-Phosphorus Fertilizer (Afu) Ts 00203068-27: 2015

The high phosphorus content helps to increase the resistance of plants to adverse environmental factors (droughts and frosts), as well as increases the resistance of plants to diseases, promotes the accumulation of sugar in root crops and fruits. This fertilizer is used on all types of soils for basic and post-sowing application for all crops.

Name of the indicators	
Physical form	granulated product without foreign mechanical impurities
Particle size distribution mass fraction of granules of the size:	
- less than 1 mm, %, no more	3
- from 1 to 4 mm, %, no less	95
- more than 6 mm, %	absent
Mass fraction of the sum of ammonium and nitrate nitrogen, %	29÷32
Mass fraction of total phosphates, %, no less	4
pH 10% aqueous solution, no less	4
Mass fraction of calcium and magnesium nitrates in terms of CaO, %	0.2÷0.5
Friability, %, no less	100

Safety requirements: AFU is a low-hazard substance. According to the degree of impact on the body, it belongs to the 4th hazard class. AFU is an oxidizer and is fire hazardous. A fire caused by the decomposition of nitrate should be extinguished with plenty of water.

Packaging: in polypropylene bags with a valve with a polyethylene liner.

Transportation: in bags by all types of transport, except air, in covered vehicles in accordance with the rules for the carriage of goods in force for this type of transport.

Storage: AFU packed in polyethylene containers is stored in covered, dry and clean warehouses that protect the product from moisture, excluding the ingress of precipitation and groundwater, separately from other materials and substances.

Guaranteed storage period: 6 months from the date of manufacture.

Ammonium Sulphate (NH₄)₂ SO₄ GOST 9097-82

The fertiliser contains 21% nitrogen in ammonium form and in excess of 24% sulphur in the form of sulphate ion, which is readily available for plant nutrition. The product is slightly hygroscopic, does not cake much, disperses well and dissolves quickly in water. It does not spread in the air and remains friable. Ammonium sulfate is a crystalline powder with a white or light yellow/pink hue. Furthermore, it is utilised as a fertiliser. Ammonium sulphate can be applied in both spring and autumn, as the ammonium nitrogen is not washed out of the soil and is readily absorbed by plants.

Name of the indicators	
Physical form	white or transparent crystals
Mass fraction of nitrogen in terms of dry matter, %, not less	21
Mass fraction of water, %, not more than: granulated crystalline	0,6 0,2
Mass fraction of free sulfuric acid, %, not more than: granulated crystalline	0,5 0,03
Particle size distribution for granulated: - 1–4 mm, %, not less for crystalline: - more than 0.5 mm, %, not less - residue on a 6 mm sieve	90 80 отсут.
Friability, %, not less	100

Safety requirements: ammonium sulfate is a non-flammable substance.
Packaging: in polypropylene bags of 25, 40 and 50±1 kg.
Transportation: in bulk and packaged.
Storage: in warehouses that protect the product from moisture.
Guaranteed storage period: 6 months from the date of manufacture.
For retail, the guaranteed storage period of ammonium sulfate is 12 months from the date of manufacture.
Agrochemical storage period is unlimited.

PS-AGRO

«PS-Agro» is a mineral fertilizer intended for agriculture and retail trade as a granulated complex mixed sulfur-containing phosphorus fertilizer containing calcium in an assimilable form and nitrogen in ammonia form, for root feeding of agricultural crops on all types of soil.

Name of the indicators	Grade standard	
1. Mass fraction of total phosphates, %	41 +/- 1	38 +/- 1
2. Mass fraction of total nitrogen, %	4 +/- 1	5 +/- 1
3. Mass fraction of potassium, in terms of CaO, %	10 +/- 1	13 +/- 1
4. Mass fraction of sulfur, in terms of SO ₃ , %	5	7
5. Mass fraction of water, no more than, %	2	2
6. pH of 1% solution, no less than, %	3,5	3,5
7. Granulometric composition:		
mass fraction of granules of size:		
from 1 mm to 4 mm, no less than, %	90	90
less than 1 mm, no more than, %	10	10
less than 6 mm, %	100	100
8. Statistical strength of granules, no less than, Mpa (kg/cm)	3,0 (30)	3,0 (30)
9. Friability, %	100	100

Application: applied as a highly effective water-soluble nitrogen-phosphorus fertilizer, used on various soils for all crops, can be used in protected soil conditions, as well as for indoor and balcony floriculture.

Transportation: transported in packaged form - polyethylene bags, polypropylene, polyethylene, paper bags, big-bens, containers or in bulk.

Storage: stored in closed warehouses, excluding the ingress of precipitation and groundwater. Warranty period of storage and shelf life - unlimited. The company has developed, implemented and certified a management system in accordance with the requirements of ISO 9001: 2008 and O'z DSt ISO 9001: 2009.

Ammonia Aqueous Technical (NH₃H₂O) GOST 9-92

Ammonia aqueous technical is a colorless transparent liquid with a characteristic pungent odor, free of mechanical impurities. It is mixed with water and alcohol in all proportions.

Ammonia aqueous technical is produced in two grades: «A» and «B».

- grade «A» is used in various industries.
- grade «B» in agriculture: as a nitrogen fertilizer. From an economic point of view, nitrogen of this type of fertilizer is the cheapest. The highest effect from the use of ammonia is achieved with autumn application to the soil, it is better retained by the soil than ammonium nitrogen of solid fertilizers.

Name of indicators	A	B
Physical form	clear colorless or yellowish liquid	
Mass fraction of ammonia, %, not less	25	25
in terms of nitrogen, %, not less	Not norm.	20,5
Mass concentration of non-volatile residue, g/dm ³ , not more	0.07	Not norm.
Mass concentration of carbon dioxide, g/dm ³ , not more	Not norm.	8

Safety requirements: non-flammable and non-explosive liquid. Aqueous ammonia belongs to the 4th hazard class. When working, use personal protective equipment and observe personal hygiene rules.

Transportation: transported by rail, road and water transport in sealed vehicles in accordance with the cargo transportation rules in force for this type of transport.

Product grade «A» is transported in railway tanks and ammonia trucks.

Product grade «B» is transported in tanks with bottom discharge and ammonia trucks.

Storage: in sealed containers in covered areas or in specially designed storage tanks.

Guaranteed storage period: 1 year from the date of manufacture.

Ammonium Nitrate Grade «B» NH₄NO₃ GOST 2-2013

Ammonium nitrate is a universal nitrogen fertilizer consisting of 34.4% nitrogen - half in the mobile, quickly assimilated nitrate form, and half in the slow and long-acting ammonia form. The fertilizer is completely and quickly absorbed by plants, it has a wide effect on various agricultural crops. The yield of all agricultural crops increases significantly.

Name of the indicators	A OKP 21
Total mass fraction of nitrate and ammonium nitrogen in terms of NH ₄ NO ₃ in dry matter, %, not less than	98
Mass fraction of water with additives of calcium and magnesium nitrates, %, not more than	0.3
Mass fraction of substances insoluble in 10% nitric acid solution, %, not more than	0.2
Particle size distribution: - from 1 to 3 mm, %, not less than - from 1 to 4 mm, %, not less than - from 2 to 4 mm, %, not less than - less than 1 mm, %, not more than - more than 6 mm, %	93 Not norm. Not norm. 4 0.0
pH of 10% aqueous solution, not less than	5.0
Static strength of granules, N/granule (kg/granule), not less than	5 (0.5)
Friability, %, not less than	100

Safety requirements: ammonium nitrate is a low-hazard substance, is an oxidizer and is fire hazardous.

According to the degree of impact on the body, nitrate belongs to the 4th hazard class.

Packaging: in polypropylene bags of 50±1 kg.

Transportation: in bulk and packaged.

Storage: in covered, dry and clean warehouses that protect the product from moisture, separately from other materials and substances.

Guaranteed storage period: 6 months from the date of manufacture.

Ammophos GOST 18918-85

AMMOPHOS is made in the form of gray granules, has good physical and chemical properties: does not cake, does not stick, does not lump, is not hygroscopic and does not freeze during storage, is non-toxic, fire- and explosion-proof. Ammophos consists mainly of monoammonium phosphate ($\text{NH}_4\text{H}_2\text{PO}_4$) with an admixture of diammonium phosphate ($(\text{NH}_4)_2\text{HPO}_4$). Ammophos is produced with the following content of nutrients:

Name of the indicators	Top grade	1-st grade
Mass fraction of digestible phosphates, %	n/m 46	44 +/- 1
Mass fraction of water-soluble, %	-	-
Mass fraction of total nitrogen, N, % ammonia nitrogen, %	10+/- 1 -	10+/- 1
Mass fraction of water, no more than, %	1,0	1,0
Particle size distribution: Mass fraction of granules: less than 1 mm, no more than, % from 1 mm to 4 mm, no less than, % less than 6 mm, %	2 95 100	2 95 100
Statistical strength of granules, no less than, Mpa (kgf/cm)	3,0 (30)	3,0 (30)
Friability, %	100	100

Application: as a highly effective water-soluble nitrogen-phosphorus fertilizer used on various soils for all crops, can be used in protected soil conditions, as well as for indoor and balcony floriculture. Ammophos is suitable for all application methods: base, pre-sowing and for top dressing.

Transportation: in packaged form - polyethylene bags, polypropylene, polyethylene, paper bags, big bens, containers or in bulk.

Storage: in closed warehouses that exclude the ingress of precipitation and groundwater. The guaranteed shelf life of ammophos in bulk is 9 months from the date of manufacture of the product. For packaged ammophos guaranteed storage period is 24 months from the date of manufacture. Ammophos has an unlimited shelf life. The enterprise has developed, implemented and certified a management system in accordance with the requirements of ISO 9001: 2008 and O'z DSt ISO 9001: 2009.

Carbon dioxide GOST 8050

Basic physical and chemical properties

Name	Indicator
Chemical formula	CO2
Molecular mass	44.01
Physical form	Colorless, odorless liquid
Critical temperature	31.1°C
Critical pressure	7.4 MPa
Boiling point (sublimation) at atmospheric pressure	minus 78.5°C

Technical characteristics

Presence of odor and taste	stands up to the test		
Mass fraction of water, %, not more than	stands up to the test		
Mass concentration of water vapor at a temperature of 20° C and a pressure of 101.3 kPa (760 mm Hg), g/cm ³ , not more than, which corresponds to the saturation temperature of carbon dioxide with water vapor at a pressure of 101.3 kPa (760 mm Hg) and a temperature, ° C, not higher	0.037 minus 48	0.184 minus 34	not standardized
Presence of aromatic hydrocarbons	stands up to the test		

Application: Carbon dioxide is used in various ways:

- as a leavening agent;
- in the production of carbonated drinks;
- dry ice, for cooling, freezing and storing food products in direct and indirect contact with them;
- for drying casting molds;
- cylinders with liquid carbon dioxide are widely used as fire extinguishers
- as a protective environment during wire welding;
- in cylinders, in pneumatic weapons (in gas-cylinder pneumatics);
- as an energy source for engines in aircraft modeling.

Packaging and storage: Steel cylinders and tanks are used for filling liquid carbon dioxide. Guaranteed storage period of liquid carbon dioxide:

- in cylinders - 2 years from the date of production;
- in tanks - 6 months from the date of manufacture

Transportation: High-pressure liquid carbon dioxide is supplied in cylinders with a capacity of up to 50 m3 under pressure. Liquid low-temperature carbon dioxide is supplied in isothermal tanks or tank containers.

Liquid carbon dioxide is supplied in pressure vessels:

- in cylinders according to GOST 949-73;
- in cylinders for household siphons according to GOST 19136-80;
- by road in isothermal tanks of the TsZhU type

Cellulose diacetate

Cellulose diacetate is used for the production of chemical fiber and acetate silk.

Technical characteristics

Name	CAD from cotton cellulose			CAD from wood cellulose
	1 grade	2 grade	3 grade	
Physical form	Amorphous or granule-like particles			
Mass fraction of bound acetic acid, %, within	54,2–55,5	54,2–55,5	54,2–55,5	54.2–55.5
Viscosity increment by VPF-4, not less than	0,34	0,33	0,32	0.34
Dynamic viscosity of 23% cellulose diacetate solution, Pa.s, within	70–120	80–130	90–140	not more than 90
Color by UFC, %, within	0,20–0,40	0,20–0,50	0,20–0,60	0.4–1.0
Filtration, g/cm², within	3,5–5,0	2,5–3,5		not less than 18
Mass fraction of free acetic acid, %, not more than	0,02	0,02	0,02	0.0035
Mass fraction of low-molecular fractions, %, not more than	5	6	7	–
Mass fraction of water, %, not more than	3,5	3,5	3,5	3.5
Color change upon heating	No color change compared to the original			
	at 195°C	at 190°C	at 180°C	at 200°C
Mass fraction of residue after calcination, %, not more than	0,1	0,25	0,25	0,05
Transparency, %	–	–	–	50 ± 5
Bulk density, kg/m³, within	–	–	–	300–450

Note: the requirements for cellulose diacetate intended for export must comply with the requirements of the contract (agreement) with foreign buyers.

Packing: in polypropylene bags with a polyethylene film liner. DAC must be stored in a packaged form, in a dry, closed room, excluding direct sunlight, moisture and acid vapors.

Transportation: by all types of covered vehicles in accordance with the rules for the carriage of goods in effect for each type of transport, subject to the exclusion of moisture and the preservation of its quality.

Storage: storage period is one year from the date of manufacture.

Potassium chloride brand «Finely crushed», grade 1 (pink) GOST 4568-95

Physical form: small crystals of various shades of red-brown color.
Application: potassium chloride is used in agriculture as a mineral fertilizer. It is also intended for the production of leather substitutes, synthetic rubber, baker’s and fodder yeast, as well as for the production of medicinal and prophylactic salt.

Technical characteristics

Name of the indicators	Standard for fine grade, grade 1
Appearance	Fine crystals of grayish-white color or fine grains of various shades of red-brown color
Mass fraction of potassium in terms of K ₂ O, %, not less	60
Mass fraction of water, %, not more	1.0
Particle size distribution (mass fraction of fractions), %	not standardized
Dynamic strength (mass fraction of intact granules), %, not less	not standardized
Friability, %	100

Note: the requirements for cellulose diacetate intended for export must comply with the requirements of the contract (agreement) with foreign buyers.
Packing: in polypropylene bags with a polyethylene film liner. DAC must be stored in a packaged form, in a dry, closed room, excluding direct sunlight, moisture and acid vapors.
Transportation: by all types of covered vehicles in accordance with the rules for the carriage of goods in effect for each type of transport, subject to the exclusion of moisture and the preservation of its quality.
Storage: storage period is one year from the date of manufacture.

Urea «B» grade H₂ N-CO-NH₂ GOST 2081-2010

Very widely used in industrial applications. Used in large quantities in the production of plastics, adhesives, and resins. In the pharmaceutical industry, urea is used to prepare a number of drugs. It is used as a softener in the production of cosmetic creams and lotions, in the production of synthetic dyes and detergents.

Name of indicators	Top grade	1 grade
Mass fraction of nitrogen in terms of dry matter, %, not less than	46,3	46,2
Mass fraction of biuret, %, not more than	0,6	1,4
Mass fraction of free ammonia, %, not more than, for urea: - crystalline - granular	0,01 0,02	0,01 0,03
Mass fraction of water, %, not more than: - hygroscopic - total	0,3 0,6	0,3 0,6

Safety requirements: urea is non-flammable, fire-proof and explosion-proof under normal conditions. According to the degree of impact on the human body, urea is classified as a moderately hazardous substance of hazard class 3.

Packaging: in polypropylene bags of 25, 40 and 50 ± 1 kg.

Transportation: in bulk and packaged.

Guaranteed storage period: 6 months from the date of manufacture.

The guaranteed shelf life of urea intended for retail sale is 2 years from the date of manufacture.

Complex Fertilizer — Fertilizer Mixture TSh 6.3-85: 2007

Complex fertilizers — fertilizer mixture is a special composition for treating plants with zinc deficiency or shortage. It is used in the form of powder or aqueous solution. Complex fertilizers — fertilizer mixture dissolve in water and contain three main nutrients: nitrogen, phosphorus and potassium. Zinc is added as a microelement, which promotes the absorption of the main macroelements.

Name of the indicators	Standard for fine grade, grade 1
Physical form	fractions of different colors or powder
Total nitrogen (N ₂), %, not less	18
Mass fraction of P ₂ O ₅ assimilable, %, not less	9
Mass fraction of K ₂ O, %, not less	5
Mass fraction of moisture, %, not more	3
Sum of microelement ions in terms of zinc (Zn), %, not less	1

Safety requirements: work with complex fertilizers (fertilizer mixtures) must be carried out in compliance with personal protective measures. The consumer is recommended to work in rubber gloves when preparing solutions. When working with complex fertilizers, do not smoke, eat or drink. If the fertilizer solution gets on your skin, rinse the area with running water. If it gets into your eyes, rinse with plenty of water. If it gets into your stomach, drink several glasses of a weak pink solution of potassium permanganate, induce vomiting. After work, wash your face and hands with soap, rinse your mouth. Mixing with other substances is strictly prohibited!

Packaging: in polymer bags and in paper or polyethylene bags weighing 1, 3, 5, 10, 25 kg.

Transportation: by all types of transport in accordance with the rules for the carriage of goods in force for this type of transport.

Storage: in covered, dry and clean premises protected from moisture, away from heating devices, inaccessible to children and animals, separately from food products and medicines.

Guaranteed storage period: 24 months.

The agrochemical shelf life is unlimited.

Sulfuric acid technical GOST 2184-77

Sulfuric acid Technical is a colorless oily liquid, sometimes colored dark due to carbonization of organic substances.

The chemical composition of sulfuric acid is expressed by the formula H_2SO_4 . Sulfuric acid mixes with water in any proportions. The main physicochemical properties of sulfuric acid solutions depend on the ratio of water and sulfur trioxide in it. The density of sulfuric acid with a mass fraction of monohydrate of 100% at a temperature of 20 °C is 1.8305 g / cm³.

Sulfuric acid Technical is fire and explosion safe, when it comes into contact with water, a violent reaction occurs with a large release of heat, vapors and gases. Sulfuric acid is toxic.

Name of the indicators	Standard for contact acid		
	Improved	Technical	
		1 grade	2 grade
Mass fraction of monohydrate	92,5-94,0	not less than 92,5	
Mass fraction of iron (Fe), no more than, %	0,006	0,02	0,1
Mass fraction of nitrogen oxides (N_2O_3), no more than, %	0,00005	not standardized	

Storage: technical sulfuric acid of the 1st and 2nd grades should be stored in steel or special steel tanks, both unlined and lined with acid-proof brick or acid-resistant material. Improved sulfuric acid should be stored at the consumer's in clean, hermetically sealed stainless steel tanks or tanks made of St 3 steel according to GOST 380, lined with acid-proof tiles or bricks.

Transportation: transported by rail in tanks and by road in containers and barrels in accordance with the cargo transportation rules applicable to each type of transport.

Application: technical sulfuric acid is widely used in various sectors of the national economy: in the production of various mineral salts, organic products, aniline dyes, explosives, in oil, metallurgy, metalworking and other industries. The guaranteed storage period for sulfuric acid is one month from the date of manufacture.

Technical methanol grade «A» GOST 2222-95

Methanol is one of the most important organic products, the simplest representative of saturated monohydric alcohols. Methanol is miscible in all respects with water and many organic liquids, but does not mix with aliphatic hydrocarbons. It absorbs water vapor, carbon dioxide and some other substances well.

Main physical and chemical properties

Name of the indicator	Standard
Physical form	Colorless transparent liquid without insoluble impurities
Molecular mass	32.04
Density at 20 °C, g/cm3	0.791-0.792
MPC in industrial premises, mg/m³	5.0

Technical characteristics

Name of the indicator	Standard	
	A grade	B grade
Appearance	Colorless transparent liquid without insoluble impurities	
Density at 20 °C, g/cm³	0,791-0,792	
Mass fraction of water, %, no more	0,05	0,08
Miscibility with water	Mixes with water without leaving any traces of turbidity or opalescence	
Temperature limits: A) boiling point, °C B) 99% of the product is distilled within the limits, °C, no more	64,0-65,5	
	0,8	1
Mass fraction of free acids in terms of formic acid, %, no more	0,0015	
Mass fraction of aldehydes and ketones in terms of acetone, %, no more	0,003	0,008
Mass fraction of volatile iron compounds in terms of iron, %, no more	0,0001	0,0005
Test with potassium permanganate, min, no less	60	30
Mass fraction of ammonia and amino compounds in terms of ammonia, %, no more	0,00001	-
Mass fraction of chlorine, %, no more	0,0001	0,001
Mass fraction of sulfur, %, no more	0,0001	0,001
Mass fraction of non-volatile residue after evaporation, %, no more	0,01	0,002
Specific electrical conductivity, cm/m, no more	3*10-5	-
Mass fraction of ethyl alcohol, %, no more	0,01	-
Color on the platinum-cobalt scale, Hazen units, no more	5	-

Application: In the chemical industry, methanol is used as a semi-finished product. In the largest quantities, methanol is used to obtain formaldehyde, acetic acid, synthetic rubber, and also as a methylating agent in the production of dimethyl terephthalate, methylamine, methyl methacrylate, pentaerythritol, and urotropine. Methanol is consumed in large quantities to obtain various chemicals, such as chlorophos, malathion, methyl chloride and bromide, dimethyl sulfate, vinyl methyl ether, dimethylaniline, dimethyl chlorothiophosphate, and methyl mercaptan.

Packaging: Methanol is poured into specially designated railway tanks without a bottom drain device, tank trucks, steel barrels with a capacity of 200 dm3 according to GOST 13950.

Transportation: Methanol is transported by all types of transport in accordance with the rules for the carriage of goods in force for this type of transport. Methanol should be transported by rail only in railway tanks, and in barrels - by road.

Storage: Methanol is stored in compliance with the rules for storing flammable and toxic liquids and in accordance with the «General Sanitary Rules for Working with Methanol». The guaranteed storage period of technical methanol is six months from the date of manufacture.

Sodium Nitrate Technical GOST 828-77

Sodium nitrate technical is used in the production of reagents, crystal, glass, in soldering and welding of metals, and also as a nitrogen fertilizer with a nitrogen content of 16% in nitrate form.

Name of the indicator	Standard for grade		
	A grade		B grade
	top quality category	1 quality category	top quality category
	top grade	1 grade	
Physical form	white, transparent crystals with a grayish or yellowish tint		
Mass fraction of sodium nitrate in terms of dry matter, %, not less	99,8	99,5	99,5
Mass fraction of water, %, not more	0,5	1	0,5
Mass fraction of water-insoluble substances, %, not more	0,03	0,04	0,03
Mass fraction of chloride salts in terms of NaCl, %, not more	0,15	0,5	0,3
Mass fraction of oxidizable substances in terms of NaNO ₂ , %, not more	0,01	0,015	0,2
Mass fraction of iron in terms of Fe ₂ O ₃ , %, not more	0,001	-	-
Mass fraction of chromium in terms of Cr ₂ O ₃ , not more	0,0001	-	-

Note: in sodium nitrate intended for retail trade, the indicators of points 4, 5, 6, 7, 8 are not standardized, the mass fraction of sodium nitrate in terms of nitrogen should not be less than 16%, the mass fraction of water is allowed to be no more than 1.7%. For enterprises producing sodium nitrate grade B as a finished product, the mass fraction of chloride salts in terms of NaCl is allowed to be no more than 0.4%.

Packaging: in polypropylene bags with polyethylene liners. Must be stored in a closed warehouse in packaged form.

Transportation: sodium nitrate is transported in covered railway cars and by road.

Storage: storage period is not limited.

Low density ammonium nitrate Ts 00203068-40: 2016

Low density ammonium nitrate (porous saltpeter) is intended for industrial purposes.

Name of the indicator	Standard
Physical form	white or slightly colored granules
Mass fraction of ammonium and nitrate nitrogen in terms of NH_4NO_3 in dry matter, %, not less	98.5
Mass fraction of water, %, not more than: - by K. Fischer method - by drying method	0.3 0.2
Nitrite content	must withstand test according to clause 4.6
Hydrogen index (pH) of 10% solution	4.5 ± 6
Bulk density, g/cm^3	0.65 ± 0.75
Granulometric composition: mass fraction of granules larger than 2.38 mm, %, not more mass fraction of granules smaller than 0.42 mm, %, not more	2.5 2.0

Safety requirements: work with low-density ammonium nitrate must be carried out in compliance with personal protective equipment in special clothing.

Packaging: in polypropylene bags no more than 50 kg, big bags up to 2 tons.

Transportation: by all types of transport, except air, in covered vehicles or gondola cars, in accordance with the rules for the carriage of goods in force for this type of transport.

Storage: in covered, dry and clean warehouses that protect the product from moisture. Storage and transportation are carried out separately from other materials and substances.

Complex concentrated NPK fertilizer

Complex concentrated NPK fertilizer is made in the form of granules of light shades of various colors, has good physical and chemical properties: does not cake, does not stick, does not lump, is not hygroscopic and does not freeze during storage, is non-toxic, fire- and explosion-proof. Complex concentrated NPK fertilizer is a complex mixed fertilizer obtained in one technological process containing in its composition phosphates, in a well-digestible form, nitrogen in ammonia form and potassium in the form of potassium chloride. The composition of the original nitrogen-phosphorus fertilizer determines the composition of the resulting complex concentrated NPK fertilizer. These fertilizers may contain mono- and diammonium phosphates, mono- and dicalcium phosphates, hydrophosphates, magnesium hydroammonium phosphates, and ammonium sulfate.

Name of the indicator	Standard for grade	
	1,0: 1,0: 1,0	0,5: 1,0: 0,5
Physical form	Granules of light shades of various colors	
Mass fraction of total phosphates, %	15 +/- 1	24 +/- 1
Mass fraction of total nitrogen, %	15 +/- 1	12 +/- 1
Mass fraction of potassium, in terms of K ₂ O, %	15 +/- 1	12 +/- 1
Mass fraction of water, no more than, %	2	2
Granulometric composition:		
Mass fraction of granules:		
from 1 mm to 4 mm, no less than, %	95	95
less than 1 mm, no more than, %	10	10
more than 6 mm, %	abs.	abs.
Statistical strength of granules, no less than, Mpa (kgf/cm)	3,0 (30)	3,0 (30)
Friability, %	100	100

Application: used as a highly effective water-soluble nitrogen-phosphorus fertilizer applied on various soils for all crops, can be used in protected soil conditions, as well as for indoor and balcony floriculture. Complex concentrated NPK fertilizer is suitable for all application methods: base, pre-sowing and for top dressing.

Transportation: transported in packaged form - polyethylene, polypropylene, paper bags or in bulk.

Storage: stored in closed warehouses that exclude the ingress of atmospheric precipitation and groundwater. The guaranteed shelf life of complex concentrated NPK fertilizer in bulk is 9 months from the date of manufacture of the product. For complex NPK concentrated fertilizer packaged, the guaranteed shelf-life is 24 months from production date. The shelf-life of complex NPK fertilizers is unlimited.

Potassium Sulphate Ts 00203068-48: 2016

Potassium sulphate is a highly effective concentrated potassium fertilizer with a potassium content of at least 48%. Potassium sulphate is intended for agriculture and retail sale as a fertilizer. It is used for all crops on any soil, especially effective on light sandy soils for chlorine-sensitive crops. The fertilizer improves the taste of potatoes, fruits and vegetables, increases plant resistance to pests and diseases, and also increases the winter hardiness of fruit trees.

Name of the indicator	Standard
Physical form	Crystalline powder of cream color, grayish or reddish tint is allowed
Mass fraction of potassium in terms of K ₂ O, %, not less than	48
Mass fraction of chlorides, %, not more than	2
Mass fraction of water, %, not more than	1
Mass fraction of water-insoluble residue, %, not more than	1

Safety requirements: non-flammable, fire and explosion-proof under normal conditions. Wash your hands thoroughly after handling the product. When working with fertilizer, personal protective measures should be taken.

Packaging: 3 kg, 5 kg are packed in polyethylene bags, PVC film bags, and 25 kg, 30 kg, 40 ± 1 kg in polyethylene bags.

Transportation: transported by all types of transport in accordance with the rules for the carriage of goods in force for this type of transport.

Storage: in covered, dry and clean rooms, protected from moisture, away from heating devices, inaccessible to children and animals, separately from food products and medicines.

Guaranteed storage period: 3 years from the date of manufacture.

Superphosphate

Superphosphate, a complex nitrogen-phosphorus fertilizer intended for agriculture and retail trade.

Name of the indicator	Standard for grade	
	Enriched	
	1 grade	2 grade
Physical form	Mixture of granules with grayish powder	
Mass fraction of total phosphates in terms of P2O5, %, not less than	22 +/- 1	18 +/- 1
Ratio of the mass fraction of water-soluble phosphates to the mass fraction of total phosphates, %	50	50
Mass fraction of nitrogen, %	2,5 +/- 1,0	2,5 +/- 1,0
Mass fraction of free acid in terms of P2O5, %, not more than	0,5	0,5
Mass fraction of water, not more than, %	2	2
Granulometric composition: mass fraction of granules of size: less than 1 mm, not more than, % from 1 mm to 4 mm, not less than, % more than 6 mm, %	15 70 1	not standardized not standardized -
Granule crushing strength, Mpa (kgf/cm2)	2,5 (25)	2,5 (25)
Friability, %	100	100

Application: applied in various zones on all types of soils for all types of agricultural products, vegetables, fruit and berry and ornamental crops, can be applied in protected soil conditions.

Transportation: transported in packaged form - polyethylene bags, polypropylene, polyethylene, paper bags, big bags, containers or in bulk.

Storage: stored in closed warehouses, excluding the ingress of precipitation and groundwater. The guaranteed shelf life for agriculture is 6 months, for retail - 12 months from the date of manufacture. Expiration date is unlimited.

Suprefos Nitrogen-Sulfur-Containing

Suprefos Nitrogen-Sulfur-Containing (N: P: Mg: Ca: S) is a neutral, concentrated, complex-mixed nitrogen-phosphorus fertilizer, created on the basis of the most valuable phosphorus fertilizer - precipitate, ammonium sulfate (containing ammonia nitrogen and mobile sulfur) and ammonium phosphates, contains more than 85% of active substances: nitrogen, phosphorus, sulfur, calcium, magnesium salts - evenly distributed in each granule, in a form accessible to plants.

Name of the indicator	Standard for grade	
	A	
	Top grade	1 grade
Content of active substances, not less than, %	90	85
Mass fraction of total phosphates, %	27 +/- 1	24 +/- 1
Content of the mass fraction of water-soluble phosphates, %	8 +/- 1	6 +/- 1
Mass fraction of ammonia nitrogen, %	13 +/- 1	12 +/- 1
Mass fraction of magnesium, in terms of MgO, not less than, %	0,5	0,5
Mass fraction of calcium, in terms of MgO, not less than, %	12	14
Mass fraction of sulfur, in terms of SO ₃ , not less than, %	20	25
Mass fraction of water, not more than, %	2	2
pH of 1% solution, not less than, %	5,5	5,5
Granulometric composition: mass fraction of granules of size:		
less than 1 mm, not more than, %	95	95
from 1 mm to 4 mm, not less than, %	5	5
more than 6 mm, %	100	100
Granule crushing strength, Mpa (kgf/cm ²)	3,0 (30)	3,0 (30)
Friability, %	100	100

Application: applied to all types of soils for all types of crops, can be applied in protected soil conditions, as well as for indoor and balcony floriculture. Suprefos is suitable for all methods of application: main, pre-sowing, is characterized by an extended period of action.

Transportation: transported in packaged form - polyethylene bags, polypropylene, polyethylene, paper bags, big bags, containers or in bulk.

Storage: stored in closed warehouses, excluding the ingress of precipitation and groundwater. Storage period of suprefos is unlimited. The company has developed, implemented and certified a management system in accordance with the requirements of ISO 9001: 2008 and O'z DSt ISO 9001: 2009.

Liquid Nitrogen Fertilizers (LNF) TS 00203068-06: 2014

Liquid nitrogen fertilizers (LNF) are a new type of nitrogen fertilizer consisting of urea (30%) and ammonium nitrate (40%) in liquid form.

Using LNF in agriculture has its advantages over solid fertilizers.

Liquid nitrogen fertilizers are free from the disadvantages that are often observed in solid fertilizers. They are free-flowing, do not dust or cake. Wet weather and even rain do not have a negative effect on them.

Liquid nitrogen fertilizers do not contain free ammonia, so they can be applied superficially under plowing, cultivation or in rows during sowing. LNF can also be used for root feeding.

Name of the indicator	
Total mass fraction of nitrogen, %	27,0÷33,0
Mass ratio between urea and ammonium nitrate	0,5÷0,8
Alkalinity in terms of free ammonia, %	0,05÷0,50

Safety requirements: Liquid nitrogen fertilizers are not fire hazardous and are thermally stable. When working with or using UAN, it is necessary to wear gloves, and it is also prohibited to drink, eat, or smoke. In case of contact with skin, wash with soap and water. If the fertilizer gets into your eyes, rinse immediately with plenty of water. In case of ingestion, drink several glasses of a weak pink solution of potassium permanganate and induce vomiting. After work, wash your face and hands with soap, rinse your mouth.

It is strictly forbidden to mix with other substances!

Packaging: in railway and road tanks, in polymer bottles with a volume of up to 3 dm³, in canisters with a volume of up to 5 dm³, by agreement with the consumer in the consumer’s container up to 100 dm³ (in canisters).

Transportation: in railway tanks in accordance with the rules for the carriage of goods in force for this type of transport.

Storage: in a dry, cool place, out of reach of children, away from food products.

Guaranteed storage period: 6 months.

Unifloc, water-soluble polymer

Basic physical and chemical properties

Name	Indicator
Bulk density, g / cm ³	1.0 ÷ 1.2
Maximum concentration limit in water, mg/dm ³	2.0
Fire and explosion hazard	Non-flammable, non-explosive
Physical Property	Well soluble in water, non-toxic, acts as a weak alkali

Technical characteristics

Name	Standard
Physical form	Powder of yellowish, cream or pink color
Mass fraction of water, %, no more	10
Mass fraction of insoluble residue, %, no more	5
Bulk density, g/cm ³	1.0 ÷ 1.2
Characteristics of clay solution with the addition of the drug "Uniflok" with a mass fraction of 0.5%:	
Conventional viscosity, s, no more	30
Water loss in 30 min., cm3, no more	7
pH of filtrate, no more	10
Thickness of clay crust, mm	1.0 ÷ 1.5
Amount of daily sediment, %	0 ÷ 1

Application: Water-soluble polymer preparation «Uniflok» is used:

- As an effective stabilizer of industrial drilling fluids during well drilling;
- As a coagulant for cleaning sugar syrups, industrial wastewater;
- As a flocculant for thickening ore pulps and in agriculture;
- As a soil structure former.

Packaging and storage: The preparation «Uniflok» is packed in double polyethylene bags of 30 kg. Transport marking of containers with the application of the handling sign «Keep away from moisture». Guaranteed storage period is 2 years from the date of production

Transportation: Transported by any type of transport.

Technical formalin GOST 1625-89

Formalin is an antiseptic, disinfectant, astringent, deodorizing and cauterizing agent; causes coagulation and fixation of proteins.

Main physical and chemical properties

Name	Indicator
Molecular weight	30,03
Density (depending on the concentration of formaldehyde and methanol), kg/m ³	1110 - 1120
Boiling point (37%), °C	99
Specific heat capacity, kJ/kg K.	2,5

Technical characteristics

Name	Standard		
	FM		FBM
	Top grade	1 grade	
Physical form	Colorless clear liquid. During storage, the formation of turbidity or white sediment is allowed, soluble at a temperature not exceeding 40°C		
Mass fraction of formaldehyde, %	36,9–37,5	36,5–37,5	36,5–37,5
Mass fraction of methanol, %	4–8	4–8	no more than 1
Mass fraction of acids in terms of formic acid, %, no more than	0,02	0,04	0,02
Mass fraction of iron, %, no more than	0,0001	0,0005	0,0001
Mass fraction of residue after calcination, %, no more than	0,008	0,008	0,008

Application: It is used in metallurgy, in the oil and petrochemical industries, in fur production, in agriculture.

Packaging and storage: Technical formalin grade FM is poured into railway tanks with aluminum or nickel-free stainless steel boilers, tank trucks or packed in the following containers:

- Wooden barrels;
- Aluminum barrels;
- Polyethylene bottles;
- Polyethylene canisters with a capacity of up to 20 dm³

The guaranteed storage period of formalin technical grade FM is 3 months from the date of manufacture

Transportation: Technical formalin grade FM is transported by rail or road transport in accordance with the rules of cargo transportation.

Phosphourea (100 g, 500 g, 3 kg and 40 kg) Ts 00203068-28: 2015

Phosphourea is a blended fertiliser produced by combining nitrogen fertiliser (urea) with phosphorus fertiliser (ammophos) through mechanical mixing. When used in conjunction with phosphorus fertilisers, urea is particularly effective in both non-acidic and acidic soils. It is recommended that Phosphourea be used as the primary nitrogen-phosphorus effective fertilizer with prolonged action, or as a top dressing for all vegetable and agricultural crops on various soils. Phosphourea is suitable for foliar feeding of vegetable and fruit crops, as well as late feeding of wheat to increase protein content in the grain.

Main physical and chemical properties

Name	Indicator
Mass fraction of total nitrogen (N), %, not less	40
Mass fraction of total phosphates in terms of P ₂ O ₅ , %, not less	3,5

Safety requirements: according to the degree of impact on the human body, Phosphourea is classified as a hazardous substance of the 3rd hazard class, non-flammable, fire- and explosion-proof. Observe personal protective measures: special suit, boots, rubber-knitted gloves, respirator, cotton-gauze bandage, gas mask.

Packaging: in 3 kg polyethylene bags and 25 kg and 40 kg polyethylene bags.

Transportation: in packaged form and in bulk by agreement with the consumer, by all types of transport in accordance with the rules for the carriage of goods in force for this type of transport.

Storage: in closed dry warehouses that provide protection from moisture, contamination and mechanical damage to the container.

Guaranteed storage period: 6 months from the date of manufacture.

Guaranteed shelf life of fertilizer intended for retail sale: 2 years from the date of production.

Sodium chlorate crystalline GOST 12257-93

Sodium chlorate crystalline is used for the production of liquid chlorate-magnesium defoliant, chlorine dioxide, used in bleaching cellulose, fabrics and disinfecting water, and also as a herbicide.

Main physical and chemical properties

Name	Indicator
Mass fraction of sodium chlorate, %, not less	99,5
Mass fraction of water, %, no more	2,3
Mass fraction of chlorides in terms of NaCl, %, no more than), %, no more than	0,3
Mass fraction of sulfates (SO ₄)	0,01
Mass fraction of chromate (CrO ₄), %, no more	0,02
Mass fraction of water-insoluble substances, %, no more	0,01
Mass fraction of iron (Fe), %, no more	0,005

Application: sodium chlorate is used to obtain defoliants, chlorine dioxide used in bleaching cellulose, fabric and water neutralization, and also as a herbicide.

Packaging and storage: solid sodium chlorate is packed in bags with polyethylene film inserts inserted into drums according to GOST 5044 made of galvanized steel, the polyethylene is sealed. Upon agreement with the consumer, it is permissible to pack solid sodium chlorate in polyethylene bags M10 - 0.220 according to GOST 17811. The weight of the product in a bag is 50 kg. Guaranteed shelf life is six months from the date of production.

Transportation: solid sodium chlorate (without packaging) is transported by rail in special tanks in accordance with the rules for the transportation of goods applicable to this type of transport and the instructions for ensuring the safety of the transportation of dangerous goods.

Pharmaceutical industry

Agency for the Development of the Pharmaceutical Industry

A state-owned enterprise with responsibility for the overall well-being of the pharmaceutical industry in the Republic. The Agency unites about 150 enterprises producing medicines, diagnostic instruments, and medical devices.

The Agency's structure also includes:

- The State Center for Expertise and Standardization of Medicines, Medical Devices, and Medical Equipment, responsible for the registration of pharmaceutical products;
- The Uzbek Chemical-Pharmaceutical Research Institute;
- The Tashkent Research Institute of Vaccines and Serums;
- The Research Institute «Eastern Medicine».

The republic produces more than 2,370 types of local drugs, including antibiotics, infusion and injection drugs, ointments, tablets, capsules, etc. The Agency for the Development of the Pharmaceutical Industry has analysed the export activities of the republic's pharmaceutical enterprises and forecasted the export of medicines and medical devices by 39 pharmaceutical enterprises in 2018 at a value of 39,585,200 US dollars.

Export Potential

A total of 16 pharmaceutical companies in 6 foreign countries have registered their products.

Of these, 13 enterprises are pharmaceutical manufacturers, while the remaining three are medical device manufacturers. A total of 314 names have been registered, comprising 299 names of medicines and 15 names of medical devices. At present, 182 product names are undergoing registration in nine overseas countries.

Infusion drugs

SODIUM HYDROCARBONATE, INFUSION SOLUTION 100–500 ML

The product is used to replenish fluid deficiency in the body and as part of intensive care measures. It can also be used as a solvent for other compatible drugs. This solution can be used locally to wash wounds, eyes, nasal mucosa, as well as catheters and transfusion systems

SODIUM CHLORIDE, INFUSION SOLUTION 100–500 ML

This solution is designed to replenish fluid deficiency in the body and to support complex intensive care measures. It can also be used as a solvent for other compatible drugs. This solution can be used locally for rinsing wounds, eyes, nasal mucosa, as well as catheters and transfusion systems.

METRONIDAZOLE, INFUSION SOLUTION 100 ML

Recommended for the treatment of infections caused by microorganisms sensitive to the drug.

- prevention and treatment of anaerobic infections during surgical interventions, mainly on the abdominal organs and urinary tract;
- combination therapy of severe mixed aerobic-anaerobic infections;
- severe intestinal and hepatic amebiasis;
- sepsis;
- peritonitis;
- osteomyelitis;
- gynecological infections;
- pelvic and brain abscesses;
- abscessing pneumonia;
- gas gangrene;
- infection of skin and soft tissues, bones and joints.

Injection solutions

NOVOCAINE, INJECTION SOLUTION 0.5%

Packaging, capsules / 10

Local anesthesia: infiltration, conduction, epidural and spinal, vagosympathetic and paranephric block, potentiation of the action of anesthetics during general anesthesia, pain syndrome of various genesis, vascular spasms.

CALCIUM GLUCONATE, INJECTION SOLUTION 10%

Packaging, capsules / 10

Diseases accompanied by hypocalcemia, increased permeability of cell membranes, impaired conduction of nerve impulses in muscle tissue. In the context of comprehensive treatment plans for a range of bleeding disorders, allergic conditions and bronchial asthma.

LIDOCAINE HYDROCHLORIDE, INJECTION SOLUTION 1% AND 2%

Packaging, capsules / 10

All types of local anesthesia, prevention and treatment of ventricular rhythm disturbances associated with the acute phase of myocardial infarction.

GLUCOSE, INJECTION SOLUTION 40%

Packaging, capsules / 10

Hypoglycemia, hypoglycemic coma, hypovolemia, dehydration, shock, collapse, intoxication, preparation of drug solutions.

Injection solutions

MAGNESIUM SULFATE, INJECTION SOLUTION 25%

Packaging, capsules / 10

Hypertensive crisis, myocardial infarction, eclampsia, encephalopathy, hypomagnesemia, incl. prevention, increased need for magnesium, acute hypomagnesemia, convulsive syndrome.

DIMEDROL, INJECTION SOLUTION 1%

Packaging, capsules / 10

The drug is indicated for the treatment of urticaria, hay fever, vasomotor rhinitis, angioedema, itchy dermatoses, acute iridocyclitis, allergic conjunctivitis and other allergic complications from taking various medications, including antibiotics.

ASCORBIC ACID, INJECTION SOLUTION 5%

Packaging, capsules / 10

Hypovitaminosis C, hemorrhagic diathesis, bleeding infections, intoxications, liver diseases, slow-healing wounds, ulcers, bone fractures, dystrophy, increased physical and mental stress.

ANALGIN, INJECTION SOLUTION 50%

Packaging, capsules / 10

Pain syndrome of low and moderate intensity of various origins and localizations, hyperthermic syndrome, febrile conditions, renal and hepatic colic.

Injection Solutions Bfs System

GLUCOSE, INJECTION SOLUTION 40%

Packaging, capsules / 10

Replenishment of carbohydrate deficiency in the body, correction of dehydration due to vomiting, diarrhea, in the postoperative period. Detoxification infusion therapy. Collapse, shock (as a component of various blood-substituting and anti-shock fluids). Also used to prepare solutions of drugs for intravenous administration.

ASPARCAM, INJECTION SOLUTION

Packaging, capsules / 10

Potassium and magnesium deficiency in the body. It is used as part of complex therapy for ischemic heart disease, ventricular extrasystole (including myocardial infarction), heart rhythm disturbances caused by a deficiency of potassium and magnesium in the body, intolerance or toxic effects of digitalis preparations, shock conditions of various origins.

SODIUM THIOSULPHATE, INJECTION SOLUTION 30%

Packaging, capsules / 10

In case of poisoning with arsenic, mercury, lead compounds (non-toxic sulfites are formed), hydrocyanic acid and its salts (less toxic thiocyanate compounds are formed), iodine and bromine salts. In combination therapy for allergic diseases, neuralgia, diabetic polyneuropathy, arthritis.

WATER FOR INJECTION, INJECTION SOLUTION

Packaging, capsules / 10

For the preparation of sterile solutions of medicinal and diagnostic agents intended for subcutaneous, intramuscular or intravenous administration.

Injection Solutions Bfs System

SODIUM CHLORIDE, ISOTONIC INJECTION SOLUTION 0.9%

Packaging, capsules / 10

Dissolution and dilution of drugs. Sodium and chloride ions are the most important inorganic components of the extracellular fluid, maintaining the appropriate osmotic pressure of blood plasma and extracellular fluid.

NOVOCAINE, INJECTION SOLUTION 0.5%

Packaging, capsules / 10

Local anesthesia: infiltration, conduction, epidural and spinal, vagosympathetic and paranephric block, potentiation of the action of anesthetics during general anesthesia, pain syndrome of various genesis, vascular spasms.

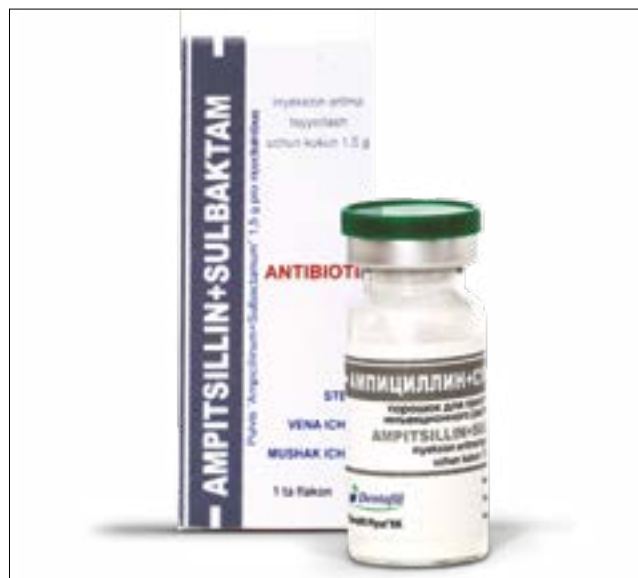

Dry Spills

«AMPICILLIN + SULBACTAM», POWDER FOR INJECTION SOLUTION 0.75 g AND 1.5 g

Packaging, bottle / 1

The drug is a semi-synthetic antibiotic of the beta-lactam group, a third-generation cephalosporin, has a bactericidal effect. The drug is prescribed for the treatment of infectious diseases caused by strains of microorganisms sensitive to it.

CEFTRIAXONE SODIUM, POWDER FOR INJECTION SOLUTION 0.5 g AND 1.0 g

Packaging, bottle / 1

Semi-synthetic antibiotic of the beta-lactam group, a third-generation cephalosporin. The drug is prescribed for the treatment of infectious diseases caused by strains of microorganisms sensitive to it.

CEFOTAXIME, POWDER FOR INJECTION SOLUTION 0.5 G AND 1.0 G

Packaging, bottle / 1

The drug is a third-generation cephalosporin antibiotic. The drug is taken to treat infectious and inflammatory diseases caused by microorganisms sensitive to it.

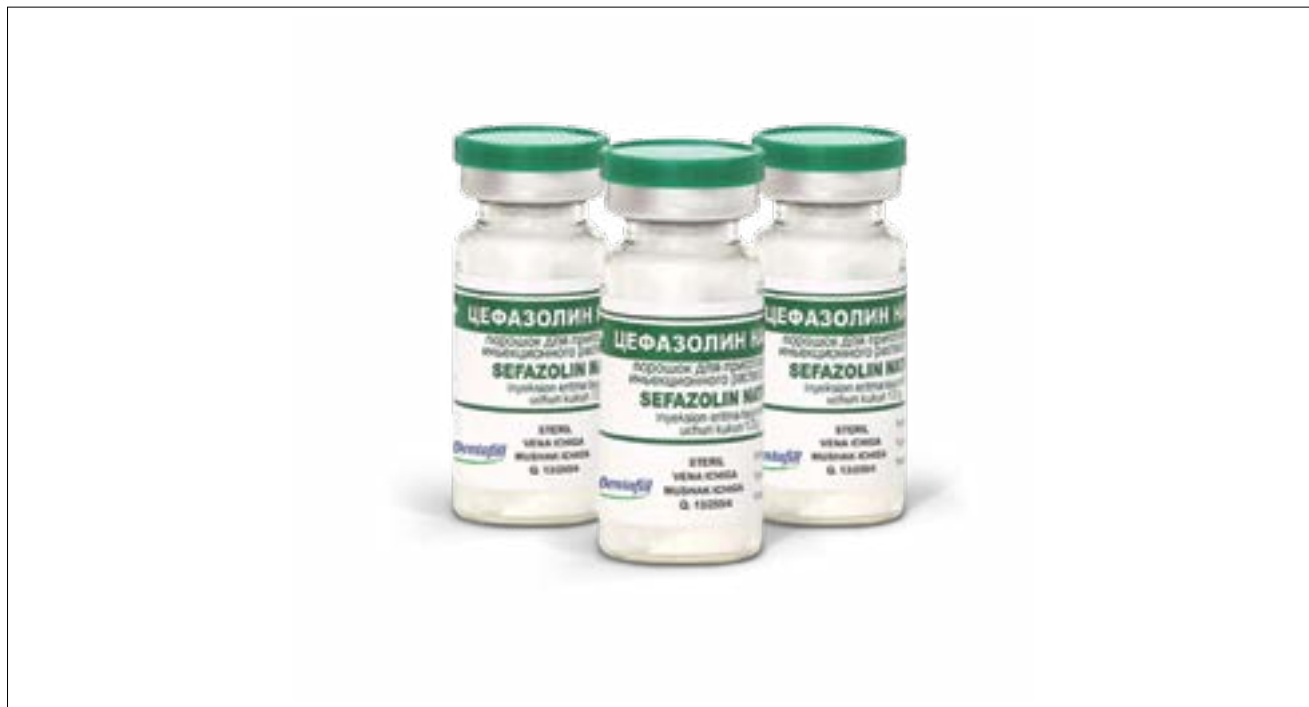

Dry Spills

CEFAZOLIN SODIUM, POWDER FOR INJECTION SOLUTION 0.5 g AND 1.0 g

Packaging, bottle / 1

The drug is one of the main first-generation cephalosporin antibiotics. Treatment of infectious and inflammatory diseases caused by microorganisms sensitive to the drug.

«CEFOPERAZONE + SULBACTAM», POWDER FOR INJECTION SOLUTION 1.0 g

Packaging, bottle / 1

Cefoperazone is a third-generation cephalosporin antibiotic, has a bactericidal effect, has a broad spectrum of action. Sulbactam is an irreversible beta-lactam inhibitor.

Latex Gloves

LATEX STERILE SURGICAL GLOVES

Sterile surgical gloves are designed to protect the patient and the medical worker from mutual contamination during surgical operations.

NON-STERILE LATEX EXAMINATION GLOVES

Examination gloves are designed for everyday use during examination and diagnosis, as well as performing procedures in outpatient settings.

Eye drops

TIMALOL

Packaging, bottle / 1
primary open-angle glaucoma;
secondary glaucoma (uveal, aphakic, post-traumatic); congenital
glaucoma (if other therapeutic measures are ineffective); acute
increase in ophthalmotonus; primary closed-angle glaucoma
(in combination with miotics).

CIPROFLOXACIN, EYE DROPS 0.3%

Packaging, bottle / 1
Infectious diseases of the eye and its appendages caused by
bacteria sensitive to the drug: acute and subacute, conjunctivitis,
blepharoconjunctivitis, blepharitis, preoperative prophylaxis
in ophthalmic surgery, treatment of postoperative infectious
complications.

LEVOMYCETIN, EYE DROPS 0.25%

Packaging, bottle / 1
Levomitsetin is a broad-spectrum antibiotic, effective against
many gram-positive and gram-negative bacteria.

Capsule Drugs

OMEPRAZOLE, CAPSULES 20 mg

Packaging, capsules / 30
NSAID

- gastropathy;
- gastric ulcer and duodenal ulcer;
- gastroesophageal reflux disease;
- hypersecretory conditions;
- acute pancreatitis;
- eradication therapy of *Helicobacter pylori* in infected patients with gastric ulcer and duodenal ulcer (as part of combination therapy).

GINKGO BILOBA, CAPSULES 40 mg

Packaging, capsules / 10

Discirculatory encephalopathy of various origins, manifested by attention and/or memory disorders, decreased intellectual abilities, a feeling of fear, sleep disorders: consequences of stroke, traumatic brain injury, involutional disorders, Raynaud's syndrome. Neurosensory disorders.

FLUCONAZOLE 50, 150 mg, CAPSULES

Packaging, capsules / 10

Treatment of candidiasis of the mucous membranes (including the oral cavity and pharynx, esophagus, non-invasive bronchopulmonary candidiasis, candiduria), skin candidiasis; generalized candidiasis (including candidemia, disseminated candidiasis), invasive candidal infections of the peritoneum, endocardium, eyes and urinary tract.

Electrical Industry

Uzeltekhsanoat Association

The Association «Uzeltekhsanoat» was established in 2019 as a successor entity to JSC «Uzeltechsanoat».

The radio-electronic, electrical and instrument-making industries represent a significant sector of Uzbekistan's infrastructure.

The Association's member companies currently produce over 20 types of household appliances, including air conditioners, microwaves, mini ovens, gas and electric stoves, TVs, refrigerators, phones, built-in appliances, vacuum cleaners, hoods, small appliances, and more. Additionally, they manufacture a comprehensive range of cable and wire products, along with kitchen hoods and storage-type electric water heaters.

Export Potential

Products are exported to various countries, including Russia, Ukraine, Belarus, Kazakhstan, Kyrgyzstan, Afghanistan, Tajikistan, Turkmenistan, Azerbaijan, Armenia, Georgia, Baltic states, China, and Iran.

The association's member companies are continuously expanding their export zones and exploring new markets and countries. These enterprises have their quality management systems certified by the Swiss company SGS, in accordance with the ISO 9001-2008 standard. Additionally, our products are certified with the Russian Certificate of Conformity and Fire Safety Certificate for power and control cables.

Association «Uzelteksanoat»

Non-return valve	+
Air duct diameter, mm	150

Artel TV LED S9000 75» Slim Smart (191 cm)

Technical specifications

Aspect ratio	16:9
Antenna and cable TV input: (DVB-T/C)/(DVB-S/S2)	1 / 1
ATV video format support	PAL/SECAM
DTV video format support	MPEG-2 H.264
Sound output power, W	2 x 10 + 2 x 15
Audio output for connecting headphones	+
Screen resolution, px	UHD 3840 x 2160
HDMI input / output, pcs	4
USB input	2
PVR - digital broadcast recording	+
Time Shift (live pause)	+
Composite AV input	mini AV
Component input (Y/Pb/PR)	+
Digital Audio output	Optical
Built-in digital tuner	DVB-T/T2
Built-in satellite tuner	DVB-S/S2
Number of colors	1.07 Billion
VGA input	+
Automatic channel search and tuning	
Parental control	+
Clock and on/off timer	+
Power source	110 - 240 V; 50 / 60 Hz
Standby power consumption, W	< 0.5
Maximum power consumption, W	275
Remote control	IR - remote control + Magic remote control
Weight (net), kg	62

Glass Series Kitchen Hood Collection

Technical Specifications

Model	Glass
Productivity (max)	1330 m³
Number of speeds	3
Lighting	2 x 40 W
Total power consumption	200 W
Weight (max)	11 kg
Noise level (max)	56 dB
Glass	60 x 50 x 60 cm

Slider Series Kitchen Hood Collection

Technical Specifications

Model	Slider
Productivity (max)	600 m³/hour
Number of speeds	3
Total power consumption	165 W
Weight (max)	9 kg
Noise level (max)	56 dB
Slider 60 (W x D x H)	60 x 47 x 19 cm
Glass	60 x 50 x 60 cm

Flat Inox Series Kitchen Hood Collection

Technical Specifications

Model	Flat Inox
Productivity (max)	1330 m³/hour
Number of speeds	3
Lighting	2 x 20 W
Total power consumption	290 W
Weight (max)	11 kg
Noise level (max)	58 dB
Glass	60 x 50 x 70 cm

Water heating tank VITECH 50 L

Technical specifications

Model	Vitech 50 L
Type	cumulative
Design	vertical
Volume of hot water	50 liters
Shape	Cylinder
Power	1.5 kW
Inner tank	steel
Coating of the inner tank	glass enamel
Weight	20 kg
Dimensions	376 x 735 mm

Water heating tank VITECH 80 L

Technical specifications

Model	Vitech 80 L
Type	cumulative
Design	vertical
Volume of hot water	80 liters
Shape	Cylinder
Power	1.5 kW
Inner tank	steel
Coating of the inner tank	glass enamel
Weight	25 kg
Dimensions	450 x 750 mm

Water heating broiler VITECH 100 L

Technical specifications

Installation type	Wall-mounted
Power of electric heating element	1.5 kW
Power of heat exchanger	24 kW
Tank material	Stainless steel
Volume	100 l
Weight (not more than)	50 kg
Size (Diameter x Height)	459x925 mm
Coating of inner tank	glass enamel
Weight	25 kg
Dimensions	450 x 750 mm

Gas water heater VITECH 10 L

Technical specifications

Model	Vitech 10L
Nominal thermal power	20 kW
Productivity	10 l/min
Gas type	natural
Gas pressure (min)	1.3 drops
Nominal gas consumption per hour	1 m/cube
Water pressure (min)	20 kPa
Type of communication supply	lower
Control functions	mechanical
Functions	Flame, water adjustment
Operating mode	winter/summer
Auto ignition	2 batteries D type 1.5 volts
Water temperature display	LCD
Weight (not more)	9 kg
Gas dispenser	35X61X16 cm

Electric motor 3

Technical characteristics

Description	Electric motor
Performance (max)	560 m³/hour
Power	250 W
Manufacturer	Türkiye, Italy

Panel radiators

- Durable
- High-tech
- Aesthetic
- High compressive strength 33 mm with optimal pitch

Emtas panel radiators are manufactured using the latest technology with modern automatic control on a fully automatic welding line and are 100% tested. Aesthetic appearance with a smooth surface that protects against dust, easy to clean.

CHARACTERISTICS

Dimensions 300-400-500-550-600-900 mm
Length varies from 400 mm to 3000 mm

Cooking surface B640-CE (BLACK)

Technical specifications

Type	Gas independent cooking surface
Color	Black enamel
Hot plates	4-gas
Grilles	2 cast iron
Gas control	yes
Electric ignition	in a rotary handle
Dimensions (H x W x D)	52 x 59 cm

Cooking surface B1140

Technical specifications

Type	Gas independent cooking surface
Design	Classic
Color	Beige with gold serigraphy glass surface
Hot plates	4-gas
Grilles	2 cast iron
Gas control	yes
Electric ignition	in rotary handle
Dimensions (H x W x D)	5 x 59 x 52

Built-in Electric Oven (White) BE11-LD

Technical Specifications

Touch	0+11
Control panel type	Glass black
Handle type	Efta Handle
Handle color	Inox
Front glass type	Standard black
Electric ignition	in a rotary handle
Turbo fan	+
Thermostat	+
Tray height adjustment	+
Size (H x W x D)	52 x 59 cm

LED lamps or LED luminaires use LEDs as a light source, and are used for household, industrial and street lighting. The LED lamp is one of the most environmentally friendly light sources.

Specifications

Mobile complete transformer substation 35/6(10)kV with a capacity of 1000, 1600kVA

Mobile complete transformer substation 35/6(10)kV is designed for receiving, converting and distributing electrical energy of three-phase alternating current with an industrial frequency of 50 Hz.

Technical Specifications

Nominal voltage on the HV side, kV	35
Nominal voltage on the LV side, kV	6(10)
Nominal power, kVA	1000, 1600
Frequency, Hz;	50
Nominal current of the main circuits, A	630
Thermal withstand current, with a flow time of 3 s, kA	20
Nominal current of electrodynamic withstand, kA	50
Overall dimensions, mm	12150x4500x8970
Climatic version and placement category	U1

Block-modular buildings for industrial transformer substations

The modular building is equipped with artificial and natural ventilation, heating, lighting and a fire alarm system. Depending on the size and layout of the industrial package of the KТП series, the transformer substation building can be created from one or more modules, where all the switchboards of the industrial transformer installation are fixed or transportable (if the building frame consists of several modules).

Technical Specifications

Auxiliary voltage	-380
Lighting network and signaling V	-220
Input/output voltage, V	- 12 / 42
AC network voltage	-220
Overall dimensions of one module, m:	
width	2250÷3000
height	3250÷3450
length	6750÷7200

Open horizontal rotary disconnector RGP-220 series for 220 kV

Open horizontal rotary disconnector of alternating current RGP-220/1250 (1600, 2000) NF1 series with drive type SRCJ2 and SRCS is designed for closing and opening electrically dead high-voltage sections of electrical circuits, as well as for interrupting open-circuit currents of transformers and charging currents of overhead and cable lines.

Climate category - UKhL (moderate and cold weather) in accordance with GOST 15150 (NF according to IEC); placement category 1 according to GOST 15543.1 for disconnectors with protection 1P00 according to GOST 14254-96. Single-pole, double-pole and triple-pole versions of the RGP-220 series disconnectors are manufactured with longitudinal pole arrangement (keel). The following disconnectors of the RGP-220 series are manufactured:
RGPZ-1-220 / 1600 NF1 with one grounding blade on the main column side;
RGPZ-2-220 / 1600 NF1 with two grounding blades;
RGP-220/1600 NF1, without grounding blades.

Complete switchgear for 35 kV voltage K-65 series

Complete switchgear K-65 series is designed to receive and distribute electrical energy of three-phase alternating current of industrial frequency 50 Hz at a voltage of 35 kV.

High safety in operation is ensured by:
 Reliable interlocking against incorrect actions of the operating personnel.
 Automatically operating shutters protecting the operator from accidental contact with live parts.
 Any part of the main circuits can be earthed using permanently installed earthing switch disconnectors.

Complete 6(10) kV Outdoor Switchgear K59 Series

Complete 6(10)kV outdoor switchgear KRU K59 series is designed to receive and distribute electric power of three-phase alternating current of industrial frequency 50(60)Hz, voltage 6(10)kV, rated current 630-1600 A, manufactured in U1 - temperate climate and X/11 - cold climate version, is a free-standing unit of high-voltage cells with corridor control.

For step-down substations without developed RU-b(U) kV, it is possible to supply free-standing auxiliary cabinets with voltage transformers (VT) type NAMIT.

K59 switchgear is used: as a part of KTPB as a 6(10) kV switchgear. GIS K59 is used: in oil, gas, coal and metallurgical industries; in power engineering; in distribution networks of power complexes; in agriculture; for the needs of industrial enterprises; for urban and municipal networks.

Capacitor units type UKL(P) for voltage 6(10)kV

The units are designed to increase the power factor of electrical equipment of industrial enterprises and distribution networks with voltage 6 (10) kV of frequency 50 Hz.

upper value of ambient air temperature - 40 °C;
 lower operating value of ambient air temperature - minus 45 °C;
 average operating value of ambient air temperature for 24 hours - not more than 30 °C, for a year - not more than 20 °C;
 upper operating value of relative air humidity - not more than 90 % at temperature 25 °C;
 average annual operating value of relative air humidity - not more than 80 % at temperature 15 °C; - upper operating value of air pressure - 800 mm Hg;
 lower operating value of air pressure - 650 mm Hg;
 environment - non-explosive, containing no aggressive gases and vapours in concentrations destructive to metals and insulation.

 Email: cc@uzea.uz

Toshelektroapparat LLC is one of the most dynamically developing and leading companies in the country with high-tech production equipment due to the favourable investment policy and protection of foreign investors' interests in Uzbekistan. Today, the Toshelektroapparat brand is known not only in Uzbekistan, but also far beyond its borders. Toselectroapparat LLC owes its significant achievements in the development, production and promotion of high-quality FE products to its experience in the market, invaluable human resources and high-tech equipment. The company operates on the basis of the former parent company Sredneelektroapparat Scientific and Production Association, which has a rich historical tradition in the development, production and sale of electrical products since 1941.

Photovoltaic Power Stations (PPS)

A photovoltaic power station (PPS) converts the energy of sunlight (ultraviolet light) into electricity and stores it in batteries. The PV power station can be used not only in sunny weather, but also in cloudy weather and at night.

The FES consists of the following components

- **Photovoltaic module** - converts daylight energy (ultraviolet light) into electrical energy. Photovoltaic modules use the property of semiconductors based on silicon crystals. Photovoltaic modules are connected in parallel, in series or in combination for different applications. The area of PV modules can range from a few square metres to several hectares.
- **Battery charge controller** - controls the charging and discharging of batteries. The charge controller is an integral part of the PV power plant, determining not only the performance of the system, but also the efficiency of the conversion of sunlight into electricity. The two most common types of charge controller are PWM and MRRT.
- **Battery** - stores electricity and smoothes out voltage fluctuations due to changes in light. The accumulator is an integral part of the FES and is used to store and release electricity in the dark and when there is a lack of solar energy (e.g. cloudy weather). The capacity of the storage batteries determines the maximum autonomous operating time of the power plant.
- **Inverter** - converts direct current into alternating current. Electrical appliances in our homes use alternating current and solar panels produce direct current, so the inverter is one of the main components of the FES. The industry produces two types of inverters: pulse inverters and low frequency transformer inverters.

Complete transformer substations of block type 20-220 kV for power grid and traction power supply

Complete transformer substations of block type modernised are designed for reception, conversion and distribution of electric energy of three-phase alternating current with frequency 50 Hz at rated voltages 220, 110, 35, 27.5, 20, 10(6) kV. Block complete transformer substations KTPB are used:

- on the 220, 110 and 35 kV side of grid substations;
- for power supply of mining, oil and gas fields;
- for power supply of industrial consumers;
- for traction substations; for municipal consumers;
- for large-scale construction;
- for agricultural areas;
- at power stations (under appropriate conditions);
- and in many other facilities.

Modernised 220, 110, 35, 27.5 kV complete substations have features that minimise costs throughout the life of the products:

- The substations operate reliably according to all standard electrical connection schemes in the country, and orders for non-standard schemes are also accepted;
- Gradual expansion and development from simple to more complex schemes is possible without additional reconstruction work and without interrupting power supply to consumers;
- substations are completed with high-voltage equipment of the entire CIS nomenclature, as well as the nomenclature of foreign companies, including ABB, Siemens and others;
- Short installation time due to the simplicity and compactness of the unit designs with assembled auxiliary circuits and the availability of enlarged units ready for installation;
- Short commissioning time; use of sledges in 35 kV mobile substations as a foundation and as a means of transporting the substation over short distances.

JSC «Chirchik Transformer Plant» has been successfully operating in the engineering market for more than 80 years with the production of power transformers and unified transformer substations of voltage 10, 35, 110 and 220 kV with power from 25 to 63000 kVA, and carries out repairs of various complexity of power transformers of voltage classes up to 500 kV, with power up to 125000 kVA. Today «Chirchik Transformer Plant» is the leading enterprise of the electrical industry of the Republic of Uzbekistan, Central Asia and the CIS, a modern high-tech enterprise with fully developed traditions in the field of quality, with a highly qualified staff of specialists, with a high degree of reliability.

Oil distribution three-phase hermetic hermetic transformers of TMZ type

Three-phase transformers with double winding, hermetic power transformers of TMZ-25÷2500/6 (10) U 1.3 and TMZ-25÷2000/6 (10) T 1.3 types with natural oil cooling with switching of branches without excitation. They are produced for areas with temperate (U) and tropical (T) climates with ambient temperature from - 45° C to + 40° C for climatic version U and from - 10° C to + 55° C for climatic version T. Windings are produced in aluminium and copper versions.

General purpose three-phase oil distribution transformers of TM type

Transformers of TM-25+630/6(10) U1 type are power transformers, three-phase, two-winding, with natural oil cooling, with branch switching without excitation. They are produced for areas with moderate (U) and tropical (T) climates with temperature difference from - 45°C to + 40°C for climatic version U and from -10°C to + 55°C for climatic version T.

Three-phase two-winding distribution transformers with PVV on the HV side type TM

Transformers TM three-phase, two-winding, oil, naturally cooled, with a control range of $\pm 5\%$, are designed for voltage conversion in networks 35 kV They are manufactured for areas with temperate (U) and tropical (T) climates with ambient air temperature from minus 45 ° C to plus 40 ° C for climatic version U - minus 10 ° C to plus 50 ° C for climatic version T.

Three-phase two-winding transformers with on-load tap-changer on HV side of TMN and TMNP types

Transformers TMN and TMNP three-phase two-winding transformers with natural oil cooling, with voltage regulation under load (on-load tap changer), with regulation range $\pm 4 \times 2,5\%$ are designed for voltage conversion in 35 kV networks. They are manufactured for areas with moderate and cold climate with ambient air temperature from - 50°C to + 40°C for climatic version XL and - 45°C to + 40°C for climatic version U.

TU 16-705.450-87

Technical characteristics:

MG grades - 10... 500 mm²;
MCE varieties - 240... 1000 mm².
Structural length of wires:
MG grades - 250... 2000 m;
grades MGE 100 - 250 m.
Service life of MG and MGE is 10 years.

GOST 2584-86

Technical characteristics:

Permissible temperature of contact wires:
MF - 95 IN;
NIOI 0,04F - 110 IN.
Permissible voltage:
IF - 117,7 lpa;
NIOI 0,04F - 127,4 lpa.
Wire resistivity:
IF - 0.017710-6 lhm.i;

GOST 839-80

Technical characteristics:

CGrades and structures of bare wires:
I - copper stranded stranded twisted wire.
A - aluminium stranded stranded twisted wire.
AN - steel aluminium twisted wire

TSh 64-05755737-131: 2007

Technical characteristics:

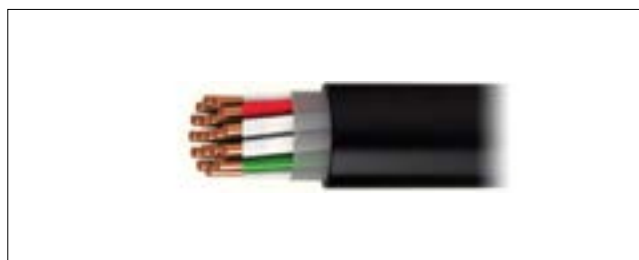

Number of cores and active conductive diameter 1 *4 * 1.2
Mutual capacitance - not more than 47 nF / km
Immunity of circuits at the far end of 550 kHz factory length
- not less than 60 dB / km
Cable breaking strength - not less than 60 KrF
Manufacturer's cable length - not less than 750 m

GOST 6436-75, GOST R 51312-99

Technical characteristics:

Insulation resistance not less than 5000 megohm / km
Mutual capacitance:
single core not more than 150 HF/km;
twisted pair not more than 100 HF/km.
Core resistance not more than 28.8 lhm / km.

TSh 64-05755737-125: 2005

Technical characteristics:

Number of pairs in cables from 10 to 600.
Cable lead diameter is 0,4 mm or 0,5 mm.
Electrical resistance of lead insulation
not less than 8000 lhm.km. for 80% values,
not less than 6500 lhm.km for 100% values.
Mutual capacitance at 800 Hz - 45 + -8 nF/km.

TSh 64-05755737-128: 2013

Technical characteristics:

Number of conductors in the cable - 2.
Section of cable cores - 0,9 mm.
Mutual capacitance of smooth circuit, not more than - 51 nF/km.
Permissible force of cable tension during laying not more than 25 kg of force.
Service life of cables not less than 10 years.

GOST 1508-78

Technical characteristics:

Number of cores in cables - 4, 5, 7, 10, 14, 19, 27, 37 pieces.
Main sections in cables:
AKVVG; AEAAbOa; AKVVG - 2,5 mm²
KVVG; KVBBShv; KVVG; 1,0; 1,5; 2,5 mm²
KVVG; AKWC - 4.0 mm²
Permissible heating temperature of solid 70° C.

TU 16-705.077-79

Technical characteristics:

Number of cores - 1 pc.
Cross section of cores in wires - from 2,5 to 300 mm
Factory length of wires - not less than 100 m
Service life of wires - not less than 6 years

GOST 11326.8-79

Technical characteristics:

Permissible bending radius of the cable during installation is not less than 20 outer diameters.
Cable service life is not less than 8 years.

TU 16-505.129-82

Технические характеристики:

Cable operating temperature (by rewinding, circular operation movement) from minus 40 to 90 0 C
Insulation resistance - not less than 1200 Mohm/km
Service life - not less than 5,5 years

GOST 6285-74

Technical characteristics:

Lead resistance per length of 1 km
Not more than 90 lhm for wire with core diameter 0,5 ii
Not more than 36 lhm for wire with core diameter 0,8 ii
Not more than 50 lhm for wire with core diameter 0,7 ii
The insulation of the wires shall be resistant to cold.
Manufacturer's length of wire shall not be less than:
For 0.5 mm diameter wire not less than 1500 metres;
For wires with diameter 0,7 and 0,8 not less than 500 m

100041, Republic of Uzbekistan, Tashkent, 2 Durmon Yuli str.

Insulated flexible copper wire

Purpose:

The wire is designed for brushes of electrical machines.

Electrical characteristics:

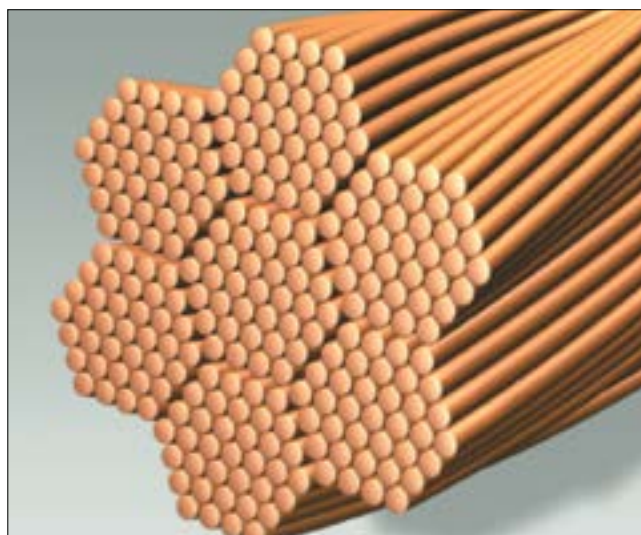

Resistance of the core at the length of 1 km, Ohm, not more for the period of acceptance and delivery:

- - at cross-section 0,04 mm² - 445,0;
 - - at cross-section of 6,0 mm² - 3,4;
 - - at a cross-section of 16,0 mm² - 1,2;
- for the period of operation and storage:
- - at a cross-section of 0,04 mm² - 534,0;
 - - at a cross-section of 6,0 mm² - 4,1;
 - - at cross-section 16,0 mm² - 1,44.

Permissible current load, A:

- - at cross-section 0,04 mm² - 1,15;
- - at cross-section of 10,0 mm² - 75,0

The wire is to be annealed after stranding.

Polyvinylchloride insulated copper conductor wire of increased flexibility

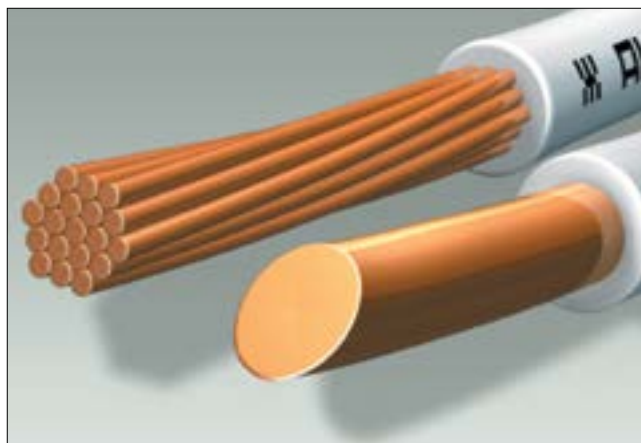

Purpose:

Designed for electrical installations for stationary laying in lighting and power networks, as well as installation of electrical equipment, machines, mechanisms and machine tools for rated voltage up to 450 V (for 450/750 V networks) with frequency up to 400 Hz or constant voltage up to 1000 V.

Electrical characteristics:

Specific electrical resistance of the core at 20°C, Ohm * mm²/m, not more - 0,02800;

Insulation resistance at 20°C, mOhm/km, not less: -1.

High-frequency structured cable with polyethylene insulation in a polyethylene sheath with a screen and a rope

Purpose:

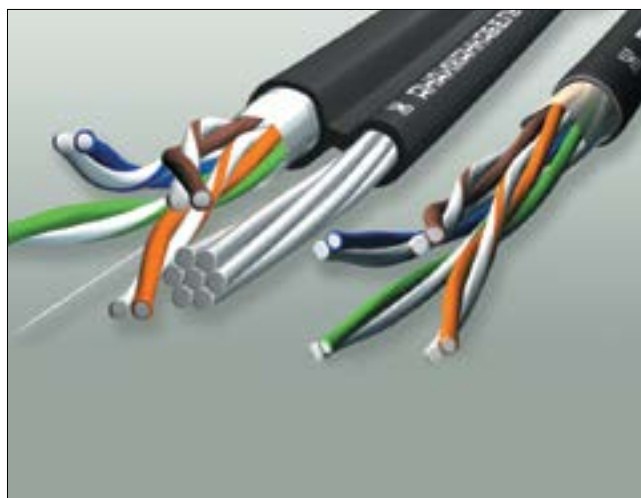

The cable of the KSVPP 5e and KSVPPe 5e brands is intended for outdoor installation for operation in the frequency range of up to 100 MHz (category 5e according to ISO/IEC 11801). The cable is intended for outdoor installation, for pulling between supports or buildings at a distance of up to 100 m, connecting segments of a category 5e cable system (according to ISO/IEC 11801) in the frequency range of up to 100 MHz.

Electrical characteristics:

The resistance of the cores, recalculated for 100 tons of cable length

and a temperature of 20°C, is no more than 9.6 Ohm;

The ohmic asymmetry of the cores in a working pair over a length of 100 m is no more than 3%.

Self-supporting insulated wire for overhead power lines

Purpose:

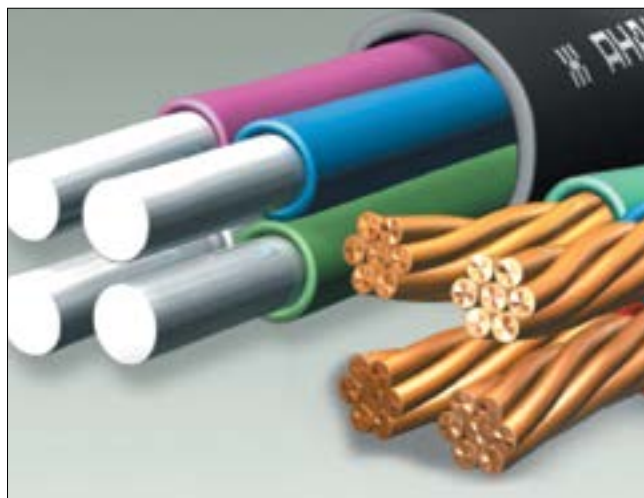

Wire CIP-2 is designed for use in overhead power lines (OPL) for rated voltage up to 0,6/1 kV inclusive and line taps from OPL in air atmosphere.

Wire CIP-4 is designed for branch lines from overhead lines at rated voltages up to 0,6/1 kV inclusive to the input, for laying on the walls of buildings or structures.

Operating characteristics:

Permissible heating of conductive cores during operation should not exceed 90°C in normal operation and 250°C - in case of short circuit.

Cable - power cable for stationary laying for voltage up to 1 kV.

Purpose:

Transmission and distribution of electric power in stationary installations with nominal alternating voltage of 0,66 and 1 kV.

Electrical characteristics:

Core insulation resistance at 20°C, mOhm/km, not less than:
for cable for voltage 0,66 and 1 kV:

at cross-section up to 1,5 mm² - 12; at cross-section 2,5 - 4,0 mm² - 10;

at cross-section of 6,0 mm² - 9; at cross-section of 10 - 240 mm² - 7;

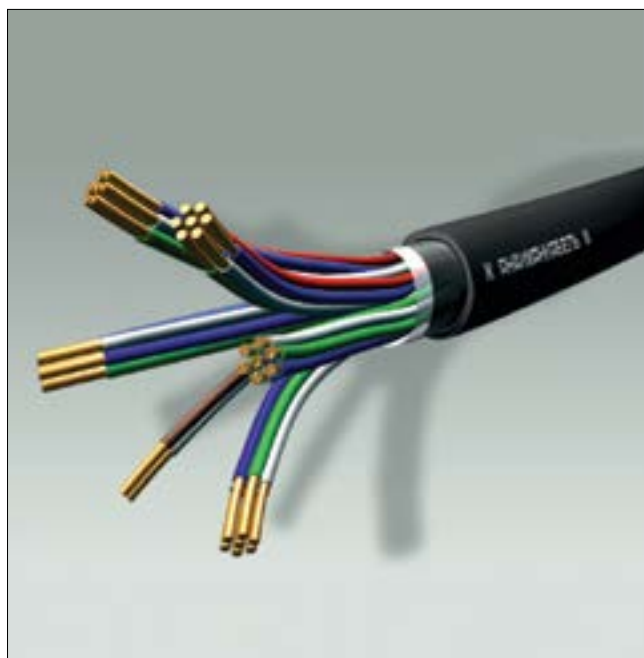

Insulation resistance at long-term permissible core heating temperature, mOhm/km, not less than 0.037

Maximum operating voltage of the electric network, kV:

for cable with voltage 0,66 kV - 0,72;

for cable with voltage of 1 kV - 1,2.

Signal-locking cable with copper conductors, with polyethylene insulation, in thickened polyethylene jacket

Purpose:

For laying in plastic pipelines, in the ground, in conditions of aggressive environment in the absence of mechanical effects on the cable (in conditions of high humidity for SBZPU).

Electrical characteristics:

Electrical resistance of cable cores at 20°C, Ohm/km, not more:

for cores with diameter 0,8 mm - 36,6;

for cores with diameter 0,9 mm - 28,8;

for cores with diameter of 1,0 mm - 23,3;

Electrical resistance of core insulation, mOhm/km, not less - 5000;

Test voltage between cores during 1 min. at current frequency 0,05 kHz, V - 2500;

Attenuation coefficient of twisted pair cable pairs at 20°C, dB/km, not more:

for cores with diameter of 0,8 mm - 1,18;

for cores with diameter of 0,9 mm - 1,04;

for cores with diameter of 1,0 mm - 0,94;

Wires for household use.

Purpose:

The wire is intended for use in repair, installation and operation of electric lines under voltage up to 250 V.

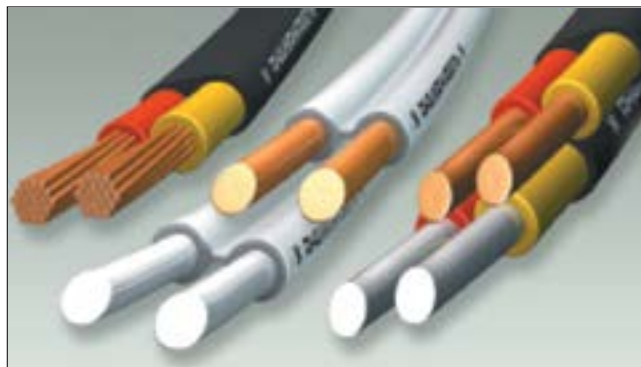

CONSTRUCTION:

Core - single-wire copper (for PPBNP, PUNP), single-wire aluminium (for APUNP, APPBN), multi-wire copper, twisted from copper soft wires (for PUGNP).

Insulation - insulating PVC plasticate.

Sheath (only for APUNP, PUNP and PUGNP) - PVC plasticate.

Оболочка (только для АПУНП, ПУНП и ПУГНП) — ПВХ пластикат.

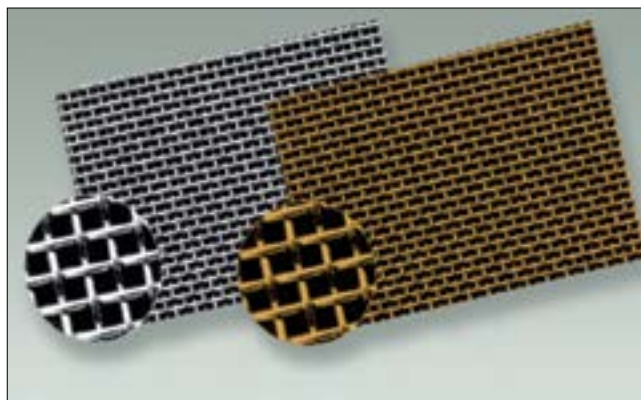

Grids and protective fences

Purpose:

Woven steel mesh, used for material separation by coarseness; reinforcing and shielding surfaces; filtration; drying; dewatering, etc.,

* Mesh can be manufactured from materials such as: stainless steel, brass, copper, galvanised steel, bronze, nickel and other alloys. Production of nets according to the customer's dimensions is available.

AVVG cable

Purpose:

AVVG power cable is designed for transmission and distribution of electrical energy at stationary connection for voltage up to 1 000 V of alternating current with frequency 50 Hz. It can be laid in dry and wet industrial premises, on cable racks, in blocks, in the open air. It is not recommended for laying in the ground.

AVVG cable does not spread combustion at single laying.

Cable AVBbShv

Purpose:

Power cable AVBbShv is designed for transmission and distribution of electrical energy at stationary connection for voltage up to 1 000 V AC frequency 50 Hz. It can be laid in dry and wet industrial premises, on cable racks, in blocks, in the open air. It is not recommended for laying in the ground. Cable AVBbShv does not spread combustion in single laying.

PVA wire

Purpose:

Wire with flexible copper cores, designed to connect electrical machines and appliances of household and similar applications to the electrical network, for electrical appliances and power tools for home maintenance and repair, washing machines, refrigerators, means of small mechanisation for gardening and horticulture and for the manufacture of extension cords.

PUGNP cable

Purpose:

The wire is used for fixed laying in lighting networks with nominal voltage up to 250 V AC frequency 50 Hz, installation and connection of low-current household appliances to AC network up to 250 V frequency 50 Hz, installation of thermocouples, including for repair purposes.

Advantageous areas of application - flexible wire is designed for stationary laying in lighting networks with voltage up to 250 V AC frequency 50 Hz, including on wooden structures. The wires do not spread combustion in single laying.

KVBBShv cable

Purpose:

Cables are designed for fixed connection to electrical devices, apparatuses, clamp assemblies of electrical switchgear with rated AC voltage up to 660 V of frequency up to 100 Hz or DC voltage up to 1000 V.

Cables are used for laying outdoors, indoors, channels, tunnels, in the ground (trenches) in aggressive environment, in places exposed to stray currents, if cables are not subjected to significant tensile forces and if there is a danger of mechanical damage during operation. Cables do not spread combustion in single laying.

Wire A

Purpose:

The wires are intended for transmission of electric energy in overhead electric networks (overhead power lines). The wires are used for operation on land in areas with temperate and cold climate.

Copper wire of MM, MT grades

Wire conforms to Ts 24474056-001: 2014 'Round copper electrical wire. Technical conditions'

Application :

Designed for the manufacture of conductive cores of wires, cables, cords and other electrical purposes, manufactured for the needs of the national economy and for export supply.

Operating conditions :

At ambient temperature from plus 5° C to plus 40° C.

Wires of A and AC grades

Wires conform to GOST 839-80 'Uninsulated wires for overhead power lines. Technical conditions'

Application :

Intended for transmission of electric energy in overhead power networks

Operating conditions :

Operating conditions : at ambient air temperature from 40° C to minus 60° C

Technical characteristics :

Nominal cross-section of the conductive part of the wire in accordance with GOST 839-80.

Wire grades CIP-1 st, CIP-2 st, CIP-4

The wires comply with Ts 24474056-004: 2015 'Self-supporting insulated wires. Technical conditions'.

Certificate of Conformity No. Uz.SMT.01.311.1798204, valid till 12.08.2018.

Application :

Designed for overhead power lines for rated voltage up to 0,6/1 kV inclusive with rated frequency 50 Hz.

Self-supporting insulated wires for rated voltage up to 0,6/1 kV without neutral bearing conductor CIP-4 are designed for branch lines from overhead lines to the input, for laying on the walls of buildings and structures.

The bending radius during installation and installed on the supports of the wire should be not less than 10 D, where D is the calculated outer diameter of the wire.

Permissible heating of conductive cores during operation should not exceed 90 ° C in normal mode and 250 ° C - in case of short circuit.

Operating conditions:

At ambient temperature from plus 50 ° C to minus 40 ° C.

Wires for household use

The wires comply with Ts 24474056-002: 2014 'Household wires. Technical conditions'.

Certificate of Conformity No. UZ.SMT.01.302.1654796, valid till 02.06.2017.

Application:

Intended for various works on repair, laying, installation and for operation of power lines for rated voltage up to 250 V of frequency 50 Hz.

Wires of the PV1, PV3, APV, APPV, PPV grades

The wires comply with GOST 6323-79 «Wires with polyvinyl chloride insulation for electrical installations. Technical conditions»

Certificate of conformity No. Uz.SMT.01.311.1691437, valid until 19.10.2017

Application:

They are used for electrical installations for fixed installation in lighting and power networks, as well as for the installation of equipment, machines, mechanisms and machine tools for a rated voltage of up to 450 V (for networks up to 450/750 V) with a frequency of up to 400 Hz or a constant voltage of up to 1000 V

Primary area of application:

For laying single cable lines and performing power circuits for current collectors located indoors

Operating conditions :

Designed for operation at ambient temperatures down to minus 40° C

Wire of the PVS grade

The wire complies with GOST 7399-97 «Wires and cords for rated voltage up to 450/750 V Technical conditions». Certificate of conformity No. Uz.SMT.01.311.1691438, valid until 19.10.2017.

Application:

Intended for connecting electrical machines and appliances for household and similar use to an electrical network with a rated alternating voltage of up to 380 V for 380/660 V systems.

Primary area of application:

For connecting electrical appliances and power tools for home maintenance and repair, washing machines, refrigerators, small-scale mechanization equipment for gardening and vegetable gardening and other similar machines and devices, and for the manufacture of extension cords.

Operating conditions:

At an ambient temperature from minus 25° C to plus 40° C.

Power and control cables, flame retardant grades VVGng, AVVGng, KVVGng, AKVVGng

Cables comply with Ts 24474056-003: 2015 «Power and control cables, flame retardant Technical conditions»
Certificate of conformity No. Uz.SMT.01.311.1798204, valid until 12.08.2018

Application:

Primary area of application:
For group laying of cable lines in cable structures and indoor (closed) electrical installations.
For electrical wiring in residential and public buildings
Cable laying must comply with the requirements of the current «Rules for the Installation of Electrical Installations»

Operating conditions:

At an ambient temperature from plus 50 °C to minus 50 °C

Power cables of the VVG, AVVG, APVG grades

The cables comply with GOST 16442-80 «Power cables with plastic insulation. Technical conditions».
Certificates of conformity No. UZ.SMT.01.302.1654797, valid until 02.06.2017; No. Uz.SMT.01.311.1691439, valid until 19.10.2017; No. Uz.SMT.01.311.1717280, valid until 12.11.2017.

Application:

Designed for transmission and distribution of electric energy in stationary installations at a rated alternating voltage of 0.66; 1 kV with a frequency of 50 Hz.

Primary area of application:

For laying single cable lines in cable structures and premises.

Operating conditions:

At ambient temperatures from plus 50° C to minus 50° C, relative air humidity up to 98% at temperatures up to 35° C, including for laying outdoors.

Power cables with plastic insulation according to GOST 31996-2012

AVVG - power cable with aluminium core, with polyvinylchloride insulation and sheath.

VVG - power cable with copper core, with polyvinylchloride insulation and sheath.

AVBbshv - power cable with aluminium core, with insulation and protective hose made of polyvinyl chloride plasticate, with armour made of two steel bands.

VBbshv - power cable with copper core, with insulation and protective hose made of polyvinyl chloride plasticate, with armour made of two steel bands.

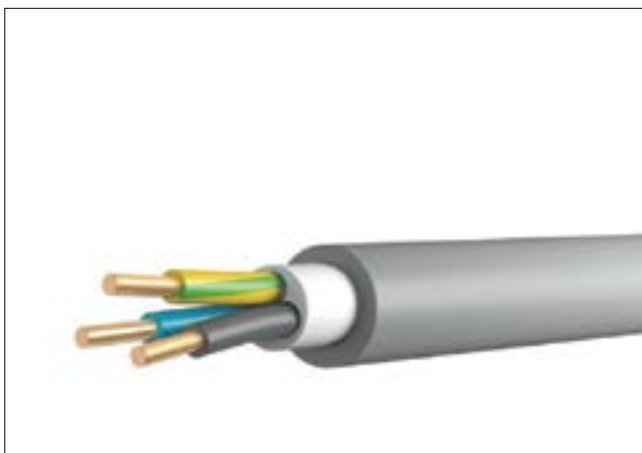

Installation wires for water submersible electric motors

VPP - installation wire for water submersible electric motors with polyethylene insulation in polyethylene sheath.

VPV - installation wire for water-immersion electric motors with polyethylene insulation in polyvinylchloride plasticate sheath.

NYM power cables

NYM - power cable with copper conductive core, with insulation and sheath made of polyvinylchloride plasticate, with filling the space between the cores.

Non-insulated wires for overhead power lines

Non-insulated wires according to GOST 839-80

A - uninsulated wire twisted from aluminium wire.

AC - uninsulated wire twisted from aluminium wire around a supporting steel core.

M - uninsulated wire twisted from copper wire.

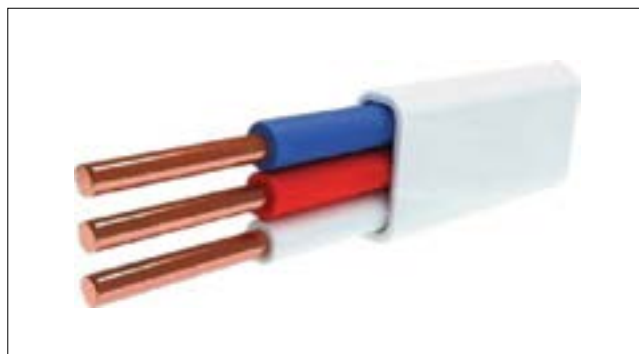

Copper round electrical wire

MM (A) - annealed copper wire.
MT (R) - unannealed copper wire.

Wires for household use

PUN - polyvinylchloride insulated wire with copper core.
APUN - polyvinylchloride insulated wire with aluminium core.
APUNP - polyvinylchloride insulated and sheathed wire with aluminium conductors, flat.
PUNP - polyvinylchloride insulated wire with copper conductors, flat.
PPBN - polyvinylchloride insulated wire with copper conductors, with separating base, flat.
APPBN - polyvinylchloride insulated wire with aluminium conductors, with separating base, flat.

Stranded copper conductors

Cu-OF-A - twisted conductor made of soft copper (annealed).
Cu-OF-R - twisted conductor made of hard copper (not annealed).

Limited Liability Company «YUQORICHIRCHIQ METALL INVEST» is an absolutely new enterprise for the production of copper tyres established in the Republic of Uzbekistan.

As of today, the equipment installed at the enterprise allows to produce various standard sizes of copper bars from copper of M00K grade with the volume of up to 400 tonnes per month.

Wire rod

Wire rod is produced from copper cathodes of MOOC grade for the subsequent copper busbar manufacturing process.

SHMTV - solid copper busbars made of oxygen-free copper

Oxygen-free copper tyre is characterised by high quality due to the copper alloy passing strict multi-level control at the manufacturing plant. This is excellent ductility and resistance to hydrogen sickness (cracks, pores and voids formed by the interaction of hydrogen and copper oxide and remaining in the ingot). They are manufactured according to GOST 434-78 standard. Copper cathodes of M00K grade are used for production

Scientific and Production Association «ELXOLDING» was established in 1988 and since 1997 has specialised in the production and supply of teaching and laboratory equipment, furniture and visual aids for physics, chemistry, biology, astronomy classrooms, visual aids for mathematics, drawing, native and foreign languages and other special subjects.

Currently, ELXOLDING is the leading manufacturer and supplier of educational equipment and materials for educational institutions in Uzbekistan. For the last 11 years, the company has been successfully supplying secondary specialised educational institutions and general education schools, as well as exporting educational products to Russia, Kazakhstan, Azerbaijan, Latvia and Turkmenistan.

One of the activities is production of cargo three-wheeled motorbikes for farms and trailers for cars.

We are pleased to offer you a range of quality products. Purchasing Infinity Copper Group products instils confidence in the performance of your equipment. All Infinity Copper Group products are manufactured exclusively from the purest mineral raw materials, without the use of waste or recycled copper.

TEH (tubular electric heaters) for the water heater is used to heat the water in the storage tank. It is a hollow tube made of copper.

The ends of this tube are fixed to the flange. The nichrome filament inside acts as a conductor.

It is coated with a thermally conductive electrical insulator, most often magnesium oxide. As a result of the electric current flow, the filament heats up and transfers the released heat to the tube, which in turn heats up the water.

A storage water heater is a device that operates in quite harsh conditions. It experiences constant temperature changes (heating, cooling), and, as a result, constant deformations of the inner tank. In addition, it works as a large sump, into which sediment from the water constantly falls. The composition of the sediment is aggressive. It makes the water corrosive. Corrosive water plus hardness salts, voltage surges in the electrical network, electrolytic and galvanic corrosion inevitably disable the heating element over time. It is important to understand that the heating element of the water heater is a consumable item. «Wet» heating elements fail more often, but they are cheaper. «Dry heating elements» are more reliable. They rarely fail. Based on our experience, in water heaters with «dry heating elements», the heating element bulb most often burns out. This element is a rather expensive and rare spare part. Fortunately, the flask burns out quite rarely. The presence of «dry heating elements» does not relieve the owner from servicing the water heater and replacing the magnesium anode, but a boiler with «dry heating elements» will work much longer without maintenance. Water heaters with «wet heating elements» are more practical in maintenance.

Light industry

Uzbekistan is renowned for its proficiency in the production of fabrics and textile products. The availability of raw materials, historical skills of workers, and convenient transportation have been instrumental in the establishment of textile enterprises in cities such as Tashkent, Ferghana, Andijan, and Bukhara in the mid-20th century. In 1930-1932, the first textile company in Uzbekistan was established, namely «8 March LLC», which remains a market leader to this day. Concurrently, the Tashkent Textile and Light Industry Institute was established.

The Uzbek textile, clothing, and knitwear industries export a diverse range of products, from yarn to finished garments and knitwear. These companies continue to expand their international presence.

The Uzbekistan textile industry is comprised of over 7,300 enterprises, with over 1,300 members of the Uzbek Textile Association. These include 210 spinning, 114 weaving, 38 wadding, and 26 non-woven industries, as well as 4,800 sewing businesses. Collectively, they have a processing capacity of 710 thousand tons of cotton fiber and produce 1.253 billion square meters of fabrics in various assortments. In 2017 alone, textile enterprises successfully mastered over 210 new models of finished garments and knitwear.

Over the past 10 years, production capacity has been increased by 100%. The latest generation of equipment has been installed, thereby improving product quality and increasing competitiveness on the global market.

Association of Textile and Garment and Knitwear Industry

The Association of Textile and Garment and Knitwear Industry «Uztekstilprom» was established by the Decree of the President of the Republic of Uzbekistan dated 14 December 2017. The Association comprises over 1,400 industrial enterprises, including 30 large facilities equipped with cutting-edge technology. Additionally, it encompasses 150 joint ventures established with the involvement of international partners.

The Association «Uztekstilprom» is a dynamic, leading association of textile, garment, and knitwear manufacturers in

Uzbekistan. It contributes to regional and national economic growth, addresses social issues, and ensures employment and job creation.

The Uztekstilprom Association is structured around the following divisions: the Textile Advertising and Marketing Agency LLC, Uztextile Export LLC, Textile Broke LLC, Sharq Liboslari Design Center, Yengilsanoatkurilish LLC, State Design Institute - 4 Uzengsanoykha and the Tashkent Institute of Light and Textile Industry.

Export potential

Uzbek textile products are exported to more than 55 countries worldwide. The main export markets are the CIS countries, primarily Russia, as well as Latin American countries, the EU, the Republic of Korea, China, Singapore, Iran, Israel, the USA and others. In 2018, new markets were developed, including Pakistan, Georgia, Croatia, Nigeria and a number of others. Russia and the CIS countries are the largest importers of products from Uzbek textile enterprises, accounting for over 51% of all supplies. South Asian countries account for 21% of exports, Europe for over 12% and the Middle East and Africa for 8%.

Based on the results of the implementation of development programs, textile exports in 2018 are expected to reach \$1.6 billion, with steady growth in subsequent years.

Currently, there are approximately 70 trading houses of Uzbekistan's textile enterprises operating abroad. To expand the range of exported products, enterprises of the industry actively participate in international exhibitions and fairs in Germany, the Republic of Korea, Russia, Belarus, Latvia and other countries. Foreign investment in Uzbekistan's textile industry has reached \$3.1 billion in recent years. Over 80% of the foreign investment attracted to the sector originates from countries such as South Korea, Switzerland, Singapore, Great Britain, India and Turkey..

Certification

To date, the ISO 9001 quality management system has been implemented at more than 600 enterprises of the Association. The QMS is being rolled out across the Association's enterprises with the support of employees from IP TUV International Certification (Germany), IP Sert

Management (Germany), IP QMS Italia (Italia) and JV Uzbek-Turk-Test Markazi. Furthermore, 126 standards have been aligned with the ISO international standards. Furthermore, the plan is to harmonise 36 international ISO standards.

Equipment

Our equipment suppliers include leading companies such as Rieter, Trutzschler, Toyota, Marzoli, Savio, Schlafhorst, Terrot, Mayer&Cie, PayLung, Picanol, ITEMA, Sulzer, Juki, Brother, Kansai, Lonati, Rumi, and others.

Uzcharmsanoat Association

The Uzcharmsanoat Association's primary objectives are to facilitate collaboration between diverse enterprises within the industry, implement a unified investment strategy, modernise and re-equip industries, and introduce advanced technologies.

The Association represents approximately 300 industrial enterprises, including 27 leather manufacturers, 25 leather goods manufacturing enterprises, 200 footwear manufacturers, 33 automated slaughterhouses for livestock, and 13 procurement offices. These industries collectively produce approximately 17 million pairs of shoes and 500 million square metres of leather annually.

The products manufactured by these enterprises include footwear, leather materials, personal protective equipment, finished leather goods, and finished fur and sheepskin products.

Export potential

The CIS countries, including the Russian Federation, Kazakhstan, Turkmenistan and Kyrgyzstan, represent the primary markets for leather and shoe products, collectively accounting for over 80% of total exports of association products. Concurrently, association enterprises are pursuing the expansion of their market reach. In the past three years, finished products have been exported to Japan, China, Israel, the United States, Germany and Latvia. Enterprises are working to strengthen their position and increase the volume of supply.

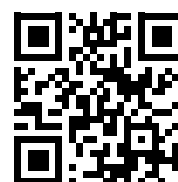

Uzbek leather and footwear products have been highly commended at international events for their quality, uniqueness and appearance on numerous occasions. The association has received over 150 awards, prizes and certificates of excellence from international exhibitors.

Certification

To date, the ISO 9001 Quality Management System has been implemented in over 600 enterprises of the Association. The QMS is being rolled out across the Association's enterprises with the support of the staff of FE «TUV International Certification» (Germany), FE «Sert Management» (Germany), FE «QMS Italia» (Italy), and JV «Uzbek-Turk-Test Markazi». Furthermore, 126 standards have been aligned with international ISO standards. The objective for 2018 is to harmonise 36 ISO international standards.

High-toe boots

Upper material: heat-resistant, water-repellent natural leather of increased thickness (1.8-2.2 mm) Outsole: oil-and-gasoline-resistant (MBS), acid-alkali-resistant (ALR) polyurethane heat-resistant, frost-resistant (-20° C to +100° C).

Toe cap: Metal, for impact protection in the toe part of the foot. Maximum impact load (MUN) 200 Joules. Insole: Metal, for protection against nails.

Construction: Moulded.

Work boots

Upper material: heat-resistant, water-repellent natural leather of increased thickness (1.6-2 mm) Outsole: oil-and-gasoline-resistant (MBS), acid-alkali-resistant (ALR) polyurethane heat-resistant, frost-resistant (-20° C to +100° C).

Toe cap: Metal, for impact protection in the toe part of the foot. Maximum impact load (MUN) 200 Joules. Insole: Metal, for protection against nails.

Construction: Moulded.

High-top boots

Upper material: heat-resistant, natural leather nubuck of increased thickness (1.6-1.8 mm).

Outsole: oil and petrol resistant (MBS), acid and alkali resistant (ALR) polyurethane heat-resistant, frost-resistant (-15° C to +90° C).

Toe cap: Metal, for impact protection in the toe part of the foot. Maximum impact load (MUN) 200 Joules.

Insole: Metal.

Construction: Moulded.

Work boots

Upper material: High-thickness genuine leather (1.6-1.8 mm) Synthetic leather options are available.

Sole: Double-layer oil- and gasoline-resistant (MBS), acid-alkali-resistant (KSHS) made of heat-resistant, frost-resistant polyurethane (from -30 ° C to +100° C).

Toe cap: Metal, to protect against bumps in the toe part of the foot. The maximum impact load (MUN) is 200 J. Insole: Metal, for protection from nails.

Construction: Moulded. There are options with fur.

Winter boots

Upper material: heat-resistant, water-repellent genuine leather with an increased thickness of 1.6–1.8 cm Sole: oil and gasoline resistant (MBS), acid and alkali resistant (KSHS), made of heat resistant, frost resistant polyurethane (from -15°C to $+90^{\circ}\text{C}$). Toe cap: metal to protect against bumps on the toe of the foot. Maximum impact load (MUN): 200 J Insole: metal. Construction: injection molding.

Sneakers

Upper material: Genuine leather + textile microfiber Sole: Heat-resistant, frost-resistant rubber (from -30°C to $+100^{\circ}\text{C}$). Construction: Adhesive.

Uzbekipaksanoat Association

Over the past two years, the country's leadership has initiated transformative reforms in silk production, along with structural changes designed to launch and modernise new production facilities, create favourable conditions for entrepreneurs, and expand the range and types of finished products that are competitive in the global market. The modernisation of 20 grena plants and more than 40 cocoon processing plants is scheduled for implementation between 2017 and 2025. Additionally, the area of mulberry plantations is set to expand by over 1.5 times, the volume of raw silk production by over 5.5 times, and the volume of silk fabric production by 17 times due to deep processing of raw materials, while exports are expected to grow by almost 1.7 times.

Export Potential

In 2016, exports of silk products reached 22.0 million US dollars, increasing to 37.6 million US dollars in 2017 (195.4% growth compared to 2016). In the first nine months of 2018, exports reached 29 million US dollars. This represents a 157% increase compared to the same period in 2017. We forecast that the value of exports of silk products for 2018 will exceed 48.4 million US dollars. The primary markets for our silk products are China, Vietnam, Turkey, the UAE, Italy, Spain, Egypt, Iran, South Korea, Japan and Thailand.

At present, 11 of the 40 member enterprises of the Association are engaged in joint production with foreign partners, including four with China, two with Vietnam, two with Singapore, one with the USA, one with Russia, one with the UK and one with South Korea.

Raw silk

The enterprises have established the production of raw silk of the following varieties:

№ 215 (40/44 denier)

№ 310 (27/29 denier)

№ 429 (20/22 denier)

The annual production of raw silk is 850–1000 tons.

Silk wool

Produced at all enterprises that are members of the Association. The main use is in the production of silk blankets and pillows.

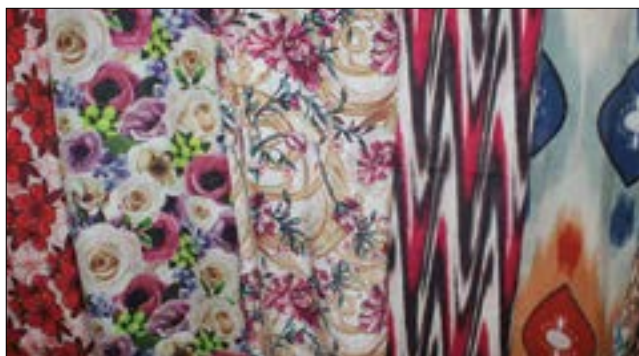

The annual production volume of silk wool is 315 tons.

Silk fabrics

Silk fabric is used for various purposes including underwear, silk clothing, curtains, etc. According to appearance, function, processing method, method of crossing warp and weft threads, silk fabrics can be divided into crepe, crepe georgette, satin, muslin and jacquard fabric. All these types are produced at enterprises that are members of the Association.

The annual production volume of silk fabrics is 820 thousand linear meters.

Silk carpets

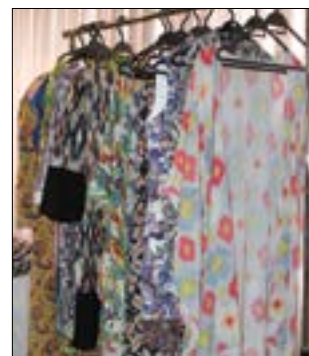

Silk carpets are made from silk thread and silk waste and dyed with both natural and chemical dyes. Price per 1 sq. m of silk carpet made from natural silk thread starts from \$1,000. At the moment, the production of silk carpets by hand is established at LLC

“Yodgorlik” (Fergana, Margilan). From 2019, it is planned to organize the production of silk carpets at all enterprises that are part of the Association.

Ready-made silk clothing

Production of ready-made women's dresses according to designer models from natural silk fabric with a printed pattern.

Satin scarf

It is recommended that a modern woman should have a collection of silk scarves, shawls and stoles. Wearing a textile accessory is an effective way to attract attention. The addition of a scarf can enhance a woman's femininity. It is advisable to select a scarf, scarf or stole that is in harmony with your hair and eye colour. The item should serve to enhance your appearance and provide a refreshing aesthetic. It is therefore advisable to select colours that are in keeping with your personal colouring. The sensual touch of cool silk will bring you true pleasure with a scarf.

Satin scarf

Brand: Bukhara Brilliant Silk

Manufacturer: The fabric is of Uzbekistani origin. Satin (satin)

Print type: The digital print measures 55 cm x 200 cm and is composed of: 100% silk.

Season: Spring, Summer, Autumn

Silk Pillow

Our «Bukhara Brilliant Silk» pillows are crafted with 100% natural silk filling, ensuring a healthy sleep and comfortable rest. Silk pillows are completely hypoallergenic, as natural silk does not attract dust mites. This makes them an ideal choice for allergy sufferers and those with asthma.

Silk blanket

Silk blankets from the Bukhara Brilliant Silk range represent the pinnacle of luxury bedding. The blankets are filled with 100% natural silkworm silk, which is hand-sorted.

The natural silk fibres used in our products are not treated with chlorine or other aggressive chemical compounds. This means that they retain their natural aseptic properties, which prevents dust and dirt from accumulating during use.

Silk ties

The production of silk ties is currently managed by Bukhara Brilliant Silk LLC JV. The ties are manufactured from natural silk fabric with a printed pattern.

Food industry

Agency for the Development of Viticulture and Winemaking

The Agency for the Development of Viticulture and Winemaking was founded in 2019 under the Ministry of Agriculture and Food of the Republic of Uzbekistan. The Agency implements a unified state policy in the viticulture and winemaking industry, as well as develops and implements comprehensive target programmes aimed at ensuring the dynamic development of viticulture and winemaking.

JSC II «Combine Tashkentvino»

Комбинат «Ташкентвино» - это современное многопрофильное предприятие, которое является признанным мировым лидером в своей отрасли, выпускающим более 200 видов наименований алкогольной и безалкогольной продукции. Более 150 лет предприятие выпускает большой ассортимент высококачественных спиртных напитков, которые пользуются всемирным признанием. История комбината «Ташкентвино» начинается в 1867 году, когда

прибывший в наш край предприниматель Императорского двора России купец первой гильдии Иван Андреевич Первушин построил винокурню на берегу канала Салар и положил основу виноделия в промышленных масштабах. Первые высокие награды медали и дипломы получены комбинатом на Московской политехнической выставке, а уже позже в 1878 году Золотые и Серебряные медали на международной Выставке в Париже.

JSC «O'zbekiston Shampani»

JSC «O'zbekiston Shampani» is the sole enterprise in the Republic engaged in the production of champagne and sparkling wines within the Uzvinprom-holding holding company system. The enterprise commenced operations in 1942. To produce champagne, wine materials obtained from certain grape varieties are used. The technical grape varieties

sent for processing champagne wine materials include Bayan-Shirey, Kuldzhinsky, Pinot, Rkatsiteli, Riesling, Cabernet, Soyaki, and others. In addition to champagne and sparkling wines, Uzbekistan Champagne JSC produces «still» red and white wines, as well as vodka and a wide range of other alcoholic beverages.

OJSC «Samarkand wine combine named after Khovrenko»

The enterprise was founded in 1868 and currently specialises in the production of grape wine (dry, dessert, fortified), cognac, vodka and liqueur products, wine materials, cognac alcohol. The

products manufactured by the enterprise are of high quality, as evidenced by numerous gold, silver and bronze medals received at International tasting competitions.

CHAMPAGNE

O'zbekim

0.75 l / 10.5–12.5%

Uzbek champagne is a high-quality sparkling wine, produced from premium champagne wine materials made from white grape varieties «Bayan-Shirey», «Rkatsiteli», «Riesling», «Kuldzhinsky», cultivated in the Uzbekistan foothills, using exclusive champagne yeast. The champagne has a light straw colour with light shades of gold and greenery, an elegant floral bouquet and a light, harmonious taste, emphasised by the lively play of pearl strings and snow-white lace foam.

Affresco

0.75 l / 10.5–12.5%

The champagne «Affresco» is characterised by a rich range of floral notes and a complex interweaving of the aroma of white flowers with a light breath of rose, creating a magical bouquet. The product is a royal drink that will enchant your customers with its variety of pearl strings, born in the mysterious depths of glass and with elegant grace striving for the surface through a bubble ring of white foam. The careful selection of grape varieties, including Aleatico, Kuldzhinsky, Rkatsiteli, Riesling and Bayan-Shirey, along with the use of aromatic French yeast in the champagne production process, has enabled us to achieve this level of excellence.

Oltin Fawora

0.75 l / 10.5–12.5%

«Oltin Fawora» is a high-quality, periodically prepared sparkling wine from Uzbekistan. It is made using a tank method from high-quality champagne wine materials made from the Bayan Shirey, Rkatsiteli, Kuldzhinsky, and Riesling grape varieties. The champagne is produced in the foothills of Uzbekistan using French champagne yeast and then aged for six months with the aim of forming high sparkling and foamy properties, enriching the wine with valuable ingredients of yeast cells, forming an exquisite bouquet and taste.

Based on sugar content, the champagne is prepared as semi-dry and semi-sweet.

WHITE WINES

O'zbekim

Dry

0.75 l / 10–13%

«O'zbekim» is a natural dry white wine crafted from a meticulously selected blend of premium wine materials sourced from white technical grapes. Varieties

The «Bayan-shirey» and «Rkatsiteli» varieties are characterised by a light straw colour with a golden hue, a delicate bouquet of flowering herbs from the foothills of Uzbekistan and a light, harmonious taste.

Fergana

Dry

0.75 L / 11%

«Fergana» is a dry white wine. Made from the finest white grape varieties. This wine is light, fruity and refreshing, with a well-balanced and generous flavour profile.

Bagizagan Chardonnay

Dry

0.75 l / 10%

This exemplary dry natural wine, sourced from the distinctive Bagizagana vineyards, situated in an exceptional region of natural excellence, exhibits a straw-like hue, a fruity bouquet reminiscent of peach melon and quince, a pronounced flavour profile with a distinctive aftertaste of hazelnuts and wildflowers.

Karabair

Dry

0.75 l / 11%

Karabair is a dry white wine made from selected white grape varieties grown in the Parkent region of Uzbekistan. It is a natural wine with an alcohol content of 11% and a yield of 0.75 l. The grape varieties used are «Bayan-Shirey», «Rkatsiteli», «Kuldzhinsky» and «Riesling».

The wine has a straw-coloured appearance with greenish-golden hues, a complex and intriguing bouquet with notes of white flowers and honey, and a light, harmonious taste.

Sultan

Dry

0.75 l / 10.5–12.5%

This wine is ideally paired with cold appetisers, cheese, salads, white meat dishes, and seafood. Furthermore, it is an excellent choice as an aperitif.

The colour is light with alternating greens. The wine's distinctive varietal bouquet is skilfully presented with intertwined shades of fragrant white flowers, particularly acacia, honey and peach. The wine has a fresh taste and a harmonious flavour profile, with a velvety astringency that lingers on the palate.

Wine Garden Riesling

Dry

0.75 l / 11%

A natural dry white wine, crafted from Riesling grapes.

The wine displays a pleasant straw colour with light greenish tints. The wine's fresh aroma is characterised by green apple and lime notes, with subtle herbal nuances. The wine's fresh, light and elegant taste provides perfect harmony between sweet fruit notes and wonderful acidity. The refreshing taste profile reveals notes of green apple, apricot and peach. The wine is an excellent choice as an aperitif and pairs well with salads, fried fish or sauce, and seafood.

WHITE WINES

Uzbekistan

Semi-dry 0.75 l / 12 %

A white semi-dry wine crafted from select white grape varieties, namely «Rkatsiteli» and «Riesling». The bouquet is pleasant and displays subtle floral notes. The wine displays a light straw colour with golden hues. The taste is light and harmonious. This wine is suitable for serving both as a main course and as a dessert at a temperature of 2–8° C.

Tashkent

Semi-sweet 0.75 l / 11%

Made from the finest white grape varieties, this wine is rich in deep and full flavour. This wine is well balanced.

Wine Garden

Semi-sweet 0.75 L / 11%

Natural white semi-sweet wine «Wine Garden» is produced from a blend of Riesling and Rkatsiteli grape varieties.

The wine displays a bright golden colour. The wine displays a fresh, sophisticated aroma with notes of ripe, sweet-smelling apples, quince, melon and roasted nuts. The wine boasts a soft and harmonious taste, filled with pleasant fruity notes, and a light, fresh aftertaste that completes the composition.

Sultan Chinuri

Semi-sweet 0.75 l / 12.5%

You can enjoy the perfect combination of wine with fruit dishes, salads, and various types of raw cheese. The wine has a light, fruity bouquet with notes of honey, peach and pear, offering a complex and elegant flavour profile.

Muskat

Semi-sweet 0.75 l / 16%

The wine is made from Hungarian Muscat grapes and has a delicate honey aroma with hints of Kazanlak rose petals. The wine has a golden colour. The flavour profile is full and harmonious, reminiscent of pink jam. The wine's distinctive combination of tenderness and aromatic charm leaves a lasting impression.

Muscat wine goes well with fruits, confectionery and is served with a delicious dessert at room temperature.

RED WINES

Uzbekistan

Dry

0.75 l / 12 %

A natural red wine produced in Uzbekistan, made from Cabernet and Tavkveri grape varieties. The wine displays a deep ruby hue. The wine has a pleasant taste and a low acid content. The aroma is subtle, with berry tones. This wine is ideally paired with dishes featuring red meat and cheese. It is recommended that this wine be served at a temperature of 5–16° C.

Bagizagan Merlot

Dry

0.75 l / 11%

This wine is produced from grapes cultivated on environmentally sustainable plantations in Bagizagan, situated at the confluence of the Zeravshan River and the Tien Shan Mountains. This unique location has a beneficial impact on the quality of the grapes.

Cabernet Sauvignon

Dry

0.75 l / 11%

This wine is recommended for pairing with fried dishes, steaks and red meat dishes, as well as various types of mature cheeses. This particular variety of wine is characterised by a deep red colour with a ruby hue. The bouquet is pleasant and harmonious, with a delicate aroma that combines the flavours of currants, vanilla, coffee beans and dark chocolate. The wine leaves a long, delicate aftertaste with velvety tannins.

Sultan

Dry

0.75 l / 12.5%

A rich ruby colour with dark garnet shades. The wine boasts a delightful aroma of ripe red fruits, complemented by subtle notes of pepper and vanilla. The wine leaves a long, pronounced aftertaste with prominent tannins. The following grape varieties are used: The wine is a blend of Saperavi and Cabernet Sauvignon grapes. This wine is three years old. This wine is a perfect accompaniment to meat dishes, including beef, lamb and grilled meats.

Wine Garden Cabernet

Dry

0.75 L / 11%

A natural red wine, produced from Cabernet grapes, with a dry finish.

The wine displays a deep ruby-violet hue. The wine boasts a bright aroma, with notes of mulberry, plum, raisins and strawberries with cream. The wine has a soft, silky taste with rich notes of blackberry and blackcurrant. This wine is recommended for pairing with smoked salmon, meat dishes (beef, game, lamb), pasta, and cheeses.

Wine Garden Saperavi

Dry

0.75 l / 11%

A natural red dry wine, crafted from Saperavi grapes. The wine is characterised by a dark ruby hue with a violet tint. The wine boasts a rich and generous aroma, characterised by notes of dark blackcurrants and ripe cherries. The wine displays an elegant, well-balanced, rich taste with good structure and persistent tannins. On the palate, the tones of ripe fruit harmoniously intertwine with light nuances of oak and spice, resulting in a long, aromatic aftertaste.

The wine will be an excellent complement to grilled meats, fried meats, generously seasoned with spices and mature cheeses.

RED WINES

Wine Garden

Semi-dry

0.75 l / 11%

The wine is produced using a blend of Cabernet and Saperavi grape varieties. The wine displays a deep cherry-red hue. The wine boasts a complex and elegant aroma, characterised by notes of plum, cherry, blackberry and undergrowth. The wine displays a well-balanced, harmonious flavour profile with subtle notes of fruit and berries, accompanied by soft tannins and a pleasant sweetness in the aftertaste. This wine is recommended for pairing with grilled meat, as well as sausages and deli meats.

Sultan

Semi-sweet

0.75 l / 12%

Ideal accompaniment to main courses, fruits and desserts. The wine displays a dense ruby colour with a violet tint. The bouquet presents floral and sweet fruity shades. The taste is full and rich, with a restrained tartness that lingers on the palate.

Uzbekistan

Semi-dry

0.75 l / 12%

A blend of Cabernet and Tavkveri grape varieties, this wine boasts a rich ruby colour and a pleasant taste with low acid content. Its subtle aroma features floral and berry tones, making it ideal for pairing with red meat and cheese dishes. It is best served at temperatures between 2 and 8°C.

Samarkand

Semi-dry

0.75 l / 11%

«Samarkand» is a red semi-dry wine. This wine is crafted from the finest red grape varieties. We recommend serving «Samarkand» with dessert, as it is delicately sweet.

O'zbekim

Semi-sweet

0.75 l / 11%

O'zbekim is a natural red semi-sweet wine made from a carefully selected mixture of wine materials made from red technical grape varieties Cabernet and Saperavi. It is characterised by a rich red colour with hints of ruby, a rich floral berry bouquet with delicate notes of cherry and currant, and a soft velvety taste. The product is produced with an alcohol content of 11% and an acidity level of 4–5 g/dm³.

BRANDY

Uzbekistan

Jubilee Aged for 25 years

0.7 l / 40%

«UZBEKISTAN» is a distinctive cognac crafted from the finest cognac spirits, aged in oak barrels for 20 to 25 years. Cognac Uzbekistan boasts a rich amber hue with golden and mahogany reflections. It boasts a refined and elegant taste. The premium quality and original modern design of Uzbekistan Cognac make it an ideal gift for special occasions.

Old Samarkand

At the age of 15 years

0.5 l / 40%

«Old Samarkand» is a cognac from the STO group, a very old cognac prepared using classical technology from cognac spirits aged in oak barrels for at least 15 years. Its colour is that of a premium cognac. The bouquet is exceptionally full, with tones of fresh oak and nutmeg. The harmonious blend of a well-developed bouquet with a complex array of aromas is perfectly balanced by a soft, resinous vanilla taste. Please note that this product contains sugar. The product has a specific gravity of 1.3 g/dm³.

Toshkent

XO Exclusive, aged 15 years

0.7 l / 40%

This deep golden amber, full and powerful wine displays hints of almond and vanilla with a long aftertaste. Each bottle is crafted from rare eau-de-vie, aged in our cellars for 15 years. We believe you will find it is worth the wait. Toshkent Exclusive is a rich and complex blend that combines spicy aromas of oak and leather with the sweeter essences of flowers and ripe fruits.

Toshkent

XO, aged 15 years

0.5 l / 40%

Toshkent Xo is an ordinary wine brandy. This product is prepared using traditional production methods. This wine brandy has a light and delicate character, gradually revealing a complex and well-balanced bouquet of aromas and flavours. A wine brandy that offers a unique tasting experience.

Filatov

At the age of 3

The Filatov brandy is produced using traditional methods, combining cognac spirits aged in oak barrels for a minimum of three years. This cognac displays a developed aroma with soft vanilla tones. The taste profile is characterised by a subtle heat, richness and multi-layered complexity, with a long, satisfying finish. The colour of cognac is amber, with a clear and pure shine. The aroma is rich and enchanting, with a perfect balance between woody and ripe grape notes. This brandy is invigorating but quite soft. It has a sugar content of 1.5 g/dm³.

Old Baron

Regular brandy

0.5 l / 40%

Old Baron is a regular wine brandy. This product is prepared using traditional production methods. This wine brandy is characterised by a light and delicate bouquet, which gradually reveals a complex and well-balanced aroma and flavour profile.

A truly enjoyable experience.

VODKA

Yagona

1 l / 40%

Our improved vodka. The product is transparent and clear. The product is colourless. The bouquet is consistent with the product type. The product has no external taste or aroma. The strength is 40%.

Trust

0.5 L / 40%

The premium vodka «Trust» is produced in accordance with traditional Russian vodka techniques, utilising premium quality alcohol «Alpha» and specially treated soft water. It is recommended that this product be consumed chilled. The product should be stored at temperatures between -15°C and +30°C with a maximum humidity level of 85%. The product has a shelf life of 12 months. The bottling date is clearly displayed on the bottle.

Troyka

0.5 l / 40%

Vodka «Tgoyka» is produced in accordance with the traditional Russian vodka-making process, utilising premium-grade alcohol «LUX», sugar and meticulously prepared soft water. It is recommended that this product be consumed chilled. The product should be stored at temperatures between -15°C and +30°C with a humidity level of no more than 85%. The product has a shelf life of 12 months. Please note that the bottling date is indicated on the bottle.

Royal Elite

0.7 l / 40%

Royal Elite is a smooth and silky vodka crafted from the finest golden wheat and infused with the legendary healing waters of Uzbekistan. The Royal Elite has its roots in the ancient court of Emperor Tamerlane and is produced by the esteemed Tashkentvino distillery, which is renowned throughout Russia and Central Asia as a leading producer of premium vodkas, cognacs and wines. Royal Elite Gluten-Free Vodkas are the optimal choice for those on a gluten-free diet. We are pleased to confirm that these products are also kosher for Passover. Please note that this is not a mistake. These are genuine, traditional vodkas, unflavoured.

Lemon

1 l / 40%

“Lemon” - “Uzbekistan Lemon” is a unique alcoholic drink. The bottle contains a natural, whole lemon. This beverage is crafted using a proprietary process that incorporates premium-grade «Lux» alcohol.

Fruit and vegetable products

Today, the agricultural sector of the republic annually produces more than 21 million tons of fruits and vegetables, as well as more than 350 types (varieties) of agricultural products, of which over 180 types of fresh and processed fruits and vegetables are supplied to foreign markets.

In the production and processing of fruits and vegetables, industry enterprises utilise cutting-edge equipment from leading global brands, including Binder (Germany), Fam (Belgium), Göztepe (Turkey), Yukseltur (Turkey), and GMG (China).

Meat products

CHORIZO

CHORIZO is a raw smoked sausage, especially popular in Latin America, Portugal and Spain. A distinctive feature of this sausage is the rusty-red color of the product, which is given to the CHORIZO sausage by paprika, which is necessarily added to the meat.

Product storage conditions:	t 2-6°, 4 months
Thermal state of the product:	Chilled
Nutritional value of 100 g of product:	Proteins - no less than 20 g Fats - no more than 44 g Calories - 476 kcal

ALPINE

ALPINE Cervelat is a premium smoked, dry sausage, crafted to delight the palate. The ALPINE cervelat is prepared by chopping the meat into very small pieces, rather than grinding it. In addition to the meat, minced meat contains finely ground bacon. When sliced, the sausage displays a distinctive pink or dark red hue.

Product storage conditions:	t 2-6°, 4 months
Thermal state of the product:	chilled
Nutritional value of 100 g of product:	Proteins - no less than 16 g Fats - no more than 58 g Calories - 586 kcal

KRAKOVSKAYA first grade

Product storage conditions:	t 2-6°, no more than 15 days
Thermal state of the product:	Chilled
Nutritional value of 100 g of product:	Proteins - no less than 16 g Fats - no more than 35 g Calories - 387 kcal

SMOKED NECK

The neck is produced from the front part of the pork carcass and has a delicate meat consistency with thin streaks of fat. The smoked pork neck offers a tender, piquant and slightly spicy flavour profile.

Product storage conditions:	t 2-6°, no more than 15 days
Thermal state of the product:	Chilled
Nutritional value of 100 g of product:	-

MOSCOW

A slightly pungent taste and aroma of cardamom, a pink slice interspersed with juicy bacon - an appetizing large-diameter loaf in a natural blue color. The casing enhances the natural flavour of the sausage, creating a visually appealing presentation.

Product storage conditions:	t 2-6°, no more than 20 days
Thermal state of the product:	Chilled
Nutritional value of 100 g of product:	Proteins - no less than 13 g Fats - no more than 30 g Calories - 387 kcal

Premium Quality
CANADIAN SAUSAGES

Product storage conditions:	t 2-6°, no more than 10 days
Thermal state of the product:	Chilled
Nutritional value of 100 g of product:	Proteins - no less than 10 g Fats - no more than 35 g Calories - 355 kcal
